# 1 Introduction

This publication outlines the communication procedures, transmission formats, business rules and validation procedures for returns e-filed through the Modernized e-File (MeF) system. To develop software for use with the MeF system, Software Developers and Transmitters should use the guidelines provided in this publication along with the XML Schemas published on IRS.gov.

The procedures in this publication should be used in conjunction with the following publications:

- Publication 1345, Handbook for Authorized IRS e-file Providers of Individual Income Tax Returns, contains information specific information applicable for Forms 1040 and 4868.
- Publication 3112, IRS e-file Application and Participation, contains information about the roles of software developers, transmitters and electronic return originators. IRS has standardized the information for all *e-file* programs.
- Publication 4162, Modernized e-File Test Package for Forms 1120/1120-F/1120S/7004, contains the instructions and test case scenarios for software developers and transmitters to use for Assurance Testing System (ATS) of 1120/1120-F/1120S. This publication also contains the instructions and test case scenarios for Form 7004, Application for Automatic 6-Month Extension of Time to File Certain Business Income Tax, Information, and Other Returns.
- Publication 4163, Modernized e-File Information for Authorized IRS e-file Providers for Business Returns, contains specific information applicable to Forms 1120, 1120-F, 1120S, 1065, 1065-B, 7004, 990, 990-EZ, 990-N, 990-PF, 1120-POL, and 8868 *e-file* programs.
- Publication 4205, Modernized e-File Test Package for Exempt Organization Filings, contains the instructions and test case scenarios for software developers and transmitters to use for Assurance Testing System (ATS) of Forms 990, 990-EZ, 990-N, 990-PF, 1120-POL, and 8868.
- Publication 4505, Modernized e-File Test Package for Forms 1065/1065, contains the instructions and test case scenarios for software developers and transmitters to use for Assurance Testing System (ATS) of Forms 1065/1065-B.
- Publication 4557, Safeguarding Taxpayer Data: A Guide for Your Business, provides information on federal and state information security laws and regulations, as well as industry standards and best practices.
- Publication 4600, Safeguarding Taxpayer Information: Quick Reference Guide for Business, is a tri-fold brochure that summarizes and introduces Publication 4557. Businesses can use the brochure as an information security awareness and marketing tool.

- Publication 4594, Modernized e-File Test Package for Forms 720, 2290 and 8849, contains the instructions and test case scenarios for software developers and transmitters to use for Assurance Testing System (ATS) of Forms 720, 2249 and 8849.

The following guides/documents provide additional guidance for e-filing through MeF.

- MeF Submission Composition Guide – Modernized e-File System, provides guidance to the IRS trading partners (Software Developers, Originators, and Transmitters) on how to compose submissions and transmission files that are sent to the IRS for processing by the MeF.
- MeF State and Trading Partners Reference Guide, describes the interaction between MeF and the State and Trading Partners through the Internet Filing Application (IFA) and Application-to-Application (A2A) platforms.
- MeF State and Trading Partners Interface Control Document (ICD) Excise Tax Supplement, provides additional information regarding excise tax forms and the interaction between MeF and State and Trading Partners through IFA and A2A.
- Automated Enrollment External User Guide, describes the User Interface (UI) for the Automated Enrollment (AE) application. The AE application provides authorized delegated users the ability to enroll and update Application System IDs (ASID) using the Registered User Portal (RUP)

MeF publications can be found on IRS.gov at  
<http://www.irs.gov/efile/article/0,,id=171946,00.html>.

## 1.1 Modernized e-File (MeF)

In tax year 2009/processing year 2010, the IRS is adding Form 1040, 4868, and 21 1040-related forms to the MeF platform.

In future releases, the IRS plans to transition the remaining 1040-related forms from the existing e-File programs to MeF. IRS will use the procedures in this publication as the standard for all e-file programs.

IRS has combined information for Corporate, Partnership, Excise Tax, Exempt Organization and Individual returns in this publication. Unless otherwise indicated, all information applies to all five return types.

This publication and its updates or revisions are available at [www.irs.gov](http://www.irs.gov).

## 1.2 Communications

IRS worked in partnership with many MeF stakeholders to develop the information contained within this publication. Your continued cooperation is requested.

On occasion, you may need to contact IRS regarding e-filing issues, including MeF topics. The e-help Desk has been designated as the first point of contact for e-filing issues. Software Developers, Transmitters, EROs, Accounting Firms, and Large Taxpayers should contact the e-help Desk at 1-866-255-0654 for assistance in the following areas:

- IRS e-file application
- ATS or Communication Testing
- Transmission issues
- Strong authentication for A2A
- Rejects
- Technical questions on schemas or business rules

If the e-help Desk is unable to answer the question at the time of the call, the inquiry will be forwarded to the appropriate area for a response. By streamlining this communication process through the e-help Desk, IRS can better monitor the inquiries to ensure a timely response.

During the implementation of new forms to the MeF platform, a mailbox is provided specifically for questions related to those forms. For processing year 2010, Form 1040, 4868 and 21 1040-related forms will be added to the MeF platform. Questions relating to the implementation of these forms can be sent to [1040MeF@irs.gov](mailto:1040MeF@irs.gov).

If you have any questions, suggestions or comments regarding Exempt Organization Forms 990/990-EZ, 990-N, 990-PF, 1120-POL and 8868, please contact us at:

[TEGE-EO-efile@irs.gov](mailto:TEGE-EO-efile@irs.gov), or by mail at:

IRS – Tiwana Holland

SE:T:BSP 6N1

1111 Constitution Avenue, NW

Washington, DC 20224

### 1.2.1 IRS Web site

MeF uses IRS.gov to communicate information about the program. The Modernized e-File (MeF) Program Information page, located at

<http://www.irs.gov/efile/content/0,,id=171945,00.html>, provides links to:

- New Program information Coming Soon to MeF
- Information on what forms can be filed through MeF
- MeF Program Overview
- Current User Guides and Publications
- Schemas and Business Rules
- List of MeF e-file Providers
- MeF Stylesheets
- Internet Filing information
- MeF Systems Status

If you encounter an issue or limitation that prevents a return from being e-filed through MeF, please contact the e-help Desk at 1-866-255-0654. MeF will then work on making the appropriate corrections. Until the corrections can be implemented, MeF will develop “workarounds”, which is guidance on what temporary changes are needed so the return can be e-filed. Workarounds are posted by tax year under the “Known e-file Issues and Solutions” heading by form family. The MeF Program Overview page provides the location for the “Known e-file Issues and Solutions” for each form family:

- MeF Program Overview page: <http://www.irs.gov/efile/article/0,,id=171943,00.html>

If you encounter an issue e-filing through MeF and the solution is not posted to the Web pages shown above, please contact the e-help Desk at 1-866-255-0654.

### 1.2.2 Communication Vehicles

MeF uses QuickAlerts to distribute information and updates to MeF stakeholders. *QuickAlerts* is a **free** online service that disseminates e-file messages, within seconds, to all subscribers and

keeps Tax Professionals up to date on the events that impact e-file Transmitters, Authorized e-file Providers and e-file Software Developers throughout the filing season and beyond.

After subscribing, Authorized IRS e-file Providers can receive communications 24 hours a day, 7 days a week, regarding processing delays, IRS e-file program updates, and early notification of upcoming seminars and conferences. New subscribers may sign up [through the "subscription page" link provided](#) at the [QuickAlerts "More" e-file Benefits for Tax Professionals](#) page on [www.irs.gov](http://www.irs.gov). The subject line of a Quick Alert will usually identify the targeted audience (such as Software Developers and Transmitters, and/or Electronic Return Originators) and the targeted group (Individual e-file or Business e-file).

## 1.3 Highlights for Processing Year 2010

### 1.3.1 General Items

- The MeF platform will include Form 1040, 4868, and 21 1040-related forms for tax year 2009. The remaining 1040-related forms that are filed under the current e-File system are scheduled to be added for tax year 2011. In addition, forms that are currently in production and that can be filed with either individual tax returns or business returns will be updated if they contained 1040-only elements that were not opened previously. These line items would have appeared in the schemas as comments only.
- Section 1.4.2 Perfection Period for Rejected Submissions - The perfection period for retransmitting rejected business returns changes from 20 days to 10 days in processing year 2010. Information for individual returns added to this section.
- Section 2.1.2 Submission Size - Recommendation added that chunking be used for transmitting returns larger than 50 MB.
- Form 1040 filers can elect to use all or part of their refund to buy U.S. Savings Bonds (Series I). The Form 8888 instructions identify the specific routing number and account number designated for buying bonds. More information can be found on [IRS.gov](http://irs.gov).
- Electronic Filing PIN (Help) application has been added to [IRS.gov](http://irs.gov) for Form 1040 and 4868 online filers. Taxpayers who cannot locate their prior year Adjusted Gross Income (AGI) or prior year PIN can use this application to receive a 5 digit filing PIN to be used to verify their identity when electronically filing their 2009 tax return.
- Diplomatic Post Office (DPO) is added to the Standard Postal Abbreviations and Zip Code list posted on the [MeF User Guides and Publications](#) Web page.
- SSN was added as an optional element to the IRS Submission Manifest for individual submissions.
- Primary SSN, Spouse SSN, Primary Name Control and Spouse Name Control were added as optional elements to the State Submission Manifest for individual submissions.

- The literal “UNKNOWN” is returned in the acknowledgement when the return type or category can’t be determined. This is not a valid enumeration for Processing Year 2010 but will be included as a valid enumeration in Processing Year 2011. If the software performs schema validation on the acknowledgement, it must account for “UNKNOWN”.
- The link to the Due Date table for MeF forms has been moved to Exhibit 8 in this Publication

### **1.3.2 New Functionality and Forms**

- XML schemas were developed and issued for the following forms that can be e-filed through the MeF system. The Return Data for each parent form (1040, 1120, 1120-F, 1120S, 1065, 990, 720, etc) will list these forms if they are applicable:
  - Form 1040, U.S. Individual Income Tax Return
  - Form 4868, Application for Automatic Extension of Time to File U.S. Individual Income Tax Return
  - Schedule A (Form 1040), Itemized Deductions
  - Schedule B (Form 1040), Interest and Ordinary Dividends
  - Schedule C (Form 1040), Profit or Loss From Business
  - Schedule D (Form 1040), Capital Gains and Losses
  - Schedule E (Form 1040), Supplemental Income and Loss
  - Schedule EIC (Form 1040), Earned Income Credit
  - Schedule M (Form 1040), Making Work Pay And Government Retiree Credits
  - Schedule R (Form 1040), Credit for the Elderly or Disabled
  - Schedule SE (Form 1040), Self-Employment Tax
  - Form 1099-R, Distributions Form Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.
  - Form 2106, Employee Business Expenses
  - Form 2210, Underpayment of Estimated Tax by Individuals, Estates, and Trusts
  - Form 2441, Child and Dependent Care Expenses
  - Form 8812, Additional Child Tax Credit
  - Form 8829, Expenses for Business Use Of Your Home
  - Form 8863, Education Credits (Hope and Lifetime Learning Credits)
  - Form 8880, Credit for Qualified Retirement Savings Contributions
  - Form 8888, Direct Deposit of Refund to More Than One Account
  - Form W-2, Wage and Tax Statement

- Schedule G (Form 1120), Information on Certain Persons Owning the Corporation's Stock
- Schedule K (Form 1118), Foreign Tax Carryover Reconciliation Schedule
- Schedule B-1 (Form 1065), Information on Partners Owning 50% or More of the Partnership
- The Amended Return checkbox and VIN correction checkbox was added to Form 2290.
- All Form 8849 schedules are available to be electronically filed through MeF.
- Form 1120-F will have a separate set of Business Rules for Tax Year 2009 Amended Returns
- The Form 1120-F acknowledgment will return amounts for taxable income and total tax.
- Form 8926, Disqualified Corporate Interest Expense Disallowed Under Section 163(j) and Related Information will not have an XML schema created in processing year 2010 but can be accepted as PDF
- The MeF Program will be using JAXP as the parser for processing year 2010. Based on this change, all maximum occurrences in schemas greater than "100" have been changed to "unbounded."
- The element "SpecialConditionDescription" was added to all MeF parent forms to identify situations that may affect e-filing during the processing year, such as natural disasters, changes to late legislation, recent Revenue Procedures, etc., without having to update schemas with specific literals. MeF will issue Quick Alerts and post information to IRS.gov when the SpecialConditionDescription should be used.
- Instructions on which URL to use for ATS from 11/02/2009 through 01/03/2010 are provided in [Section 4.1.7 General Information and Lessons Learned](#).

## 1.4 General Information about MeF

MeF accepts the following form types:

- Individual (Form 1040)
- Corporations (Forms 1120, 1120-F and 1120S)
- Exempt Organizations (Forms 990, 990-EZ, 990-N, 990-PF, and 1120-POL)
- Partnerships (Forms 1065 and 1065-B)
- Excise Tax (Forms 720, 2290 and 8849)
- Extensions (Forms 4868, 7004 and 8868)

The list of TY2009 Forms and Schedules for each form can be found on the [MeF User Guide and Publication page](#) on IRS.gov.

### **1.4.1 Current and prior 2 tax years are accepted**

When a new tax form type is added to the MeF platform, tax returns will be accepted for the first processing year only. For example:

Form 1040 is being added in processing year 2010 for Tax Year (TY) 2009. MeF will only accept TY2009 returns for Form 1040 in processing year 2010.

The second year that a new form is accepted, MeF will accept two tax years: the current tax year and the first tax year the form was accepted on the MeF platform. For example:

In processing year 2011, MeF will accept TY2009 and TY2010 returns for Form 1040. The third year that a new form is accepted, MeF will accept three tax years: the current tax year and the first two tax years the form was accepted on the MeF platform. For example:

In processing year 2012, MeF will accept TY2009, TY2010 and TY2011 returns for Form 1040.

As subsequent tax years are added to the system, MeF will accept the current year and two prior tax years. Tax years beyond the two prior years can no longer be filed through MeF. For example, the first year Form 1120 was accepted in Production was TY 2005.

In processing year 2010, MeF will accept Form 1120 returns for TY2009, TY2008 and TY2007. Tax years 2005 and 2006 can no longer be filed through MeF.

### **1.4.2 Perfection Periods for Rejected Submissions**

When a transmitted electronic business return is rejected in processing year 2010, there is a 10-day Transmission Perfection Period to perfect that return for electronic re-transmission. When a previously rejected electronic return is "Accepted" by the IRS within the 10-day Transmission Perfection Period, it will be deemed to have been received on the date of the first reject that occurred within that 10-day period. The transmission perfection period for business returns transmitted in processing year 2009 and earlier was 20 days. Publication 4163 has detailed perfection period information for MeF business returns.

The transmission perfection period for an extension to file a business return, Form 7004 or 8868, is 5 days.

The following transmission dates pertain to individual returns and extensions:

- April 20, 2010 – Last day for retransmitting rejected timely filed Form 1040 returns and/or Form 4868 extensions.
- June 20, 2010 – Last day for retransmitting rejected timely filed Form 1040 returns and/or Form 4868 extensions to meet overseas exception.
- October 20, 2010 – Last day for retransmitting rejected timely filed Form 1040 returns on extension from Form 4868.

See Publication 1345 for additional information on transmission timeframes for individual returns/extensions.

### 1.4.3 Electronic Postmark

A Transmitter may provide an electronic postmark to taxpayers that file Tax Returns and Extensions of Time to File Tax Returns, through an ERO or through an Online Provider (Online Filing).

**The Transmitter creates the electronic postmark bearing the date and time, GMT time format, (in the Transmitter's time zone) that the return is received at the Transmitter's host computer.**

The electronic postmark must be adjusted to the time zone where the taxpayer resides to determine the postmark's actual time.

For example, if the Transmitter provides an electronic postmark with a time in the Pacific Time Zone but the taxpayer resides in the Eastern Time Zone, the taxpayer must add three hours to the postmark time to determine the actual postmark time (Eastern Time Zone).

Conversely, if the Transmitter provides an electronic postmark with a time in the Eastern Time Zone but the taxpayer resides in the Pacific Time Zone, the taxpayer must subtract three hours to the postmark time to determine the actual postmark time (Pacific Time Zone).

If an electronic postmark is created on or before a prescribed deadline for filing but the return is received by the IRS after the prescribed filing deadline, the return will be treated as filed on the electronic postmark date if received within two (2) days of the electronic postmark. In order for a return to be treated as filed on the electronic postmark's date, all requirements for signing the return must be met. If a return is rejected, a corrected return must be filed in accordance with the rules for timely filing corrected returns after rejection of an electronic return.

### 1.4.4 Transmission timeframe affected by routine maintenance

A routine maintenance window is generally scheduled on Sunday from 1:00 am to 7:00 am, Eastern Time. This process may result in intermittent down time for transmitters. Work scheduled during this window will generally not be communicated to the software developers. For more information about system status and possible delays, refer to the Modernized e-File Status page on IRS.gov at: <http://www.irs.gov/efile/article/0,,id=168537,00.html>

### 1.4.5 SubmissionIds in Transmission Manifest and Attachment Mismatch

MeF will process a transmission with a count mismatch between the manifest and attachment in the following manner:

1. The transmission is accepted and a receipt is returned to the transmitter. The receipt contains the SubmissionIds listed in the transmission manifest (SOAP body).
2. The transmitter will receive a reject acknowledgement when a SubmissionId indicated in the manifest is not in the attachment:

Business Rule X0000-010 - For each SubmissionID provided in the transmission manifest there must be a submission zip archive entry present in the Attachment Zip file whose name (without the ".zip" extension) matches the SubmissionID

3. Submissions in the attachment that are not in the manifest are deleted from the system. No acknowledgement is generated or returned to the transmitter for these submissions; however, MeF will keep a record of the deletion.

Due to the above process, Business Rule T0000-003 will be deleted for processing year 2010:

The number of returns indicated in the transmission manifest must equal the number of returns included in the transmission file.

### 1.4.6 SubmissionType in the IRS Submission Manifest

The SubmissionType element in the IRS Submission Manifest must match the Return Type in the Return Header (Business Rule R0000-051). The values are not enumerated in SubmissionType because this element is also used in the State Manifest and the values for the states are state-specific. The Return Header lists the values for each form's Return Type:

Return Header file	Values for Return Type & IRS SubmissionType
ReturnHeader720.xsd	720
ReturnHeader990x.xsd	990, 990EZ, 990PF
ReturnHeader990N.xsd	990N
ReturnHeader1040.xsd	1040
ReturnHeader1065x.xsd	1065, 1065B
ReturnHeader1120x.xsd	1120, 1120S, 1120F
ReturnHeader1120POL.xsd	1120POL
ReturnHeader2290.xsd	2290
ReturnHeader4868.xsd	4868
ReturnHeader7004.xsd	7004
ReturnHeader8849.xsd	8849
ReturnHeader8868.xsd	8868

### **1.4.7 Short period returns for partnerships or corporations**

MeF accepts short period returns for partnerships or corporations. There are situations where a taxpayer may need to file a short period return before software is ready for the next tax year. For instance, at the beginning of calendar year 2009, a taxpayer may need to file a short period TY2009 return with Tax Period Beginning Date 01/01/2009 and Tax Period Ending Date 01/31/2009. This return should be filed on TY2009 software but the TY2009 software has not been developed yet. In this case, the taxpayer may use TY2008 software.

When a taxpayer needs to file a short period return, ensure that the tax year in the Return Manifest and Return Header reflect the tax year of the schemas being used. Enter the actual beginning and ending date of the short period return. For example, the short period return described above will be e-filed using the TY2008 software and include these entries:

- “2008” for the tax year in the Return Manifest
- “2008” for the tax year in the Return Header
- “01/01/2009” for the Tax Period Beginning Date
- “01/31/2009” for the Tax Period Ending Date

In some cases, when a short period return is being filed the regulations require the taxpayer to attach Form 1128 or an explanation why the short period return is being filed. If you use the Form 1128, attach it to the top level of the return as a PDF file and describe it as “Form 1128 for Short Period Return.” Use the ShortPeriodReason1120SInd or ShortPeriodReason11201120FInd fields to provide the regulatory citation or reason for the Short Period return. See Publication 4163 for more information.

### **1.4.8 Taxpayers required to e-file original and amended returns.**

IRS requires that certain taxpayers file their returns electronically:

- Forms 1065/1065-B – Section 1224, of the Taxpayer Relief Act of 1997, requires partnerships with more than 100 partners (Schedules K-1) to file their return on magnetic media (electronically as prescribed by the IRS Commissioner). This law became effective for partnership returns with taxable years ending on or after December 31, 2000. Announcement 2002-3 excluded fiscal year filers from this requirement for tax year 2001 only.
- Forms 1120/1120S/1120-F - Treasury Decision (T.D.) 9363 requires corporations that have assets of \$10 million or more and file at least 250 returns annually to electronically file their Forms 1120 and 1120S for tax years ending on or after December 31, 2006. This requirement extends to foreign corporations filing Form 1120-F who have tax years ending on or after December 31, 2008, have assets of \$10 million or more and who file at least 250 returns annually.
- Form 990 – T.D. 9363 requires exempt organizations with \$10 million or more in total assets to electronically file their Form 990 if the organization files at least 250 returns in a calendar year, including income, excise, employment tax and information returns for tax years ending on or after December 31, 2006.

- Form 990-PF – T.D. 9363 requires private foundations and non-exempt charitable trusts to file Form 990-PF electronically regardless of their asset size, if they file at least 250 returns annually for tax years ending on or after December 31, 2006.
- Form 990-N (e-Postcard) - Section 6033(i)(1) of the Protection Act of 2006, Public Law 109– 208, 120 Stat. 1090 (2006) (PPA 2006), and T.D. 9454 requires that, effective for tax periods beginning after 2006, every organization exempt from taxation under section 501(a) that is not required to file a return described in § 1.6033– 2(a)(2), other than an organization described in section 401(a) or 501(d), shall submit annually, an electronic notification to the IRS. The notification will provide evidence of the continuing basis for the organization’s exemption from the filing requirements under section 6033(a)(1).
- Form 2290 – The American Jobs Creation Act requires taxpayers who register 25 or more vehicles for any taxable period to electronically file their Form 2290 tax return. Though this requirement became effective July 1, 2005, excise e-file was not available until August 2007.

The IRS developed special guidance to assist corporations, partnerships and exempt organizations with the transition from filing a paper return to electronic filing.

This guidance applies to corporations and exempt organizations required to e-file under final regulations (T.D. 9363, 12-03-2007). The directions to e-file are provided by tax year. Use TY2009 *Directions to e-file* when filing a TY2009 return. Fiscal year filers submitting TY2008 returns on TY2008 schemas may use TY2008 *Directions to e-file*.

Corporations, partnerships, exempt organizations and Form 2290 filers required to e-file should review the information available on IRS.gov at the following links:

- For corporations the link is:  
<http://www.irs.gov/businesses/corporations/article/0,,id=146959,00.html>
- For partnerships the link is: <http://www.irs.gov/efile/article/0,,id=200526,00.html>
- For exempt organizations the link is:  
<http://www.irs.gov/efile/article/0,,id=108211,00.html>
- For Form 2290 filers the link is:  
<http://www.irs.gov/efile/article/0,,id=170570,00.html>

#### **1.4.9 VIN (Vehicle Identification Number) for Form 2290**

IRS has developed a VIN (Vehicle Identification Number) data store, which collects VIN data from Form 2290. If the taxpayer has indicated consent, the VIN data will be shared with state registration agencies to verify that the Heavy Vehicle Use Tax (HVUT) obligation was paid for a vehicle. This publication will be updated when the process for sharing the VIN data store has been implemented.

## 1.5 Amended Returns and Superseding Returns

The MeF system processes both superseding and amended returns for certain forms. A **superseded return** is a subsequent return **filed within the filing period (including extensions)**. An **amended return** is a subsequent return **filed after the expiration of the filing period (including extensions)**.

IRS has issued final regulations (T.D. 9363) requiring electronic filing of corporate returns (1120, 1120-F and 1120S) and exempt organization returns (990 series). **Both amended and superseding returns are required to be e-filed** if the taxpayer is required to file electronically, unless a taxpayer has received an approved waiver to file that particular return in paper. Section 1224 of the Taxpayer Relief Act of 1997 provides the e-filing requirements for partnership returns.

**Note:** For TY2008, corporate amended returns with carryback claims may be e-filed as long as the carryback claim box is checked. Corporate amended returns with carryback claims prior to TY2008 are exempt from the e-file requirement and should be filed using the existing paper process.

### 1.5.1 Superseding Returns

The superseding return designation is available for Forms 1120, 1120-F, 1120S, 1065 and 1065-B.

The superseding return designation is not available for Forms 990, 990-EZ, 990-PF, 1040, 1120-POL, and 2290. The amended return box must be checked for any subsequent Forms 990, 990-EZ, 990-PF or 1120-POL returns to be accepted.

### 1.5.2 Amended Corporate Returns Forms 1120, 1120-F and 1120S

MeF can accept amended returns for Forms 1120-F for tax years 2007 and forward.

Amended returns for Forms 1120, 1120-F and 1120S require at a minimum:

- The corrected Form 1120, 1120-F or 1120S completed in its entirety (pages 1 – 4) with the Amended Return checkbox selected.
- All forms, schedules and attachments that changed or that support changes on the amended Form 1120, 1120-F or 1120S, including any subsidiary returns (if changed) and the information to support those changes.
- For Form 1120, attach to the amended Form 1120:
  - the XML Form 1120X completed through Part I, line 10 or 11, as applicable, and Part II with the line number of each amended item
  - the corrected amount or treatment of the item

- an explanation of the reasons for each change
- For Form 1120S, attach to the amended Form 1120S the XML document, AmendedReturnChanges, that identifies:
  - the line number of each amended item
  - description of each amended item
  - the amount on the previous return
  - the amount on the amended return
  - an explanation of the reasons for each change
- For Form 1120-F, attach to the amended Form 1120-F the XML document, AmendedReturnChanges, that identifies:
  - the line number of each amended item
  - description of each amended item
  - the amount on the previous return
  - the amount on the amended return
  - an explanation of the reasons for each change
- A signed signature document (Form 8453-C/S/I), as applicable, or use of a Practitioner's Pin.
- Appropriate forms to make a payment, request a refund, or request a credit carryover to another year.

For more information on corporate amended returns, please refer to the following Web page on IRS.gov: <http://www.irs.gov/businesses/corporations/article/0,,id=146959,00.html>

### **1.5.3 Amended Partnership, Exempt Organization, Excise Tax and Individual Returns**

MeF can accept e-filed amended returns for Forms 1065, 1065-B, 990, 990-EZ, 990-PF, 1120-POL and Form 2290.

The amended return for the Form 720 (Form 720X) and Form 1040 (1040X) must be filed using the existing paper procedures for processing year 2010.

MeF can accept multiple Forms 2290 for the same tax period. An amended return for Form 2290 is filed when there is a change to "Additional Tax From Increase in Taxable Gross Weight " or "Suspended Vehicles Exceeding the Mileage Use Limit". When an amended return is filed for Form 2290, the amended return box should be checked.

For additional Partnership information, please refer to [the MeF for Partnership page on IRS.gov](#).

## 1.6 Exclusions to Electronic Filing

Returns and extensions meeting the conditions below cannot currently be filed electronically. (Note: Paper documents can be scanned and attached to electronic returns, but no paper documents will be accepted. See [Section 2.2.5 Form 1040 Paper Document Indicator](#) for Form 1040 exception.)

### 1.6.1 Forms 1120/1120S Exclusions:

The tax year 2009 MeF Program does not accept and process the following corporate returns. Therefore, the corporation is excluded from the electronic filing requirement under Temporary Treasury Regulation Section 301.6011-5T unless otherwise noted.

- Returns with tax periods ending prior to December 2007
- Returns covering multiple tax periods
- Bank Holding Company Tax Act - Election to make installment payments for a portion of the total tax attributable to the Bank Holding Company Tax Act
- Prompt Assessments
- Returns with reasonable cause as related to failing to pay and/or file timely

Corporations who meet the Treasury Decision (T.D.) 9363, 2007-49 Internal Revenue Bulletin [I.R.B.] 1084 criteria are still required to e-file their return. In order to comply with the mandatory e-file regulations, corporations must send the explanation of reasonable cause as a separate letter to:

Internal Revenue Service  
ARKA Monterrey Park  
1973 N. Rulon White Blvd  
Mail Stop 6552 (ARKA)  
Attn: AM Clerical  
Ogden, Utah 84404.

These procedures do not apply to Form 2220, which should be filed as part of the electronic return.

- Returns with pre-computed penalty and interest

Corporations who meet the Treasury Decision (T.D.) 9363, 2007-49 Internal Revenue Bulletin [I.R.B.] 1084 criteria are still required to e-file their TY2008 return. In order to comply with the mandatory e-file regulations, corporations must send the explanation of pre-computed penalty and interest as a separate letter to:

Internal Revenue Service  
ARKA Monterrey Park  
1973 N. Rulon White Blvd  
Mail Stop 6552 (ARKA)  
Attn: AM Clerical  
Ogden, Utah 84404.

- Requests for overpayments to be applied to another account

Corporations who meet the Treasury Decision (T.D.) 9363, 2007-49 Internal Revenue Bulletin [I.R.B.] 1084 criteria are still required to e-file their TY2008 return. In order to comply with the mandatory e-file regulations, corporations must send the request to apply overpayments as a separate letter to:

Internal Revenue Service  
ARKA Monterrey Park  
1973 N. Rulon White Blvd  
Mail Stop 6552 (ARKA)  
Attn: AM Clerical  
Ogden, Utah 84404.

The following 1120 family of forms cannot be filed electronically as a return at the parent level:

- 1120-L Life Insurance Company
- 1120-PC Property and Casualty

Corporations required to e-file who have 1120-L or 1120-PC subsidiary returns should refer to the specific tax year *Directions to e-file* for additional information at: <http://www.irs.gov/businesses/corporations/article/0,,id=146959,00.html>.

- 1120-C (formerly 990-C) Farmer's Cooperative Association
- 1120-H Homeowners Association
- 1120-FSC Foreign Sales Corporations
- 1120RIC Regulated Investment Companies
- 1120REIT Real Estate Investment Trust
- 1120-SF Settlement Funds
- 1120ND Nuclear Decommission Trusts
- 1120-IC-DISC Interest Charge Domestic International Sales

Forms 1120-C through 1120-IC-DISC listed above are only required to be e-filed if they are part of a consolidated return filing. If these forms are part of a consolidated return, they should be included in PDF format, named appropriately and attached to the top-return level. Otherwise, they must be filed on paper since MeF does not process them at this time.

- 1120X Amended Corporate Return

The Form 1120X cannot be filed as a stand-alone return. It can only be submitted as an attachment to a Form 1120 return. [See Section 1.7.2 Amended Corporate Returns Forms 1120, 1120-F and 1120S.](#)

### **1.6.2 Form 7004 Exclusions**

- Name change applications
- Reasonable cause for failing to pay timely
- Reasonable cause for failing to file application timely
- Requests for refunds
- Election to make installment payments for a portion of balance due amount
- Applications requesting extension due to change in accounting period unless prior approval has been applied for from IRS or certain conditions have been met. See Publication 538, Accounting Periods and Methods.
- Applications with Net Operating Loss Carryback - Form 1138 should be sent separately, not with the application.
- Applications attaching a Power of Attorney (POA). POA should be sent separately, not with the application.
- Early filed returns (filed before end of tax period)
- Filing short period extension due to termination of 1120S status
- Extensions for the following forms:
  - Form 706-GS(D)
  - Form 8612
  - Form 8613
  - Form 8725
  - Form 8831
  - Form 8876

### **1.6.3 Forms 990 & 990-EZ Exclusions**

- Returns from organizations not recognized as exempt (application pending, etc.)
- Name change returns
- Returns showing a change in accounting period
- Short period returns (except for short period final returns)
- Early filed returns (filed before end of tax year except for final returns)
- Returns with tax periods ending prior to December 2007

#### **1.6.4 e-Postcard Form 990-N Exclusions**

- Returns with tax periods prior to December 2007
- Returns from organization not recognized as exempt (application for exemption pending, etc.)
- Returns with attachments
- Organizations required to file Form 990, Form 990-EZ, Form 990-PF or Form 1120-POL
- Organizations included in a group return
- Section 509(a)(3) supporting organizations required to file form 990 or form 990-EZ  
**Note:** This filing requirement does not apply to churches, their integrated auxiliaries, and conventions or associations of churches.
- Short period returns (except for short period final returns).  
**Note:** Initial F990-N calendar filers should list their tax year beginning as January regardless of the actual first month of operation

#### **1.6.5 Form 990-PF Exclusions**

- Returns from organizations not recognized as exempt (application for exemption pending, etc.)
- Returns with tax periods ending prior to December 2007
- Foreign private foundations
- Name change returns
- *Limited* 990-PFs (*Limited* 990-PFs are filed by organizations that originally received advance rulings as public charities but were later determined to be private foundations)
- 507(b)(1)(A) terminations
- Foundations in 60-month terminations

#### **1.6.6 Form 1120-POL Exclusions**

- Short period returns (except for short period final returns)
- Name change returns
- Returns with tax periods ending prior to December 2007
- Returns with non-numbered attachments/schedules (unless allowed for an attached form shared with Forms 1120/1120S) for which an IRS format has not been developed

#### **1.6.7 Form 8868 Exclusions**

- Extensions from organizations not recognized as exempt (application pending, etc.)
- Extensions other than the automatic extension (Part I)
- Extensions for short period returns
- Extensions for the following forms:
  - Form 990-BL
  - Form 6069
  - Form 8870
- Extensions for group returns
- Extensions for composite Forms 990-T
- Extensions for consolidated Forms 990-T

### **1.6.8 Forms 1065/1065-B Exclusions**

- Returns with tax periods ending in December 2007 and prior
- Returns granted approved waivers from electronic filing.
- Common Trust Fund Returns

### **1.6.9 Excise Tax Forms 720, 2290 and 8849**

- Form 2290: no returns will be accepted for tax periods ending prior to July 1, 2007
- Form 720: no returns will be accepted prior to third quarter 2007

### **1.6.10 Form 1040**

- Returns with tax periods ending prior to December 2009
- Fiscal year returns
- Amended Returns

### **1.6.11 Form 4868**

- Returns with tax periods ending prior to December 2009
- Fiscal year returns

## 2 XML Overview for MeF

The IRS uses XML (Extensible Markup Language), the language that specifies the structure and content of an XML document, to implement all forms and schedules in electronic format for Modernized e-File. This section explains some of the elements of an XML document.

### 2.1 MeF XML Structure

Like a paper tax return, an MeF tax return consists of a series of tax forms, schedules, and attachments that can be submitted for a specific type of tax return (1040, 1120, 1120-F, 1120S, 1120-POL, 1065, 1065-B, 990, 990-EZ, 990-N, 990-PF, 720, 2290, or 8849), or extension (4868, 7004 or 8868).

For example, an 1120 submission includes Form 1120 and any attached forms, schedules, or attachments needed to file a complete return. A consolidated structure includes the consolidated return, the parent return, and one or more subsidiary returns in addition to their respective forms, attachments, and schedules. A mixed consolidated return provides the structure to file a consolidated return with 1120-L and/or 1120-PC sub-consolidations.

For more information on how to compose Submissions and Transmission Files sent to IRS for processing using the Modernized e-File System, refer to the MeF Submission Composition Guide posted to IRS.gov at: <http://www.irs.gov/efile/article/0,,id=171946,00.html>

#### 2.1.1 Schemas

IRS has structured tax return data into a series of schemas. A schema is an XML document that specifies the data elements, structure and rules for each form, schedule, document and/or attachment. In addition to formats defined by schemas, returns must also adhere to business rules, which provide a second level of validation for tax forms processed by MeF. [See Section 5.1 Business Rules](#) for more information.

Within the XML schema, data elements are the basic building blocks of an XML document. The schema recognizes two categories of element types: simple and complex. A simple type element contains only one data type and may only have documentation attributes, such as description or line number. A complex type element is an element that has one or more attributes or is the parent to one or more child elements.

In the schemas, IRS has declared most data elements for forms, schedules, and supporting data are optional. This is consistent with the way paper returns are filed. The taxpayer and return preparer have the responsibility to provide information as specified by IRS forms, instructions and regulations.

Most of the required elements are in the return header schema. For example, the 1120 return header schema (ReturnHeader1120x.xsd file) contains the identifying information for the entity filing the return and the name of the officer signing the return. The return header also contains optional information such as the preparer information and the preparing firm information.

### 2.1.2 Submission Size

The instance of a federal or state submission XML file cannot exceed 2 GB compressed. The maximum size of an individual PDF file attached to the submission is 60 MB uncompressed.

We recommend chunking for submissions greater than or equal to 50 MB; otherwise responses will take longer and you may timeout before receiving a response.

### 2.1.3 Tag Names

Each field on a tax form, document or attachment is identified using an XML tag name within the XML schema.

Tag names were created using the following conventions:

- a meaningful phrase with the first letter of each word capitalized and using no spaces (upper Camel case)
- a length of not more than 30 characters
- standard abbreviations to meet the tag name 30 character limit

### 2.1.4 Attributes

Attributes provide additional information or describe a feature of a data element.

- The first letter of the first word of an attribute name is lower case; the first letter of each subsequent word is capitalized (lower Camel case).
- Fixed attributes are for IRS internal use only; do not include these with the instance XML data for transmission.

Every return document (form, schedule or attachment), which has an XML schema, has the following three attributes in its root element.

- **documentName attribute** : An attribute of type FIXED (a string literal type) and has a value equal to the name of the form, schedule or a supporting document it represents. This attribute (wherever it occurs in the return) is used for IRS internal use only and must not be included in the tax return. However, after the return is received IRS XML parsers will add such attributes to the appropriate elements in the return for IRS downstream processing. Here is an example:

- In the XML data to be transmitted by the preparer:

```
<IRS1120 documentId="RetDoc010">
```

- After transmission, IRS XML parser will add:

```
<IRS1120 documentId="RetDoc010" documentName="IRS1120" displayName="1120">
```

- **documentId attribute:** An attribute that uniquely identifies the document within the context of the whole return. Tax return preparer's software is responsible for generating a unique id of IdType defined in efileTypes.xsd for each of the return documents.
- Here are some examples:
  - <IRS1120 documentId="DOC0001">
  - <IRS1120ScheduleD documentId="0020.2225">
  - <DualConsolidatedLossesStatement documentId="ABC:002.XY">
- **displayName attribute:** An attribute of type FIXED (a string literal type) and has a value equal to the display name of the form, schedule or a supporting document it represents.

This attribute (wherever it occurs in the return) is used for IRS internal use only and must not be included in the tax return. However, after the return is received, IRS XML parsers will add such attributes to the appropriate elements in the return for downstream processing. Here is an example:

- In the XML data to be transmitted by the preparer:

```
<IRS1120 documentId="RetDoc010">
```

- After transmission, IRS XML parser will add:

```
<IRS1120 documentId="RetDoc010" documentName="IRS1120" displayName="1120">
```

### 2.1.5 Repeating Group

A repeating group is a data element or a group of data elements that can repeat up to the number of times specified in the maxOccurs attribute. This provides a consistent structure through which MeF users can capture an unlimited amount of requested information. Paper forms are limited by a number of rows defined on the form, and paper filers may need to include attachments to a return to capture all requested information. For example:

Schedule D (Form 1120), Line 1 Short-Term Capital Gains and Losses, allows seven entries on the paper form. A paper filer would need to include an attachment if there are more than seven entries. In contrast, the corresponding MeF schema allows an unlimited number of entries within this repeating group of elements.

MeF schemas implement repeating groups by creating a form “type” that consists of data elements that can repeat the number of times specified in the “minOccurs” and “maxOccurs”.

The following figures illustrate a Form 8621 repeating group where DistriAndDisposOfStockType is the complex type that defines the content model for the repeating group:

```
<!-- Distributions and Disposition of Stock in a Section 1291 Fund -->
<xsd:element name="DistriAndDispositionOfStock" type="DistriAndDisposOfStockType" minOccurs="0" maxOccurs="unbounded">
  <xsd:annotation>
    <xsd:documentation>
      <Description>Distributions and disposition of stock in a Section 1291 fund</Description>
      <LineNumber>Part IV Lines 10a-11f</LineNumber>
    </xsd:documentation>
  </xsd:annotation>
</xsd:element>
```

Figure 2-1: Complex Type Identified for Repeating Group

```

<!-- Distribution and Disposition of Stock Type -->
<xsd:complexType name="DistriAndDisposOfStockType">
  <xsd:sequence>
    - <!-- Enter Your Total Distributions from the PFIC During the Current tax year -->
    <xsd:element name="TotalPFICDistriDuringCurrentTY" type="USAmountType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>
          <Description>Enter your total distributions from the PFIC during the current tax year</Description>
          <LineNumber>Part IV Line 10a</LineNumber>
        </xsd:documentation>
        </xsd:annotation>
      </xsd:element>
    - <!-- Enter the Total Distributions Made by the Company for Each of the 3 Years Preceding the Current tax year-->
    <xsd:element name="DistributionsIn3PrecedingTY" type="USAmountType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>
          <Description>Enter the total distributions made by the company for each of the 3 years preceding the current tax
            year</Description>
          <LineNumber>Part IV Line 10b</LineNumber>
        </xsd:documentation>
        </xsd:annotation>
      </xsd:element>
    - <!-- Divide Line 10b by 3 -->
    <xsd:element name="AvgDistribution3PrecedingTY" type="USAmountType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>
          <Description>Divide Line 10b by 3</Description>
          <LineNumber>Part IV Line 10c</LineNumber>
        </xsd:documentation>
        </xsd:annotation>
      </xsd:element>
    - <!-- Multiply Line 10c by 125% -->
    <xsd:element name="AverageDistri3PreviousTY125Pct" type="USAmountType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>
          <Description>Multiply Line 10c by 125%</Description>
          <LineNumber>Part IV Line 10d</LineNumber>
        </xsd:documentation>
        </xsd:annotation>
      </xsd:element>

    (Note: information for Lines 10e through 11d removed in this example for space purposes only)

    - <!-- Subtract Line 11d from Line 11c -->
    <xsd:element name="AggregateIncrLessForeignTaxCr" type="USAmountType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>
          <Description>Subtract Line 11d from Line 11c</Description>
          <LineNumber>Part IV Line 11e</LineNumber>
        </xsd:documentation>
        </xsd:annotation>
      </xsd:element>
    - <!-- Determine Interest on Each Net Increase in Tax Determined on Line 11e Using the Rates and Methods of Section 6621 -->
    <xsd:element name="InterestOnEachNetIncreaseInTax" type="USAmountType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>
          <Description>Determine interest on each net increase in tax determined on Line 11e using the rates and methods of
            Section 6621</Description>
          <LineNumber>Part IV Line 11f</LineNumber>
        </xsd:documentation>
        </xsd:annotation>
      </xsd:element>
    </xsd:sequence>
  </xsd:complexType>

```

Figure 2-2: Complex Type Defining Contents of Repeating Group

### 2.1.6 Choice Construct

The choice construct within an XML schema batches a group of data elements between choice tags and only allows one of the data elements to be provided in an instance. Figure 2-3 below illustrates an optional choice. In this choice, the address may be present or not, but if it is present, then either USAddress or ForeignAddress must be used.

```
<xsd:choice minOccurs="0">
  <xsd:element name="USAddress" type="USAddressType"/>
  <xsd:element name="ForeignAddress" type="ForeignAddressType"/>
</xsd:choice>
```

Figure 2-3: Optional Choice

Figure 2-4 below illustrates a required choice. In this XML instance, one of the elements (either SSN or EIN) must be present.

```
- <xsd:choice>
-   - <!-- Employer Identification Number -->
-   <xsd:element name="EmployerIdentificationNumber" type="EINType">
-   <xsd:annotation>
-   <xsd:documentation>
-   <Description>Employer identification number</Description>
-   </xsd:documentation>
-   </xsd:annotation>
-   </xsd:element>
-   - <!-- Social Security Number -->
-   <xsd:element name="SocialSecurityNumber" type="SSNType">
-   <xsd:annotation>
-   <xsd:documentation>
-   <Description>Social security number</Description>
-   </xsd:documentation>
-   </xsd:annotation>
-   </xsd:element>
- </xsd:choice>
```

Figure 2-4: Required Choice

### 2.1.7 e-file Types

E-file types are IRS defined data types, which can be used in more than one MeF schema and are stable and universal in nature. E-file types define the rule(s) for each of the data elements and may include length and character restrictions and the range of acceptable data. The data types are specified in and validated against the efileTypes.xsd document included in the MeF XML schema package. The IRS is committed to standardizing elements whenever possible.

The following examples illustrate MeF e-file types defined in the efileTypes.xsd XML document. For a complete list of e-file types go to IRS.gov and visit the Web page that hosts the Current Valid XML Schemas for the appropriate return type (included in the Return Schema package).

- **Address:** MeF standardized addresses with the USAddressType e-file type and foreign addresses with ForeignAddressType. All the data elements in these e-file types are required except for data element AddressLine2. Additional e-file types, OtherUSAddressType and OtherForeignAddressType, were added for situations where no elements are required. These e-file types contain only optional elements.

The **USAddressType** (Figure 2-5) has the following data elements:

- AddressLine1, which is a required field if the address field is present
- AddressLine2, which is optional
- City, which is a required field if the address field is present
- State, which is a required field if the address field is present
- ZIPCode, which is a required field if the address field is present

```
<xsd:complexType name="USAddressType">
  <xsd:sequence>
    <xsd:element name="AddressLine1" type="StreetAddressType">
      <xsd:annotation>
        <xsd:documentation>Address line 1</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="AddressLine2" type="StreetAddressType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>Address line 2</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="City" type="CityType">
      <xsd:annotation>
        <xsd:documentation>City</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="State" type="StateType">
      <xsd:annotation>
        <xsd:documentation>State</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="ZIPCode" type="ZIPCodeType">
      <xsd:annotation>
        <xsd:documentation>ZIP code</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

Figure 2-5: USAddress e-file type

**Note:** If any data element within the complex element is present, then all of the required fields must be present.

The **OtherUSAddressType** (Figure 2-6) has the same elements as USAddress type; however, all the data elements are optional:

- AddressLine1, which is optional
- AddressLine2, which is optional
- City, which is optional
- State, which is optional
- ZIPCode, which is optional

```
<xsd:complexType name="OtherUSAddressType">
  <xsd:sequence>
    <xsd:element name="AddressLine1" type="StreetAddressType">
      <xsd:annotation>
        <xsd:documentation>Address line 1</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="AddressLine2" type="StreetAddressType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>Address line 2</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="City" type="CityType">
      <xsd:annotation>
        <xsd:documentation>City</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="State" type="StateType">
      <xsd:annotation>
        <xsd:documentation>State</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="ZIPCode" type="ZIPCodeType">
      <xsd:annotation>
        <xsd:documentation>ZIP code</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

Figure 2-6: OtherUSAddress e-file type

- **Business Name Control:** Special characters in the Name Control must be encoded correctly. Refer to the Note under Text Type section on page 31 for additional information on encoding special characters. For more information on creating a business name control, refer to [Exhibit 1](#).

```
<xsd:simpleType name="BusinessNameControlType">
  <xsd:annotation>
    <xsd:documentation>Used for a Name Control. Legal Characters: A-Z, 0-9, hyphen and
      ampersand. Illegal Character: spaces and symbols.</xsd:documentation>
  </xsd:annotation>
  <xsd:restriction base="xsd:string">
    <xsd:pattern value="([A-Z0-9\-\&#x26;]){1,4}" />
  </xsd:restriction>
</xsd:simpleType>
```

Figure 2-7: BusinessNameControlType e-file type

- **Person Name Control:** The Person Name control only allows characters A-Z, hyphen and space. The first character must be a letter from A-Z.

```
<xsd:simpleType name="PersonNameControlType">
  <xsd:annotation>
    <xsd:documentation>Used for a Name Control. Legal Characters: A-Z, hyphen and space. Illegal
      Character: numbers and symbols.</xsd:documentation>
  </xsd:annotation>
  <xsd:restriction base="xsd:string">
    <xsd:pattern value="[A-Z][A-Z\ -]{0,3}" />
  </xsd:restriction>
</xsd:simpleType>
```

Figure 2-8: PersonNameControlType e-file type

- **Business Name:** MeF standardized the business name with the BusinessNameType. It includes the following data elements:
  - BusinessNameLine1, which is a required field if the business name is present
  - BusinessNameLine2, which is optional

```
<xsd:complexType name="BusinessNameType">
  <xsd:sequence>
    <xsd:element name="BusinessNameLine1" type="BusinessNameLine1Type">
      <xsd:annotation>
        <xsd:documentation>Business name line 1</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="BusinessNameLine2" type="BusinessNameLine2Type" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>Business name line 2</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

Figure 2-9 BusinessNameType e-file type

- **Person Name and Person Full Name:** MeF provides different e-file types for a person's name such as: `PersonNameType` and `PersonFullNameType`

**PersonNameType** allows 35 characters total for the first and last name.

```
<xsd:simpleType name="PersonNameType">
  <xsd:annotation>
    <xsd:documentation>Typically used for a person's name. Legal Characters: A-Z, a-z, 0-9,
    hyphen, apostrophe and single space. Illegal Character: leading space, trailing space, adjacent spaces, and other
    symbols.</xsd:documentation>
  </xsd:annotation>
  <xsd:restriction base="xsd:string">
    <xsd:maxLength value="35" />
    <xsd:pattern value="([A-Za-z0-9\-\- ] ?)*[A-Za-z0-9\-\-]" />
  </xsd:restriction>
</xsd:simpleType>
```

Figure 2-10: `PersonNameType` e-file type

**PersonFullNameType** is a complex type, which includes `PersonFirstNameType` and `PersonLastNameType`. Each of these e-file types allows for 20 characters.

```
<xsd:complexType name="PersonFullNameType">
  <xsd:sequence>
    <xsd:element name="PersonFirstName" type="PersonFirstNameType">
      <xsd:annotation>
        <xsd:documentation>Person First Name</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="PersonLastName" type="PersonLastNameType" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation>Person Last Name</xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

Figure 2-11: `PersonFullNameType` e-file type

- **IdType:** MeF standardized identifiers using the `IdType` data type. Below is just one type of identifier, others include `TransmissionId`, `MessageId`, etc. (see [Exhibit 4 Identifiers](#))

```
:simpleType name="IdType">
  d:annotation>
  d:documentation>Pattern used for generating TransmissionId, OriginId, ItemId, and
  AcknowledgementId. A timestamp may be used as an ID as long as it is unique within its parent
  element and within the filing season. Up to 4-decimal fractional digits may be used for the second in
  a timestamp to increase its uniqueness. Legal Characters: A-Z, a-z, 0-9, colon, period and
  hyphen.</xsd:documentation>
</xsd:annotation>
  d:restriction base="xsd:string">
  d:pattern value="[A-Za-z0-9:\-]{1,30}" />
</xsd:restriction>
</xsd:simpleType>
```

Figure 2-12: `IdType` e-file type

- **Text Type:** As a general rule, the allowable characters in a field defined as TextType include printable characters, symbols, Spanish characters (shown below), and the single space used within a phrase. Leading spaces, (spaces before the beginning of the phrase), extra spaces (double or more) and trailing spaces (spaces after the end of the phrase) are never allowed. They will cause the schema validation for that field to fail. Additionally, some TextType fields are defined with restrictions and will only allow a subset of these characters to be used (for example, All Numeric, All Positive Numbers, etc.).

!, ", #, \$, %, &, ' (, ), \*, +, ,, -, ., /, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, :, ;, <, =, >, ?, @, A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, [, \, ], ^, \_ ` a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z, {, |, }, ~, ¡, ¢, £, ¤, ¥, ¦, §, ¨, ©, ª, «, ¬, ®, ¯, °, ±, ², ³, ´, µ, ¶, ·, ¸, ¹, º, » ¼, ½, ¾, ¿, Á, Ê, Ë, Ì, Ñ, Ó, ×, Ú, Û, á, é, í, ñ, ó, ú, ü.

**Note:** Special characters are allowed but they must be encoded correctly by the software used. If the following special characters are used by the transmitter, the software will need to encode the XML special characters as such:

- `<` is encoded as `&lt;`                      `"<"` becomes `"&lt;"`
- `>` is encoded as `&gt;`                      `">"` becomes `"&gt;"`
- `&` is encoded as `&amp;`                      `"&"` becomes `"&amp;"`
- `"` is encoded as `&quot;`                      the quote mark becomes `'&quot;'` (if you are using `quote()` to delimit the attribute value)
- a single space is encoded as `&nbsp;`
- `'` is encoded as `&apos;`                      the apostrophe becomes `"&apos;"` (if you are using `apostrophe()` to delimit the attribute value)
- `§` is encoded as `&sect;`                      `"§"` becomes `"&sect;"`

## 2.1.8 Optional Choice for e-file Types with Required Fields

Section 2.1.6 of this publication explained the Optional Choice and Required Choice constructs. In Figure 2-3 (repeated below), the option of USAddress or ForeignAddress was illustrated.

```
<xsd:choice minOccurs="0">  
  <xsd:element name="USAddress" type="USAddressType"/>  
  <xsd:element name="ForeignAddress" type="ForeignAddressType"/>  
</xsd:choice>
```

If an optional choice is selected, the e-file type will determine which fields are optional and which are required. For example:

The schema for Line F of Schedule K-1 (Form 1065), has an optional choice of USAddress or ForeignAddress. If USAddress is selected, then the e-file type (in this case “USAddressType”) will determine which fields are optional or required.

As shown in Section 2.1.6, the following fields in e-file type “USAddressType” are required:

- AddressLine1
- City
- State
- Zip Code

If an entry is made in any of the fields for USAddressType, then all the required fields above must have an entry or the return will reject. Although the choice to select either USAddress or Foreign Address is optional, once the taxpayer populates a USAddress or ForeignAddress, the respective e-file types will determine which fields are optional or required.

## 2.1.9 Attachments to Corporate Returns, Partnership Returns, Excise Tax Returns, Individual Returns and Extensions

Taxpayers are instructed to attach supporting information to the tax return. This includes tax forms, statements, elections, notices, schedules or other types of miscellaneous information that IRS identifies in the form instructions, regulations or publications. These “attachments” may be submitted electronically as XML documents or binary files.

When IRS defines a schema for information that is requested, the information must be provided in XML format. The schemas include:

- Tax forms (Form 6478, Form 5884, etc). Data elements have been defined for the schemas.

- Information requested on tax forms instructions to support specific lines (such as, ItemizedOtherIncomeSchedule, DualConsolidatedLossesStatement, etc.). In some cases, the schema provides specific data elements and in other cases the schema allows for entry of a specific number of characters or text to provide an explanation or description.
- Information requested by regulations or publications, which is not specified in form instructions and IRS has not provided a predefined schema. In this case, and for all other information requested that does not have a specified schema, use the General Dependency schema.

A list of all supporting information required by form or form instructions is provided for the 1120 form family and Form 1040. This list includes the XML document name and location reference to assist the software developer in programming this functionality. These listings can be found on the respective forms schema pages and the [MeF User Guide and Publications page](#).

See [Section 2.7 Special Instructions for Consolidated Returns](#) for information on attaching data to consolidated returns.

### 2.1.10 General Dependency

As explained above, the General Dependency was created to allow for the submission of information that is not specified in a predefined schema. Beginning in Processing Year 2010, there will be three General Dependencies:

- “GeneralDependency”, available for Forms 1120, 1065 and 1065-B, is attached at the parent form level and allows for an explanation of up to 1 million characters (efile type is LongExplanationType).
- “GeneralDependencyMedium”, available for Forms 1040, 1120-F, 1120S, 720, 2290 and 8849, is attached at the parent form level and allows for an explanation of up to 100,000 characters (efile type is MediumExplanationType).
- “GeneralDependencySmall” is attached at the form or schedule level and allows for an explanation of up to 5,000 characters (efile type is TextType with maximum length 5,000 characters). The General DependencySmall is available for:

Form 851	Form 4562
Form 926	Form 4684
Form 1118	Form 5471
Form 1118AMT	Form 5713
Schedule M-3 (Form 1120)	Form 6765
Schedule M-3 (Form 1120L)	Form 8586
Schedule M-3 (Form 1120PC)	Form 8834
Schedule M-3 (Form 1120S)	Form 8865
Schedule M-3 (Form 1065)	Form 8886
Schedule K-1 (Form 1065)	
Form 4136	

Data elements for all three General Dependency schemas are:

- Name – choice between business name or person name (new for processing year 2010)
- TaxpayerIdentificationNumber – choice between EIN or SSN or MissingEIN
- FormLineOrInstructionReference –the form and/or line number to which the attachment belongs
- RegulationsReference – the regulation and/or publication reference
- Description – provide a meaningful title or explanation for the attachment
- AttachmentInformation – explanation regarding the attachment

IRS uses the Description as the title of the General Dependency when viewing the return. Below are some tips for composing the Description for any of the General Dependencies:

- The Description should be meaningful to the information provided.
- If the General Dependency is an Election, the Description should start with the word “Election”. For Example:
  - “Election to Amortize a Bond Premium”
  - “Election for 100% Dividends Received Deduction.”
- If multiple General Dependencies (of any size) are in one submission, the Description for each General Dependency should be unique.

If the data requested for either election or other information requires “columnar format,” these documents may be submitted in PDF format until the IRS provides a structure to support columnar format.

## **2.2 Binary Attachments (PDF file)**

The tax return may also include non-XML documents, known as “binary attachments,” submitted in PDF format. (Note: Currently, IRS only supports PDF format.) This allows taxpayers to provide requested documentation that may include required signatures and/or third party documents, such as Form 8453 series signature document, signed copy of lease, signed appraisal statement, etc. The Form 7004 allows binary attachments except for Form 8453. Binary attachments cannot be attached to Form 4868.

Note: In this section the signature document for business returns (8453-C, 8453-PE, etc) will be referred to as Form 8453 series. There is no signature document for individual returns and Form 8453 for individuals was redesigned as a transmittal document. Form 8453 for individuals should not be attached to the electronic submission.

### 2.2.1 Attach a PDF File

To attach a PDF file, perform the following steps:

1. **Create the PDF file** using any available tool. In creating a PDF file for the submission, it is important to adhere to the following guidance:

- Do not password protect or encrypt PDF attachments submitted through MeF.
- Keep binary attachments as small as possible. By exporting a document to create the PDF, it makes for a much smaller file than scanning one in. The IRS needs a readable PDF using any compatible software that creates a PDF file. If using Adobe Acrobat:
  - Avoid requiring compatibility with Adobe Acrobat versions earlier than version 8. Making the PDF file compatible with earlier versions will increase the size of the file.
  - Move the compression/quality slider on the “Create PDF From Scanner” to higher compression to lower the size of the file when the source document is of adequate quality and from scanner input.
- Each individual uncompressed PDF cannot exceed 60 megabytes.
- Each PDF must start with %pdf- and end with %%EOF. The return will reject if the PDF is not properly formatted.

You can download the most recent free version of Adobe PDF using the following link: <http://www.adobe.com/products/acrobat/readstep2.html> - *Please note* that by clicking on this link, you will leave the IRS Web site and enter a privately owned Web site created, operated and maintained by a private business. The information that this private business collects and maintains as a result of your visit to its Web site may differ from the information that the IRS collects and maintains. (Please see the IRS Web site privacy and security notice for privacy protections IRS provides to Web site visitors.) By linking to this private business, the IRS is not endorsing its products, services, or privacy or security policies. We recommend you review the business's information collection policy or terms and conditions to fully understand what information is collected by this private business.

- The name of each PDF file cannot exceed 64 characters and should not include non-ASCII characters. If the PDF file name contains non-ASCII characters, the processing of the return is delayed.
2. **Create a “Binary Attachment XML document”** in the Submission data that describes the PDF file. One Binary Attachment XML document must be created for each binary attachment. There is one-to-one relationship between the PDF file and the Binary Attachment XML document that describes it.

To create the Binary Attachment XML document, provide the PDF file with a name, including the extension, in the “AttachmentLocation” element and a brief meaningful and unique description of the contents of the file in the “Description” element.

a. PDF File Name

The name of the PDF file must EXACTLY match the name provided in the “AttachmentLocation” element and is case sensitive. The schema for the Binary Attachment document is defined in the file named “BinaryAttachment.xsd”.

b. “Description” element in the Binary Attachment XML document

The “Description” element in the BinaryAttachment.xsd cannot exceed 128 characters. It is important to make this as meaningful as possible because the Description is what is displayed to the IRS User to identify the contents of the binary file.

Examples of meaningful descriptions for the “Description” element:

- Police Report
- Calculation Of Section 367 Tax And Interest

Examples of descriptions that are not meaningful for the “Description element”:

- Other
- Miscellaneous
- Form Attachment

**Note:** While it is possible that one PDF may be attached in more than one location, that condition is very rare. Do not simply attach a PDF to every location that allows a PDF. Attach a PDF only where it is needed as an attachment. There have been problems with the same binary files being attached at every location where a binary file can be attached. This causes virtual documents that can delay processing.

3. **Create references**, if any, from the element(s) to which the PDF file is “attached” to the “Binary Attachment XML document.”

- If the PDF file is to be attached to an element for a line, form, or schedule, create a reference from the element to the Binary Attachment XML document.

We recommend that PDF files be attached at the top-level return unless there is a reason it needs to be attached at a form level or to one of the GeneralDependency schemas. The reference is created from the element to the Binary Attachment XML document, not to the PDF file. If no reference is created to the Binary Attachment XML document, then the PDF file is considered to be “attached” to the Submission. Creating reference(s) to PDF files is needed when the IRS specifies the conditions under which the reference must be created, and the reference locations within return data where the reference must exist.

4. **Include the number of binary attachments in the submission** in the binaryAttachmentCount attribute, which is used to indicate the number of binary attachments in the return, of element ReturnHeader.

5. **Include the PDF file in the attachment folder** in the submission zip.

Like-kind binary attachments should be placed adjacent to each other in the submission data XML.

### 2.2.2 A Sample non-XML document attached to the Submission

Below is an example of a binary attachment, 8453 Signature Document, with a file name “8453SignatureDoc.pdf”, “attached” to a submission. To attach the document to a submission:

- include the PDF file in the Submission Zip Archive
- create a Binary Attachment XML Document that describes it in the Submission data
- do not reference the Binary Attachment XML Document within the Submission data

The Description element of the Binary Attachment XML document contains the description of the file while the AttachmentLocation element contains the name of the file. The file itself is packaged along with other files in the attachment folder in the submission zip.

```
<ReturnData>...
<BinaryAttachment documentId="SignatureDoc8453" softwareId="00000000" softwareVersion="String">
  <DocumentType>PDF</DocumentType>
  <Description>8453 Signature Document</Description>
  <AttachmentLocation>8453SignatureDoc.pdf</AttachmentLocation>
</BinaryAttachment>...
</ReturnData>
</Return>
```

Figure 2-9: Binary Attachment XML Document

### 2.2.3 A Sample non-XML document attached to a form

Below is an example of a PDF file that is attached to a submission. The attachment described as “Historic Structures circa 1880” is named “HistoricStruct1880.pdf” and attached to Form 1120.

When a PDF file needs to be attached to a submission, the BinaryAttachmentdocumentID created in the Binary Attachment XML Document (BinaryAttachmentdocumentId=“**PDFAttachment01**”, that describes the physical file) is also referenced within the submission using the referenceDocumentId attribute (**referenceDocumentId="PDFAttachment01"**). Only one instance of the physical PDF file is included in the Submission zip file.

```
<Return>
...
<ReturnData>
...
<IRS1120 documentId="DOC0001" referenceDocumentId="PDFAttachment01">
...
</IRS1120>
...
<BinaryAttachment documentId="PDFAttachment01" softwareId="00000000" softwareVersion="String">
  <DocumentType>PDF</DocumentType>
  <Description> Historic Structures circa 1880 </Description>
  <AttachmentLocation> HistoricStruct1880.pdf</AttachmentLocation>
</BinaryAttachment>
...
</ReturnData>
</Return>
```

← Reference to the Binary Attachment XML Document

← The PDF file itself is included in the Submission zip file along with other files that make up the Submission

Figure 2-10: PDF attached to top level of return

## 2.2.4 Names and Descriptions for PDFs

When naming certain PDF attachments, tax preparation software must use the following names because they will be validated by business rules.

CONDITION	Description
If you attach a scanned 8453, the Description must be	8453 Signature Document
If you attach a scanned 8838, the Description must be	8838 Signature Document
If you attach a scanned 2553, the Description must be	Form 2553
If you attach an art appraisal to Form 8283 and are filing an individual tax return (Form 1040), the Description must begin with	Art Appraisal

For all other PDF attachments, the tax preparation software must provide the taxpayer the ability to enter a meaningful description. [Exhibit 9 Recommended Names and Descriptions for PDFs](#) provides a table with recommendations of names and descriptions for tax year 2009 PDFs . This table will be posted on IRS.gov on the [MeF User Guides and Publication](#) page and updated throughout the year.

When multiple forms or attachments are required, the taxpayer has the option to put all like-kind statements or forms in one PDF file or creating a separate PDF file for each statement or form. For example, if three Section 351 statements are needed, they may all be included in one PDF file or each separate Section 351 statement may be in a separate PDF file.

When a PDF is associated with an entity, the name (or part of the name if limited by the total number of characters) should appear at the end of the suggested Description field. For example:

If attaching an organizational chart to Form 5471 of a foreign corporation, use the Description “Form 5471 Schedule O - Org Chart Foreign Corp 123” in the BinaryAttachment.xsd.

### **2.2.5 Form 1040 Paper Document Indicator**

The Paper Document Indicator in the Form 1040 Return Header is checked when a taxpayer elects to send certain forms to IRS by mail using Form 8453, U.S. Individual Income Tax Transmittal for an IRS e-file Return.

In processing year 2010, 1040 MeF filers have the option of:

- attaching the forms listed below as a PDF to the electronic submission.
- mailing the forms listed below to IRS with the Form 8453 transmittal. If the form is mailed to IRS, the Paper Document Indicator in the Return Header should be checked.

The Form 1040 Return Header has paper document indicators for:

- Form 8283, Noncash Charitable Contribution
- Form 8332, Release of Claim to Exemption for Child of Divorced or Separated Parents
- Form 3115, Application for Change in Accounting Method
- Form 1098-C, Contributions of Motor Vehicles, Boats, and Airplanes
- Power of Attorney

The Form 8283 data must be included as XML in the electronic submission. When a signature is required, a signed copy of Form 8283 can either be:

- included in the submission file as a binary attachment (PDF) or
- mailed to the IRS with Form 8453 transmittal and checking the Form 8283 Paper Document Indicator.

The Form 8453 transmittal lists additional forms, which are not included in the 1040 MeF program for processing year 2010. Filers who need to attach a form not listed above to the transmittal should not file through MeF.

The Declaration Control Number (DCN) is not used by MeF; therefore, these boxes can remain blank on Form 8453 and any other form that has a DCN (such as Forms 8878, 8879 or 9325). MeF uses a Submission ID instead of a DCN and does not require the Submission ID be reported on these forms.

## **2.3 Special Instructions for “schedule” attachments to Form 8865**

In many instances information from various Form 1065 schedules (Schedule B, D, K, K-1, L, M-1, M-2) will be the same required to be filed with the Form 8865 schedules. Do NOT attach the Form 1065 schedules to the return; instead, the data from the Form 1065 schedules should be formatted into the corresponding Form 8865 schedules.

## **2.4 Special instructions for Form 4466**

If applicable, Form 4466, Corporation Application for Quick Refund of Overpayment of Estimated Tax, should be filed on paper at the appropriate IRS Center listed on the form instructions. The Form 4466 attached to the e-filed return is only a copy and will not be processed.

## **2.5 Special instructions for other forms and attachments that require signatures**

IRS Counsel issued special instructions to facilitate electronic filing. Regulation T.D. 9300 contains amendments to the Income Tax Regulations (26 CFR Part 1) and Procedure and Administration Regulations (26 CFR Part 301) eliminates some of the requirements considered impediments to the electronic submission of tax returns. T.D. 9300 eliminates the impediments for taxable years beginning after December 31, 2002. The regulations generally affect taxpayers who are required to file any of the following forms: 926, 972, 973, 982, 1120, 1120S, 1122, 5471 or 8832. In addition, effective May 30, 2006, T.D. 9264 also eliminated signature impediments by stating that by signing the return, a taxpayer is attesting to the validity of the Form 1120 as well as all of the attachments. Generally, the signature of Forms 1120/1120-S covers all forms, schedules and accompanying statements, with the exception of Form 8838 and Form 7004. Review TD9300 and 9264 for specifics.

### **2.5.1 Form 8838**

Form 8838 data must be sent to the IRS using the XML Schema and a signed copy submitted as a binary attachment with the Description “8838 signature document.”

## **2.5.2 Form 7004**

There is no signature requirement on the Form 7004, unless there is a payment made with the Form 7004. If you are using an ERO, then use Practitioner PIN to sign the extension and authorize the payment. If you are not using an ERO, the ACH Debit Agreement Indicator must be included in the XML to authorize the payment that is attached to the Form 7004.

Although Form 7004 MeF has binary attachment capability, such attachments are for information purposes only and will not be processed. Therefore, a power-of attorney (POA), Form 1128, Form 1138 and other documents requiring action by IRS should not be sent with the Form 7004.

## **2.6 Exempt Organization Return Attachments**

For Exempt Organization returns, filers occasionally must attach an IRS form, schedule or other piece of information. For Forms 990, 990-EZ, 990-PF, 1120-POL, and 8868, these “attachments” will normally be submitted electronically as XML documents. Usually, the only binary file is Form 8453-EO except for Final Returns where third party documents are allowed to be attached as binary attachments. Other binary files may be submitted as attachments if permitted as part of a form or schedule shared with Forms 1120/1120-F/1120S. A Form 8453-EO is the only attachment permitted with Form 8868.

### **2.6.1 General Explanation Attachment**

The General Explanation attachment is an XML schema used for Forms:

- 990-EZ
- 990-PF
- 1120-POL
- 990 (TY2007 and prior)

The Schedule O (Form 990), Supplemental Information to Form 990, replaces the General Explanation Attachment for TY2008 and later Forms 990.

The General Explanation attachment, which allows for optional information to be provided that is not otherwise covered in another permitted schema, has three elements:

- Identifier, which is a single line description of the information being provided
- Return Reference, which is a single line description of the return item, if any, to which the information relates
- Explanation., which is a brief text section where the additional information the filer wishes to convey is contained

These fields may be repeated up to ten times.

One General Explanation Attachment may be optionally attached to each return. It is intended to be used to provide supplementary information, and may not be used in lieu of an existing schema.

**Note:** The General Dependency schemas available with other MeF forms may not be substituted for the General Explanation Attachment schema.

## **2.6.2 Binary Attachments for Exempt Organization returns**

When submitting a binary attachment of Form 8453-EO, the name “8453 Signature Document” must be included in the submission Zip Archive. For specific information, please refer to the MeF Submission Composition Guide found at <http://www.irs.gov/charities/article/0,,id=105955,00.html>.

All attachments (except for the signature document, Form 8453-EO) to Forms 990, 990-EZ, 990-PF, 1120-POL, and 8868 must use the prescribed XML schema. Binary documents will be permitted to these forms if they are necessary as part of submitting a shared Form 1120/1120-F/1120S form or schedule. Refer to Section 2.2 above, for specific guidance concerning the name, description and AttachmentLocation of binary attachments. Since a signature is required for electronic payments submitted with Form 8868, Form 8453-EO is the only binary attachment permitted with the extension.

## **2.7 Special Instructions for Consolidated Returns**

MeF requires tax preparation software approved for electronic filing to use IRS forms for reporting data for each subsidiary return. In addition to the consolidated return, tax preparation software approved for electronic filing must allow taxpayers to create a separate “stacked return” for the parent and each subsidiary return. Tax preparation software must allow taxpayers to report Eliminations and Adjustments at each level when applicable. Tax preparation software may also allow taxpayers to use spreadsheets for the internal review of the return, but IRS requires all subsidiary data to be formatted, transmitted and viewed by IRS as “stacked returns”.

MeF requires supporting data to be included in tax preparation software (see example provided below) or attached as scanned PDF files. IRS reviewed all of the forms (and instructions) that may be attached to the corporate forms and identified every instance where taxpayers are required to attach supporting data. IRS provided structured formats to software developers or provided instructions to enter supporting data as PDF files (in instances where IRS has not defined a format).

When IRS has defined structured formats, software developers are required to use these formats for developing tax preparation software approved by IRS for electronic filing. It is the responsibility of software developers to provide appropriate instructions for taxpayers to enter supporting data to meet the IRS guidelines. Most software developers will allow taxpayers to import/export data from other sources. Taxpayers are encouraged to discuss available options with their software developer early to determine how to prepare supporting data for their electronic return.

When submitting a consolidated return, the software **must** provide the detail for each entity and then roll that data up to the consolidated return. At a minimum, this roll-up information must be provided on any line where the form requires a statement or schedule to be attached (e.g., Form 1120, Line 10, Other Income (attach schedule), Line 26, Other Deductions (attach schedule), etc.).

Here is a consolidated return example based on test data provided in Publication 4162:

**Attachment 1, Form 1120, line 10, Other Income (ItemizedOtherIncomeSchedule)**

Consolidated Schedules	Total	Hide 'N Seek Foods, Inc.	The Greek Playhouse	Acme Food Corp
Sales	217,441	208,671		8,770
Exchange Gain/Loss Realized	-2,321,468	-2,229,104		-92,364
Partnership Income/Loss	50,578,008	-59,869		50,637,877
Miscellaneous Income	149,354	156,146		-6,792
Interco Consulting Fees	1,448,935	1,448,935		
<b>TOTAL</b>	<b><u>50,072,270</u></b>	<b>-475,221</b>		<b>50,547,491</b>

The first subsidiary (Hide 'N Seek Foods, Inc) will provide the following data on the ItemizedOtherIncomeSchedule:

Corporation Name	Corporation EIN	Other Income Type	Other Income Amount
Hide 'N Seek Foods, Inc.	11-0000002	Sales	208,671
Hide 'N Seek Foods	11-0000002	Exchange Gain/Loss realized	-2,229,104
Hide 'N Seek Foods	11-0000002	Partnership Income/Loss	-59,869
Hide 'N Seek Foods	11-0000002	Miscellaneous Income	156,146
Hide 'N Seek Foods	11-0000002	Interco Consulting Fees	1,448,935
Hide 'N Seek Foods	11-0000002	Total	-475,221

The second subsidiary (The Greek Playhouse) would not have an attachment for Other Income since they do not have an entry on Line 10 of the subsidiary Form 1120.

The third subsidiary (Acme Food Corp) will provide the following data on the ItemizedOtherIncomeSchedule:

Corporation Name	Corporation EIN	Other Income Type	Other Income Amount
Acme Food Corp	11-0000013	Sales	8,770
Acme Food Corp	11-0000013	Exchange Gain/Loss realized	-92,364
Acme Food Corp	11-0000013	Partnership Income/Loss	50,637,877
Acme Food Corp	11-0000013	Miscellaneous Income	-6,792
Acme Food Corp	11-0000013	Total	50,547,491

The consolidated return should have an attachment for Other Income and the following data must be provided in one of the following formats:

Format 1: The ItemizedOtherIncomeSchedule for the consolidated return contains a roll-up of the detail for each entity.

Corporation Name	Corporation EIN	Other Income Type	Other Income Amount
Hide 'N Seek Foods	11-0000002	Sales	208,671
Hide 'N Seek Foods	11-0000002	Exchange Gain/Loss realized	-2,229,104
Hide 'N Seek Foods	11-0000002	Partnership Income/Loss	-59,869
Hide 'N Seek Foods	11-0000002	Miscellaneous Income	156,146
Hide 'N Seek Foods	11-0000002	Interco Consulting Fees	1,448,935
Acme Food Corp	11-0000013	Sales	8,770
Acme Food Corp	11-0000013	Exchange Gain/Loss realized	-92,364
Acme Food Corp	11-0000013	Partnership Income/Loss	50,637,877
Acme Food Corp	11-0000013	Miscellaneous Income	-6,792
Hide 'N Seek Foods, Inc.	11-0000002	Total	50,072,270

Format 2 The ItemizedOtherIncomeSchedule for the consolidated return contains a roll-up of the total from each entity.

Corporation Name	Corporation EIN	Other Income Type	Other Income Amount
Hide 'N Seek Foods, Inc.	11-0000002	Total Other Income	-475,221
Acme Food Corp	11-0000013	Total Other Income	50,547,491
Hide 'N Seek Foods, Inc.	11-0000002	Consolidated Total	50,072,270

Format 3 The ItemizedOtherIncomeSchedule for the consolidated return contains a total of all subsidiaries by category.

Corporation Name	Corporation EIN	Other Income Type	Other Income Amount
Hide 'N Seek Foods, Inc.	11-0000002	Sales	217,441
Hide 'N Seek Foods	11-0000002	Exchange Gain/Loss realized	-2,321,468
Hide 'N Seek Foods	11-0000002	Partnership Income/Loss	50,578,008
Hide 'N Seek Foods	11-0000002	Miscellaneous Income	149,354
Hide 'N Seek Foods	11-0000002	Interco Consulting Fees	1,448,935

## **2.8 XML Character Representation**

When entering character data into an XML document, it is important to ensure that the specified encoding supports the characters provided. By design, Modernized e-File uses Unicode Transformation Format-8 (UTF-8). MeF does not support any other encoding scheme (for example, UTF-16 and UTF-32)

## 2.8 MeF Transmission and Submission File Structures for Internet Filing Application (IFA) and Application-to-Application (A2A)

This section describes the transmission and submission file structures for the IFA and Application-to-Application channels. Both channels use SOAP (Simple Object Access Protocol) with attachments.

For more specific information on creating a transmission file for IFA, refer to the MeF Submission Composition Guide posted to <http://www.irs.gov/efile/article/0,,id=171946,00.html>. For specific information on creating Application-to-Application Messages, refer to the ISS MeF State and Trading Partners Reference Guide posted along with the MeF Submission Composition Guide.

### 2.8.1 MeF Transmission File Structures for IFA

**The number of submissions in the transmission file is limited to 100.**

The transmission file for the IFA channel is a MIME (Multipurpose Internet Mail Extensions) multipart document that contains two parts and conforms to “SOAP 1.1 with attachments” standard. The first part of the multi-part document is the SOAP envelope and the second part is a SOAP attachment. The SOAP envelope contains transmission-level information, and the SOAP attachment contains submissions. MIME boundaries separate the parts in the multi-part document.

The SOAP envelope consists of a SOAP header and a SOAP body. The SOAP header, also referred to as the *transmission header* in the MeF system, contains information about the transmitter and the transmission. The SOAP body, also referred to as the *transmission manifest*, contains a list of all submissions in the transmission file. Please refer to Figure 2-11 below.

The SOAP attachment in the transmission file is a ZIP file. This ZIP file, also referred to as Attachment ZIP file, is not compressed; it is simply ZIP archived (compression is turned off when this file is created). This Attachment ZIP file contains one or more submissions that are themselves ZIP Archive files. These ZIP files, also referred to as Submission ZIP files, are compressed.

MeF incoming submission data is encapsulated in SOAP 1.1 with a single attachment. This single attachment will be an uncompressed zip container file. The single uncompressed zip container file may contain any number up to 100 compressed zip submission files, which is one level of nesting. No more than one level of nesting is allowed. Each compressed zip submission file consists of one submission (return) and may not contain another zip file. The files in the zip archive can only be compressed to a maximum of 250 times. Any zip archive file compressed more than 250 times the original file will trigger anti-virus engine and the transmission will be rejected as a potential virus.

Each submission zip file may contain ONE of the following: a federal return (with or without PDF attachments), a state return (with or without PDF attachments), or a request for extension (with or without PDF attachments). The SOAP header is never zipped.

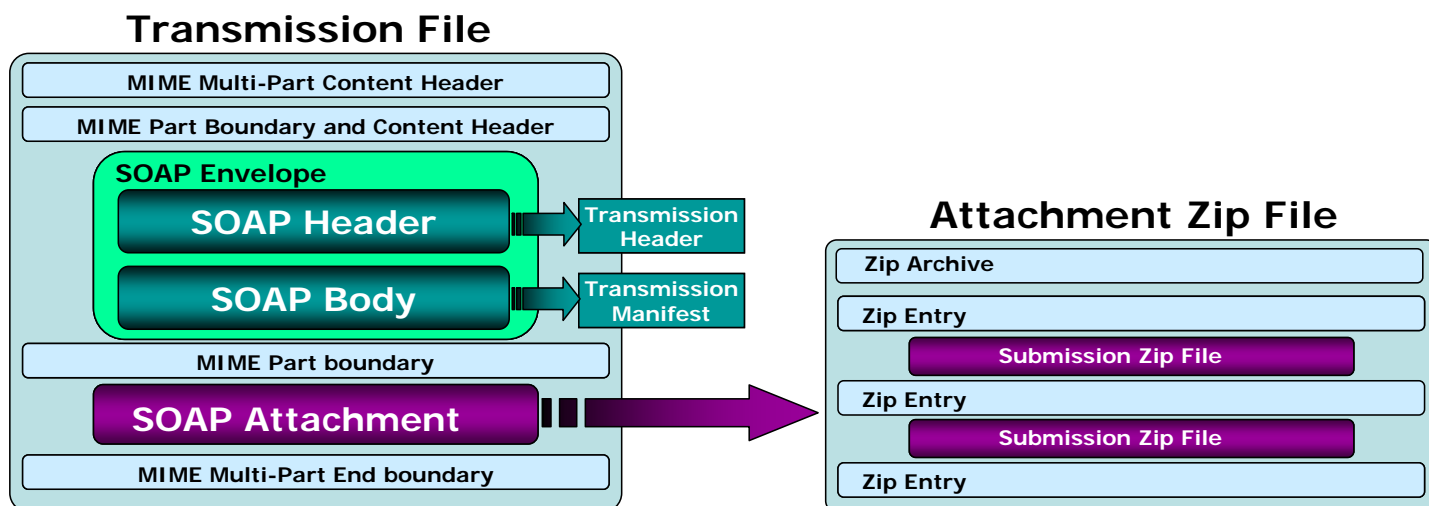

Figure 2-11: MeF Transmission File structure for the IFA Channel

### 2.8.2 Submission File Structure for the IFA Channel

The IFA and A2A channels support transmission of both federal and state returns. An IRS submission consists of XML data and optional binary attachments (PDF Files), which are packaged and compressed into a zip file. The Zip file is also referred to as the Zip Archive; each entry in the file is referred to as the Zip Entry. Each IRS Submission ZIP file contains the following folders (directories), which are then packaged and compressed into a Zip file:

- **/manifest.** The *manifest* folder (archive directory) contains a *manifest.xml* file, which provides information about the Submission. This information includes, but is not limited to the ERO who composed the Submission, the tax year for which the IRS Submission is being filed, etc. The manifest directory must be present along with the file that contains data for this directory. The */manifest/manifest.xml* is required in the submission. Please refer to the *MeF State and Trading Partners Reference Guide* for the structure of a State Submission and contents of the *manifest.xml* file.
- **/xml.** The *xml* file (archive directory) contains the *submission.xml* file with the submission data in XML format. The xml archive directory must be present along with the files that contain data for this directory. The */xml/submission.xml* is required in the submission.

- **/attachment.** The *attachment* directory contains binary attachment files. This directory is required only if there are binary attachments in the Submission. The attachment folder is an optional folder in a submission zip file.

The leading slash, “/” is optional. The submission will be accepted with or without the leading slash.

The structure of an IRS submission file for the IFA channel is depicted below.

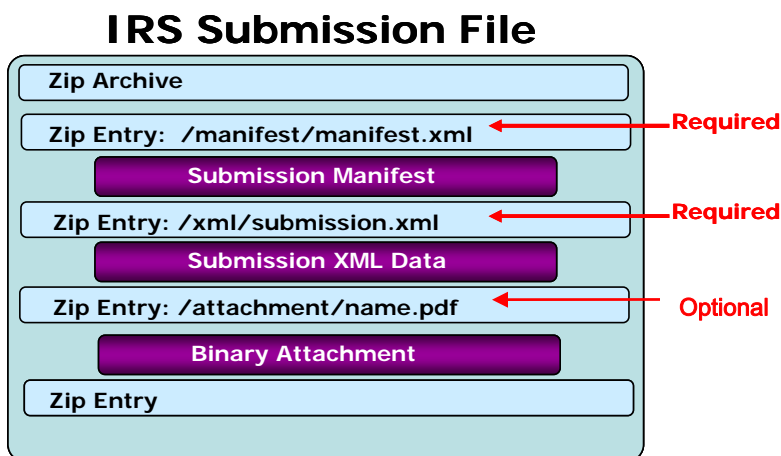

Figure 2-12: IRS Submission File structure for the IFA Channel

For detailed information regarding the IRS submission file structure, refer to the MeF Submission Composition Guide.

### 2.8.3 Creating an MeF Attachment

The steps below document how to create a SubmissionZip Archive. The MeF Submission Composition Guide for the Modernized e-File System, Section 4.1, describes the logical structure of attachments. The guide is posted to <http://www.irs.gov/efile/article/0,,id=171946,00.html> located just below the Publication 4164 link. This example uses the WinZip tool to generate an attachment containing one or more submissions.

#### 2.8.3.1 Create Individual SubmissionZip Archive(s)

1. Choose a local drive such as C:\ and create three folders: the first one should be named “manifest”, the second named “xml”, and the third named “attachment”.
2. Generate the submission manifest and name it “manifest.xml”. This should be copied to the C:\manifest\ directory. **There must be a single manifest for each submission.**
3. Generate the submission XML and copy it to the C:\xml\ directory. **There must be only one XML file here.**
4. Copy any PDF submission attachments into the C:\attachment\ directory. There can be

zero or multiple PDF attachments in the directory.

5. Open the WinZip tool, and select “New”
6. Browse to the **root of the local drive C:\** and type in the name of the submission archive.  
NOTE: **The name of the submission archive must match the SubmissionID.** If the SubmissionID in the manifest generated in Step 2 is 00123420100351234567, then the file name used for the archive here should be 00123420100351234567.zip
7. Now add files to the archive using the WinZip Add dialog. First, browse to C:\manifest\ and select the manifest.xml file. NOTE: **The “Save full path info” option must be selected.**
8. Next, browse to C:\xml\ and select the submission xml file. Again, ensure that the full path info is saved.
9. Lastly, browse to C:\attachment\ . This is an optional folder so there may not be any PDF attachments in the return. If there are any PDF attachments, select all of them. Again, ensure that the full path info is saved.
10. Close WinZip and verify that the submission archive 00123420100351234567.zip has been saved to the root of the C:\ drive and contains the files just added.
11. Delete the files in C:\manifest\, C:\xml\, and C:\attachment\
12. Repeat Steps 2 – 11 for all the submissions to be sent to MeF.

### 2.8.3.2 Generate the MeF Attachment

The individual submission zip archives generated in the previous section must now be compiled into a single MeF attachment for the send submissions message. Again, the WinZip tool will be used to do this.

1. Open WinZip and select “New”
2. Browse to a location on the local drive to save the MeF attachment, then type in a file name for the MeF attachment
3. Now add files to the archive using the WinZip Add dialog. Browse to the root of the local drive C:\ and select all the individual submission archives that were generated in the previous section. Choose Compression option “None”, and then click on “Add”.
4. Close WinZip and attach the ZIP file generated here to the MeF SendSubmissions message.

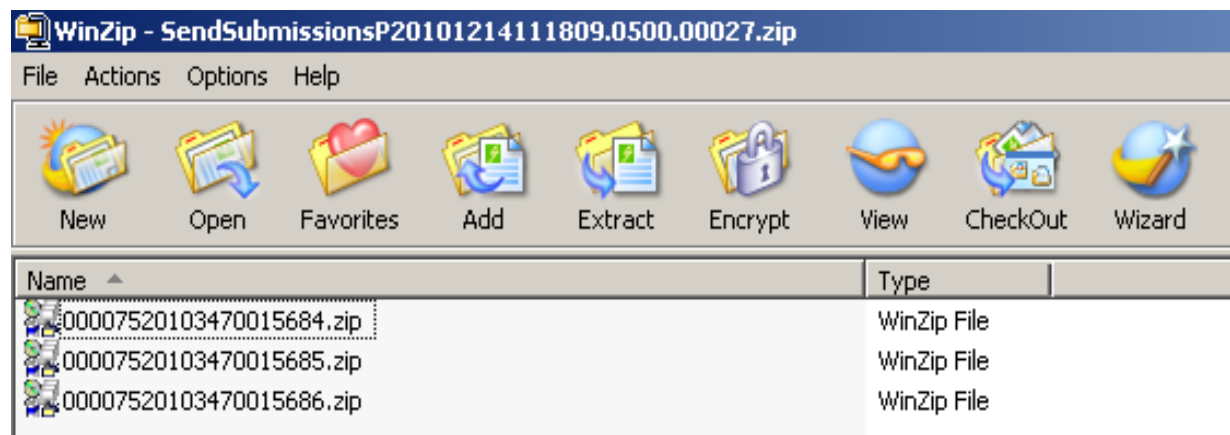

**NOTE: The submission IDs in the Send Submissions SOAP message must match the submission IDs in the file names for the individual submission archives. And as indicated earlier, each submission archive name must match the submission ID in its manifest file. Refer to the diagrams below for an example:**

*\*\*Please refer to sample MeF attachment included which contains three submissions – SendSubmissions.P20101214111809.0500.00027.zip \*\*\**

SOAP Request Message contains:

```
<SendSubmissionsRequest
xmlns="http://www.irs.gov/a2a/mef/MeFTransmitterService.xsd">
<SubmissionDataList>
  <Count>3</Count>
  <SubmissionData>
    <SubmissionId>000075201030880015684</SubmissionId>
    <ElectronicPostmark>2010-04-02T09:42:09-05:00</ElectronicPostmark>

## 2.8.4 MeF Transmission File Structures for Application-to-Application (A2A)

A2A uses SOAP with HTTP binding for the transmission file, which are SOAP messages that are transported using HTTPS. All service requests are Soap Messages. A service request (message) or its response may or may not have an attachment. For detailed information about SOAP messages, refer to the MeF State and Trading Partners Reference Guide. MIME, DIME and MTOM encoding are used for A2A.

### 2.8.4.1 Soap Message without Attachments.

This Web Service SOAP message contains the following:

- HTTP Headers
- A SOAP Envelope that contains the following:
  - a SOAP header that includes the following elements:
    - An MeF header that contains message and transmitter identifying information. This header must be included in each message.
    - A WS Security Header that contains security related information. This header must be included in each message.
  - a SOAP body that includes the message elements.

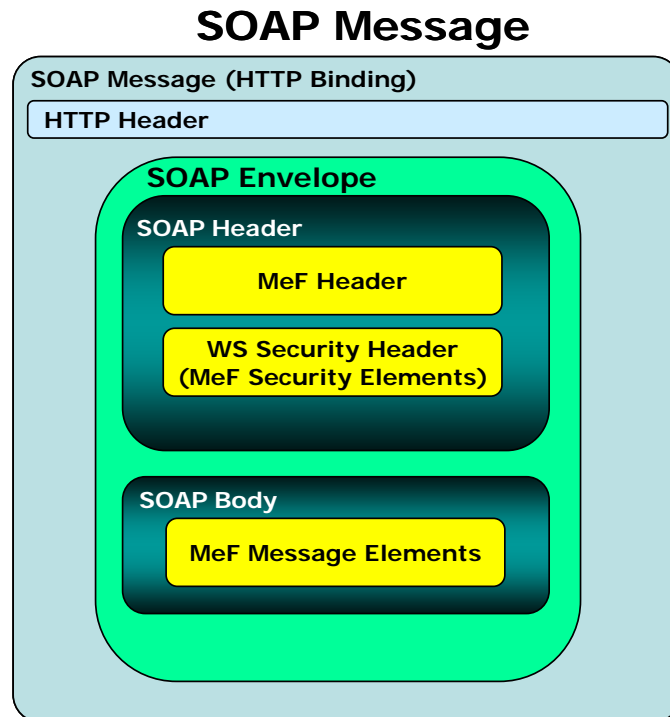

Figure 2-17: Basic SOAP Message Structure for HTTP Binding

#### 2.8.4.2 Messages with Attachments.

The SendSubmission service request is used to transmit submissions. It can have one and only one attachment. This attachment must be an uncompressed zip file called the container zip file. The container zip file can contain from 1 to 100 compressed zip files. Each compressed zip file contains one federal or state submission.

The GetNewSubmissions service request is used by state agencies to retrieve state returns. The responses to the GetNewSubmission series of service requests have the same attachment structure. Each submission is in its own compressed zip file and these zip files are attached to the response in one uncompressed container zip file.

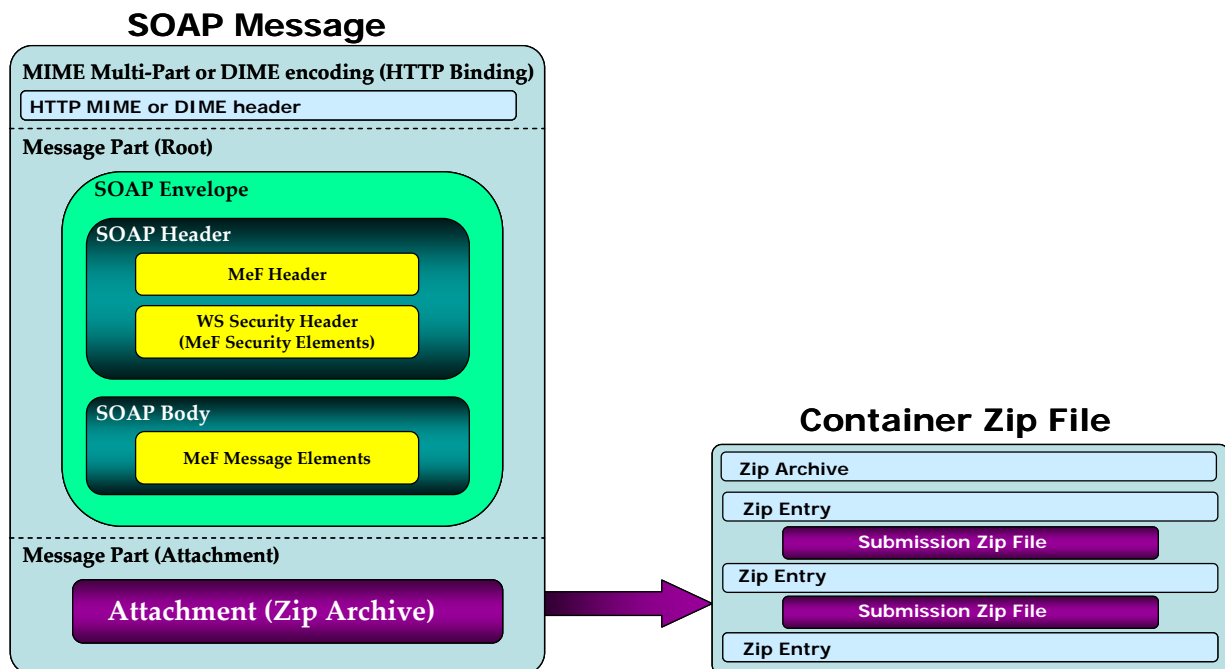

Figure 2-18: MeF Transmission File structure for the A2A Channel

#### 2.8.5 MeF Submission File Structure for Application-to-Application

Transmitters can transmit federal and state submissions using Web Services. A state submission contains XML data and optional binary attachments. The state return may also contain a copy of part or all of the taxpayer's federal return. The state determines what part of the federal return the taxpayer should include in the state submission. Like a federal submission, the state submission must be zipped into its own file and then placed into the container zip file. The container zip file is then attached to the SendSubmissions service request. Federal and state submissions can be included in the same attachment (container zip file) each in their own zip file.

Each submission contains the following folders (directories), which are then packaged and compressed into a zip file:

- **/manifest.** The *manifest* folder (directory) contains a *manifest.xml* file, which provides information about the Submission. This information includes, but is not limited to, the ERO who composed the Submission, the tax year for which the IRS Submission is being filed, etc. The manifest directory must be present along with the files that contain data for this directory. The */manifest/manifest.xml* is required in the submission. Please refer to the *MeF State and Trading Partners Reference Guide* for the structure of a State Submission and contents of the *manifest.xml* file.
- **/xml.** The *xml* directory contains the *submission.xml* file with the submission data in XML format. The *xml* directory must be present along with the files that contain data for this directory. The */xml/submission.xml* is required in the submission.
- **/attachment.** The *attachment* directory contains binary attachment files. This directory is required only if there are binary attachments in the Submission. The attachment folder is an optional folder in a submission zip file

The leading slash, “/” is optional. The submission will be accepted with or without the leading slash.

Refer to [Section 2.8.3 Creating an MeF Attachment](#), for additional guidance. For more information on the transmission and submission file structure, refer to the MeF State and Trading Partners Reference Guide and the MeF Submission Composition Guide.

## 2.9 Version Control for MeF Schemas and Business Rules

IRS created a set of XML schemas for different types of tax returns (Forms 1040, 1120, 1120-F, 1120S, 1120-POL, 1065, 1065-B, 990, 990-EZ, 990-N, 990-PF, 720, 2290, and 8849), extensions (Forms 4868, 7004 and 8868), transmission file, and acknowledgement file. Each schema version also has a respective set of business rules that are used during MeF validation.

### 2.9.1 Schema and Business Rules Updates

Each year, new tax legislation and/or improvements to IRS programs impact the IRS forms and processing procedures. The IRS evaluates these changes to determine if updates to the XML schemas and business rules are necessary. Once the changes have been incorporated, the IRS uses the following timeline to publish the XML schemas and business rules changes:

- **August** – The IRS issues the initial version of the tax year XML schemas and business rules to enable software developers to begin development of the new tax year tax preparation software.
- **September/October/November** – The IRS issues updated versions of tax year XML schemas and business rules.

When schemas are posted to IRS.gov, IRS will identify when the schemas are available in the Assurance Testing System (ATS) and Production environments. Software developers are not required to retest when new schemas (minor or major) are posted. However, we **strongly** recommend you use the Assurance Testing System (ATS) to retest when you update your software with new schema changes.

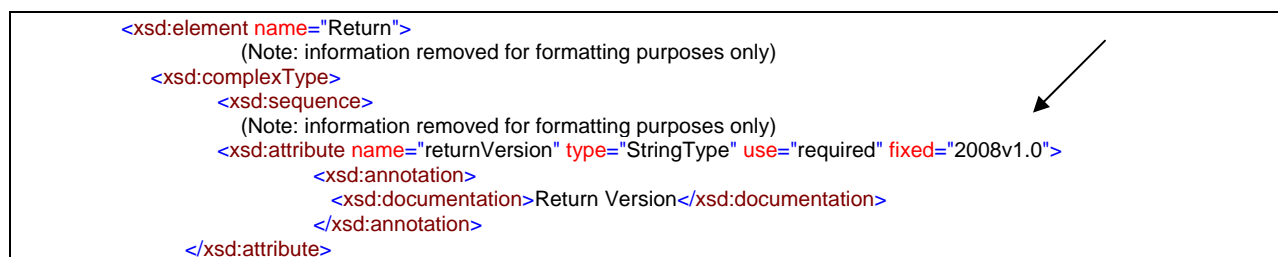

**Note:** If there are critical changes required due to legislative changes, national disasters, or errors identified during testing or production, the IRS may issue updated XML schemas and business rules after December and during the processing year.

### 2.9.2 General Information about Version Numbers

Each version of the XML schemas and the corresponding business rules has a unique version number. It is important to note the following principles regarding version numbers:

- Each tax return's schema version has an associated set of business rules with the same number. This ensures that each updated schema version includes an updated set of business rules.

- The "returnVersion" attribute of the "Return" element (the root element) identifies the version of the schema for each return. For example, the "returnVersion" from the 1120.xsd file shown below identifies the schema version as 2008v1.0.

```
<xsd:element name="Return">
  (Note: information removed for formatting purposes only)
  <xsd:complexType>
    <xsd:sequence>
      (Note: information removed for formatting purposes only)
      <xsd:attribute name="returnVersion" type="StringType" use="required" fixed="2008v1.0">
        <xsd:annotation>
          <xsd:documentation>Return Version</xsd:documentation>
        </xsd:annotation>
      </xsd:attribute>
    </xsd:sequence>
  </xsd:complexType>
</xsd:element>
```

**Figure 2-19: Partial "Return" element from 1120.xsd file**

- Each business rule document's version number identifies the version of the business rule.
- The "Active Validating Schema Version" specifies the business rules and schema version that will be used to validate a tax return that has been received by the IRS during a timeframe. This provides a mechanism for different versions to be accepted at the same time. It also enables an older version to be validated against a newer version's set of schemas and business rules. The IRS will publish all valid schema/business rule versions.

The active validating schema version will be the most recent schema version posted to IRS.gov. IRS will provide the "Start" dates when schemas are available in Production and ATS. These "Start" dates also represent when the latest schema posted becomes the active validating schema.

**Note:** In rare circumstances, there may be more than one active validating schema version. In this instance, the validation may occur on either the most recent schema version or a designated earlier version. IRS will identify multiple active validating schema versions on the schema Web pages.

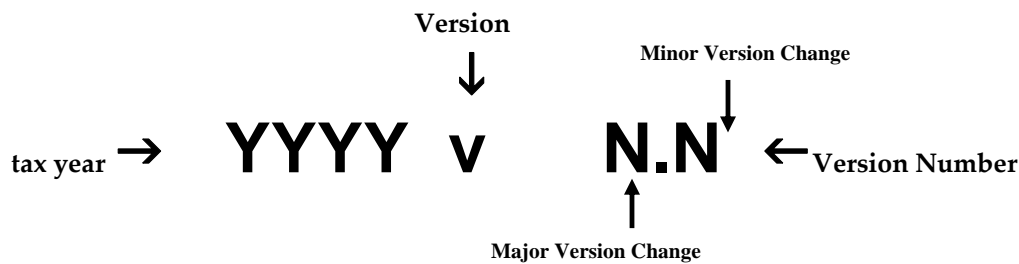

### 2.9.3 Version Numbering Scheme

The version number includes:

- the tax year for which the schema and business rule document applies (YYYY)
- the lower-case version initial (v)
- the two-digit version number (N.N)

When the version number reaches 10 or more in a given processing year, the number will include two-digits to the right and to the left of the decimal as needed (NN.NN).

The version number of MeF business rules that are invoked for the MeF XML schemas will always have the same version number as the schema version, thereby, providing a mechanism that aligns the various versions of schemas with their applicable business rules. Figure 2-20 below is an example of the structure used for version numbers for yearly returns:

**Figure 2-20: MeF Version Number Diagram**

The above diagram is for yearly returns. Version numbers for quarterly returns will include “Q” and the quarter number after the tax year. For example:

A 3<sup>rd</sup> quarter return for Form 720 TY2009 will be shown as 2009**Q3**v2.0.

The examples below illustrate how the version number changes every tax year. New versions are generated when changes are necessary to the tax return’s XML schema structure, content, and business rules. Each change increases the version number when the new version is published. Major changes increase the left digit and minor changes increase the right digit.

**Note:** If only minor changes occur, software developers are not required to use the new version. If the major number changes, all software must reflect the new version. For example:

- A new tax year: The tax year part of the version number will change with each subsequent tax year and the version number is usually reset to 1.0. This is a major version change.
- Additions, deletions and/or changes to a schema’s data elements: This includes any schema modification to a form and/or attachment. Even if the tax return’s business rules were not affected by the additions, deletions and changes to the tax return’s schemas, the business rule’s version number will be changed to maintain the alignment between the schemas and the applicable business rules.
- Form family: If the 1120 version number changes, then the 1120-F and 1120S version number will also change unless otherwise noted on IRS.gov.
- Additions, deletions and/or changes to the business rules: Even if the business rule change(s) did not affect the tax return’s schema, the tax return’s schema version will be changed to maintain the alignment between the tax return’s schema and the applicable business rules.

## 2.9.4 Validating Schema Versions

Throughout the year, multiple versions of XML schemas and business rules are posted to IRS.gov. Depending on if the schema change is major or minor; MeF may not require the schema version found in the return data to match the schema version used by MeF during validation. In general, there is always one active validating schema version for each return type in a tax year. In rare circumstances, there may be more than one active validating schema version.

- **Minor Schema Changes** - When IRS issues revised schemas for a return type and changes the increment for the minor number, MeF will continue to accept returns composed using previous schema versions. When the minor number is changed, IRS allows software developers to decide for themselves whether they need to use the new version or not based on what is included in their tax preparation software and what changes were made to the schemas. For example:

If the change affects a form or field you do not support, then you may elect not to use the newest version.

Returns may be composed using previous published schema versions but IRS will only validate against the “active validating schema version” when the return is processed. For example:

If the current schema version is 2009v1.0 and the schema change is minor, IRS will assign the new number 2009v1.1. The active validating schema version is 2009v1.1. MeF will continue to accept returns composed using version 2009v1.0. However, all returns (whether composed with version 2009v1.0 or 2009v1.1) will be validated with the new version, 2009v1.1.

- **Major Schema Change** - When IRS issues revised schemas for a return type and changes the increment for the major number, all returns must be composed using the new version number. If returns are composed using previously published schema versions, they will not validate against the active validating schema version when the return is processed.

For example, if the current version is 2009v1.1 and the IRS decides it can no longer accept returns composed using schema version 2009v1.1 (or 2009v1.0), it will assign the new number 2009v2.0. The active validating schema version is 2009v2.0. Returns submitted with 2009v1.1 (or 2009v1.0) will be rejected for using an unsupported schema version.

Software developers and transmitters should select the applicable form type on the [MeF Schemas and Business Rules webpage](#) to get information about all active and prior year schemas and business rules used by the MeF Production and Assurance Testing Systems (ATS).

## 2.9.5 Example of Schema Versioning

Figure 2-21 below is a sample table of schemas posted to IRS.gov. The schema/business rules tables will include the Start dates and End dates, if applicable, for ATS and Production.

	Version	Date Posted	ATS Dates	Production Dates
Add'l Minor Version →	<a href="#">2007v3.2</a>	<a href="#">1/15/2008</a>	<b>Start Date:</b> 2/11/2008	<b>Start Date:</b> 3/03/2008
Minor Version →	<a href="#">2007v3.1</a>	<a href="#">12/7/2007</a>	<b>Start Date:</b> 01/21/2008 (changed from 01/28/2008)	<b>Start Date:</b> 02/04/2008
Add'l New Major Version →	<a href="#">2007v3.0</a>	<a href="#">11/28/2007</a>	<b>Start Date:</b> 12/17/2007	<b>Start Date:</b> 1/7/2008
New Major Version →	<a href="#">2007v2.0</a>	<a href="#">10/19/2007</a>	<b>Start Date:</b> 12/03/2007  <b>End Date:</b> 12/16/2007	This schema version is not available in Production
Initial Version →	<a href="#">2007v1.0</a>	<a href="#">08/17/07</a>	<b>Start Date:</b> 11/05/2007  <b>End Date:</b> 12/02/2007	This schema version is not available in Production

**Figure 2-21: Schemas and Business Rules Versions for Forms 1065/1065-B TY2007**

- **Initial Version** – On 08/17/2007 IRS issued the initial schema version, 2007v1.0. This version was developed for testing, ATS, which opened on 11/05/2007.
- **New Major Version** – On 10/19/2007, IRS issued an updated version, 2007v2.0, due to significant changes that affected the 1065/1065-B XML schemas and business rules. The table shows the schema version 2007v1.0 end date in ATS was 12/02/2007. As of December 3, 2007, schema version 2007v2.0 is the only active schema version and must be used for testing after this date.

- **Additional New Major Version** – On 11/28/2007, IRS issued an updated major version, 2007v3.0, due to significant changes that affected the 1065/1065-B XML schemas and business rules. Per the table, the ATS start date for 2007v3.0 was 12/17/2007 and the Production start date was 01/07/2008. Since this was a major version change, the prior version, 2007v2.0 had an end date of 12/16/2007 for ATS. Version 2007v2.0 was not available for Production.
- **Minor Version update** – On 12/7/2007, IRS issued updated 1065/1065-B schemas and business rules version 2007v3.1 as a result of changes identified by software developers, IRS testing or legislative changes. It is up to the software developer to determine if their software needs to be updated based on the changes made and the forms the software developer supports.

Schema version 2007v3.1 was active in Production on 02/04/2008 and became the active validating schema on that date. The table does not show a Production end date for version 2007v3.0; therefore, both versions 2007v3.0 and 2007v3.1 were active in Production on 02/04/2008. Although both versions were active, the validation was done against schema version 2007v3.1 until the subsequent schema posted.

- **Additional Minor Version Update** - On 01/15/2008, IRS issued an updated 1065/1065-B schema and business rule version 2007v3.2. This version was available in Production on 03/03/2008 and became the active validating schema on that date. Because there are no end dates for schema versions 2007v3.0 and 2007v3.1, they were also available in Production on 03/03/2008, along with the latest schema version, 2007v3.2. Although all three versions were active on 03/03/2008, any return submitted on or after this date was validated against version 2007v3.2, the active validating schema.

After Production opens, IRS strives to limit the number of schema and/or business rule revisions.

## 2.10 MeF XML Schema File Structures

This section describes the MeF XML Schema file structure and how the schemas will be packaged as of the date this publication was issued. Each program has its own file structure and is packaged separately. You should check for periodic updates at the Web sites shown in [Section 2.9.4 Validating Schema Versions](#).

Schemas for a given return family are bundled into one package; likewise, schemas for each extension are bundled into separate packages.

There are 12 **separate schema** packages:

- one package for Form 1040
- one package for Form 4868
- one package for Forms 1120, 1120-F, and 1120S
- one package for Forms 990, 990-EZ, and 990-PF
- one package for Form 990-N
- one package for Form 1120-POL
- one package for Form 7004
- one package for Form 8868
- one package for Forms 1065 and 1065-B
- one package for Form 720
- one package for Form 2290
- one package for Form 8849

There are 20 business rules files:

- A business rules file accompanies each parent form listed above (17 total)
- A separate subset of business rules were developed for Forms 1120, 1120-F and 1120S amended returns.

The following pages provide a diagram of the schema structures for the forms listed above.

## 2.10.1 Form 1040 XML Schema File Structure

Figure 2-22 Form 1040 Package

**2009vN.N** is the top-level directory of the schemas for the Tax Year 2009, where N.N is the two-digit version number. It contains the following folders:

**Common** contains the XML schemas that are common to all MeF return/extension types. It contains the following XML schemas:

- **SOAP.xsd** defines the XML structure of the SOAP envelope, SOAP header and the SOAP.
- **efileMessageCommon.xsd**, **efileMessageEMS.xsd**, **efileMessageIFA.xsd**, and **efileAttachments.xsd** define the transmission header, transmission manifest and the acknowledgement XML structures.
- **efileTypes.xsd** defines the global data types for MeF schemas.

- **BinaryAttachment.xsd** defines the content model for the binary attachment XML Document.

**IndividualIncomeTax** is the top-level directory of the 1040 Individual Filer schema. It contains the following folder:

- **Common** is a top-level directory for schemas for all attachments and forms shared among 1040 (supported and future) return types. It contains the following:
  - **Dependencies**, which contain schemas for the supporting XML documents/attachments common to 1040 return types.
  - **Various Shared Form directories**, which each contain the schemas for the shared forms and supporting XML documents/attachment between 1040 return types.
- **IND1040** is a directory for Form 1040 specific schemas not included in the above directories. It contains the following:
  - **Return1040.xsd** defines the XML structure for the return and wraps around the ReturnHeader1040 and ReturnData1040 XML documents in a transmission file.
  - **ReturnData1040.xsd** defines the content model for a Form 1040 return. This includes defining all XML forms and schedules in the return.
  - **ReturnHeader1040.xsd** defines the structure and global data elements for the Form 1040 return.

**CorporateIncomeTax**, is a hierarchy of Corporate (1120x) schemas used by Individual Filer schemas.

## 2.10.2 Form 4868 XML Schema File Structure

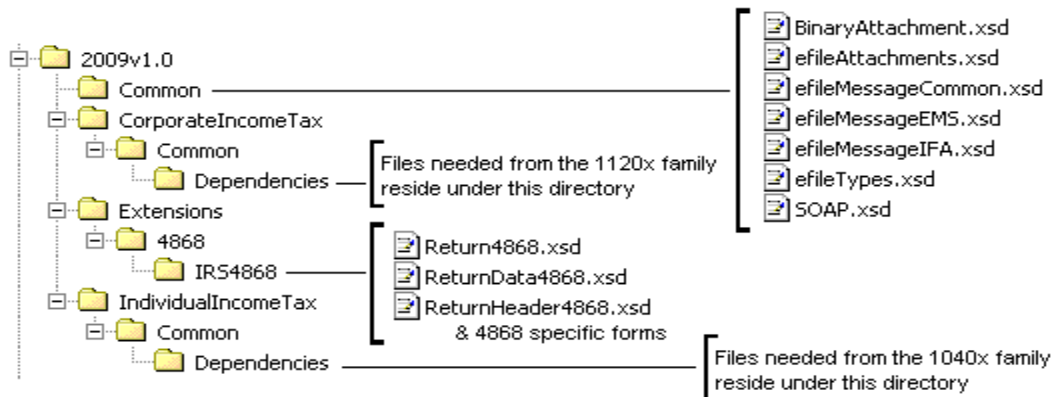

Figure 2-23 4868 Package

**2009vN.N** is the top-level directory of the schemas for the Tax Year 2009, where N.N is the two-digit version number. It contains the following folders:

**Common** contains the XML schemas that are common to all MeF return/extension types. It contains the following XML schemas:

- **SOAP.xsd** defines the XML structure of the SOAP envelope, SOAP header and the SOAP.
- **efileMessageCommon.xsd**, **efileMessageEMS.xsd**, **efileMessageIFA.xsd**, and **efileAttachments.xsd** define the transmission header, transmission manifest and the acknowledgement XML structures.
- **efileTypes.xsd** defines the global data types for MeF schemas.
- **BinaryAttachment.xsd** defines the content model for the binary attachment XML Document.

**Extensions** is the top-level directory of the Individual Extension Filer schemas. It contains the following folder:

- **4868** is a directory for Form 4868 specific schemas. It contains the following:
  - **Return4868.xsd** defines the XML structure for the return and wraps around the ReturnHeader4868 and ReturnData4868 XML documents in a transmission file.
  - **ReturnData4868.xsd** defines the content model for a Form 4868 return. This includes defining all XML forms and schedules in the return.
  - **ReturnHeader4868.xsd** defines the structure and global data elements for the Form 4868 return.

**CorporateIncomeTax**, is a hierarchy of Corporate (1120x) schemas used by Individual Extension Filer schemas.

**IndividualIncomeTax**, is a hierarchy of Individual (1040) schemas used by Individual Extension Filer schemas.

### 2.10.3 1120/1120-F/1120S XML Schema File Structure

The explanation for the 1120 form family XML schema structure is on the next page.

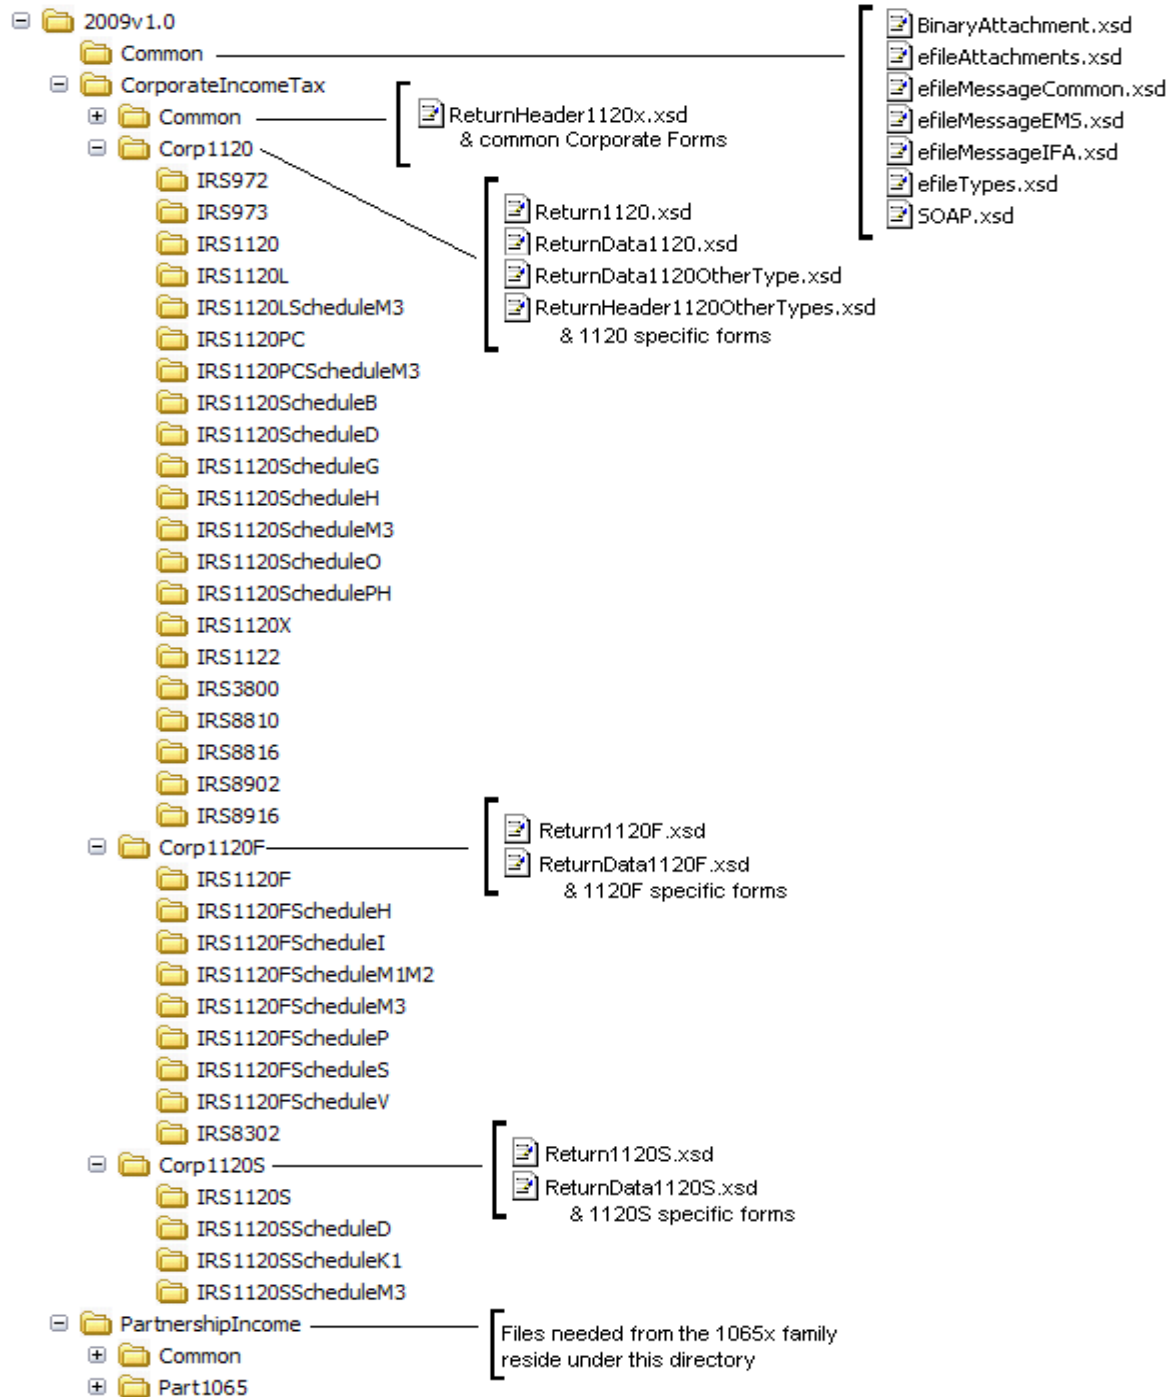

Figure 2-24: 1120/1120-F/1120S Package

The following describes the MeF Schema File Structure for Form 1120/1120-F/1120S (Figure 2-24 on the previous page):

**2009v1.0** is the top-level directory of the schemas for the tax year 2009, version “1.0”. It contains the following folders:

- **Common**, which contains the XML schemas that are common to all MeF return and extension types. It contains the following:
  - **BinaryAttachment.xsd**, which defines the binary attachment document XML structure
  - **efileAttachments.xsd**, which defines the attachment document XML structure
  - **efileMessageCommon.xsd**, which defines the transmission header, transmission manifest, and acknowledgement XML structures for the basic message.
  - **efileMessageIFA.xsd**, which defines the transmission header, transmission manifest, and acknowledgement XML structures for the IFA channel.
  - **efileTypes.xsd**, which defines the global data types for MeF schemas.
  - **SOAP.xsd**, which defines the XML structure of the SOAP envelope, SOAP header and the SOAP.
- **CorporateIncomeTax**, which is a directory for corporate income related (1120/1120-F/1120S) schemas. It contains the following folders:
  - **Common**, which is a top-level directory for schemas for all attachments and forms shared among forms 1120, 1120-F and 1120S return types. It contains the following:
    - **ReturnHeader1120x.xsd**, which defines the structure and global data elements for the 1120, 1120-F, and 1120S tax returns.
    - **Dependencies**, which contain schemas for the supporting XML documents/attachments common to 1120, 1120-F, and 1120S return types.
    - **Various Shared Form directories**, which each contain the schemas for the shared forms and supporting XML documents/attachment between 1120, 1120-F, and 1120S return types.
  - **Corp1120**, which contains schemas specific to the 1120 return type. It contains the following:
    - **Return1120.xsd**, which defines the XML structure for the tax return and wraps around the ReturnHeader1120x, ReturnData1120, ReturnData1120OtherType, and ReturnHeader1120OtherTypes XML documents in a transmission file.
    - **ReturnData1120.xsd**, which defines the content model for an 1120 or an 1120 consolidated tax return. This includes defining all XML forms and schedules in the tax return.
    - **ReturnData1120OtherType.xsd**, which defines the content model for an 1120 parent; 1120, 1120L, and 1120PC subsidiary; 1120, 1120L, and 1120PC sub-consolidated; 1120, 1120L, and 1120PC eliminations; and 1120, 1120L, and 1120PC adjustments tax returns. This includes defining all XML forms and schedules in the tax return.
    - **ReturnHeader1120OtherTypes.xsd**, which defines the content of the ReturnHeader element for the 1120 parent; 1120, 1120L, and 1120PC subsidiary; 1120, 1120L, and 1120PC sub-consolidated; 1120, 1120L, and 1120PC eliminations; and 1120, 1120L, and 1120PC adjustments tax returns.

- **List of all form folders not shared with the 1120-F and 1120S**, which contain the schemas for the forms and supporting XML documents/attachment that are specific for the 1120 return type.
- **Corp1120-F**, which contains schemas specific to the 1120-F return type. It contains the following folders:
  - **Return1120F.xsd**, which defines the XML structure for the 1120-F tax return and wraps around the ReturnHeader1120x and ReturnData1120-F XML documents in a transmission file.
  - **ReturnData1120F.xsd**, which defines the content model for an 1120-F tax return. This includes defining all XML forms and schedules in the tax return.
  - **List of all form folders not shared with the 1120 and 1120-S**, which contain the schemas for the forms and supporting XML documents/attachment that are specific for the 1120-F return type.
- **Corp1120S**, which contains schemas specific to the 1120S return type. It contains the following folders:
  - **Return1120S.xsd**, which defines the XML structure for the 1120S tax return and wraps around the ReturnHeader1120x and ReturnData1120S XML documents in a transmission file.
  - **ReturnData1120S.xsd**, which defines the content model for an 1120S tax return. This includes defining all XML forms and schedules in the tax return.
  - **List of all form folders not shared with the 1120 and 1120-F**, which contain the schemas for the forms and supporting XML documents/attachment that are specific for the 1120S return type.
- **PartnershipIncome**, which is a directory for partnership income related (1065/1065-B) schemas. It contains the following folders that contain common forms shared with 1120/1120-F/1120S:
  - **Common**, which is a top-level directory for schemas for all attachments and forms that are shared among forms common to 1120/1120-F/1120S and 1065/1065-B return types. It contains the following:
  - **Various Shared Form directories**, which each contain the schemas for the shared forms and supporting XML documents/attachment between 1120/1120-F/1120S and 1065/1065-B return types.

## 2.10.4 7004 XML Schema File Structure

Figure 2-25: 7004 Package

The following describes the MeF Schema File Structure for Form 7004 (Figure 2-25):

**2007v2.0** is the top-level directory of the schemas for the tax year 2007, version “2.0”. Note that reference to tax year is a means of controlling version releases each processing year. Form 7004 is not issued each tax year and, therefore, does not have a tax year.

**2007v2.0** contains the following folders:

- **Common**, which contains the XML schemas that are common to all MeF return and extension types. It contains the following:
  - **BinaryAttachment.xsd**, which defines the binary attachment document XML structure
  - **efileAttachments.xsd**, which defines the attachment document XML structure
  - **efileMessageCommon.xsd**, which defines the transmission header, transmission manifest, and acknowledgement XML structures for the basic message.
  - **efileMessageIFA.xsd**, which defines the transmission header, transmission manifest, and acknowledgement XML structures for the IFA channel.
  - **efileMessage.xsd**, which defines the transmission header, transmission manifest and the acknowledgement XML structures.
  - **efileTypes.xsd**, which defines the global data types for MeF schemas.
  - **SOAP.xsd**, which defines the XML structure of the SOAP envelope, SOAP header and the SOAP.

- **CorporateIncomeTax**, which is a directory for corporate income related (1120/1120-F/1120S) schemas and shared payment schemas. It contains the following folders:
  1. **Common**, which is a top-level directory for schemas for all attachments shared among forms common to 1120, 1120-F, 1120S, and 7004 return types. It contains the following folder:
    - **Dependencies**, which contain schemas for the supporting XML documents/attachments common to 7004 and/or the 1120/1120-F/1120S return types. It includes the following:
      - **IRSPayment.xsd**, which defines the XML structure of payments.
      - **MixedStraddleAccountElectionStatement**, which defines XML schema for extension type elections.
- **Extensions**, which is a directory for extension forms (7004/8868) schemas and contains the following:
  1. **7004**, which is a top-level directory for schemas for all forms and attachments shared among forms common to 7004 return types. It contains the following:
    - **ReturnHeader7004.xsd**, which defines the structure and global data elements for the 7004 return.
    - **ReturnData7004.xsd**, which defines the common content of the ReturnHeader element for the 7004 return.
    - **Return7004.xsd**, which defines the XML structure for the 7004 return and wraps around the ReturnHeader and ReturnData7004 XML documents in a transmission file.
  2. **IRS7004**, which contains schemas specific to the 7004 return type. It contains the following:
    - **ConsolidatedGroupMemberSchedule**, which defines the XML structure of the Consolidated Group Member Schedule.
    - **IRS7004.xsd**, which defines the XML structure of the 7004 return.

## 2.10.5 Exempt Organization Forms XML Schema File Structures

### 990/990-EZ/990-PF package

Figure 2-26: 990/990-EZ/990-PF Package

The following section describes the MeF Schema File Structures for Exempt Organization Filings for the 990, 990-EZ, and 990-PF package shown in Figure 2-26.

**2008vN.N** is the top-level directory of the schemas for tax year 2008, version not specified. It contains the following folders:

**Common** contains the XML schemas that are common to all MeF return/extension types:

- **SOAP.xsd** defines the XML structure of the SOAP envelope, SOAP header and the SOAP.

- **efileMessageCommon.xsd**, **efileMessageIFA.xsd**, and **efileAttachments.xsd** define the transmission header, transmission manifest and the acknowledgement XML structures.
- **efileTypes.xsd** defines the global data types for MeF schemas.
- **BinaryAttachment.xsd** defines the content model for the binary attachment XML Document.

**CorporateIncomeTax** is a hierarchy of Corporate (1120x) schemas used by Exempt Organization schemas.

**PartnershipIncome** is a hierarchy of Partnership (1065x) schemas used by Exempt Organization schemas.

**TEGE** is the top-level directory of the 990/990-EZ/990-PF Exempt Organization schemas. It contains the following folders:

**Common** is a directory for schemas for all attachments and dependencies shared between Exempt Organization Forms 990 and 990-EZ. It contains the following:

- **ReturnHeader990x.xsd** defines the structure and global data elements for the Forms 990 and 990-EZ returns.
- **Dependencies** contain schemas for the supporting XML documents/attachments common to Forms 990, 990-EZ and 990-PF.

**TEGE990** is a directory for Form 990 related schemas not included in the above directories. It contains the following:

- **Return990.xsd** defines the XML structure for the return and wraps around the ReturnHeader990x and ReturnData990 XML documents in a transmission file.
- **ReturnData990.xsd** defines the content model for a Form 990 return. This includes defining all XML forms and schedules in the return.

**TEGE990EZ** is a directory for Form 990-EZ related schemas not included in the above directories. It contains the following:

- **Return990EZ.xsd** defines the XML structure for the return and wraps around the ReturnHeader990x and ReturnData990EZ XML documents in a transmission file.
- **ReturnData990EZ** defines the content model for a Form 990-EZ return. This includes defining all XML forms and schedules in the return.

**TEGE990PF** is a directory for Form 990-PF related schemas not included in the above directories. It contains the following:

- **Return990PF.xsd** defines the XML structure for the return and wraps around the ReturnHeader990x and ReturnData990PF XML documents in a transmission file.
- **ReturnData990PF** defines the content model for a Form 990-PF return. This includes defining all XML forms and schedules in the return.

## 990-N Package

Figure 2-27: 990-N Package

**2007v1.0** is the top-level directory of the schemas for the tax year 2007, version 1.0. It contains the following folders:

**Common** contains the XML schemas that are common to all MeF return/extension types. It contains the following XML schemas:

- **SOAP.xsd** defines the XML structure of the SOAP envelope, SOAP header and the SOAP.
- **efileMessageCommon.xsd**, **efileMessageEMS.xsd**, **efileMessageIFA.xsd**, and **efileAttachments.xsd** define the transmission header, transmission manifest and the acknowledgement XML structures.
- **efileTypes.xsd** defines the global data types for MeF schemas.
- **BinaryAttachment.xsd** defines the content model for the binary attachment XML Document.

**TEGE** is the top-level directory of the 990/990-EZ/990-PF/990-N Exempt Organization schema. It contains the following folder:

**TEGE990N** is a directory for Form 990-N specific schemas not included in the above directories. It contains the following:

- **Return990N.xsd** defines the XML structure for the return and wraps around the ReturnHeader990N and ReturnData990N XML documents in a transmission file.
- **ReturnData990N.xsd** defines the content model for a Form 990-N return. This includes defining all XML forms and schedules in the return.
- **ReturnHeader990N.xsd** defines the structure and global data elements for the Form 990-N return.

## 8868 XML Schema File Structure

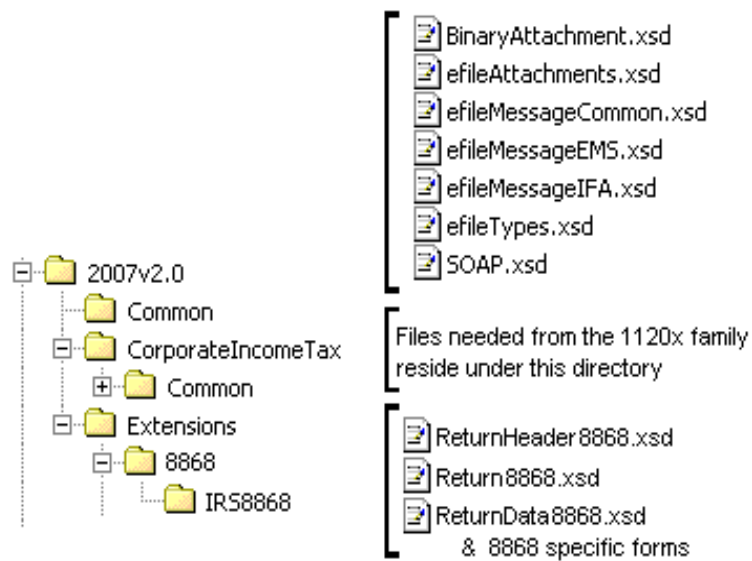

Figure 2-28: 8868 Package

The following section describes the MeF Schema File Structures for Exempt Organization Filings for the 8868 package shown in Figure 2-28 above.

**Extensions** is the top-level directory of the 8868 extension schemas. It contains the following:

**8868** is a directory for Forms 8868 related schemas. It contains the following:

- **Return8868.xsd** defines the XML structure for the extension and wraps around the ReturnHeader8868 and ReturnData8868 XML documents in a transmission file.
- **ReturnHeader8868.xsd** defines the structure and global data elements for the Form 8868 extension.
- **ReturnData8868** defines the content model for the Form 8868 extension.

## 1120-POL XML Schema File Structure

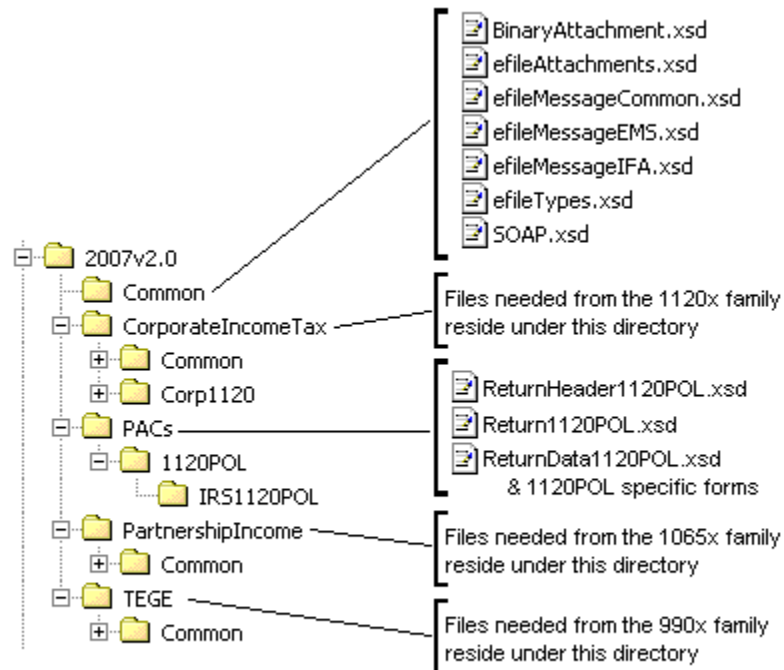

Figure 2-29: 1120-POL Package

The following section describes the MeF Schema File Structures for Exempt Organization Filings for the 1120-POL package shown in Figure 2-29 above.

**PACs** is the top-level directory of the 1120-POL schemas. It contains the following:

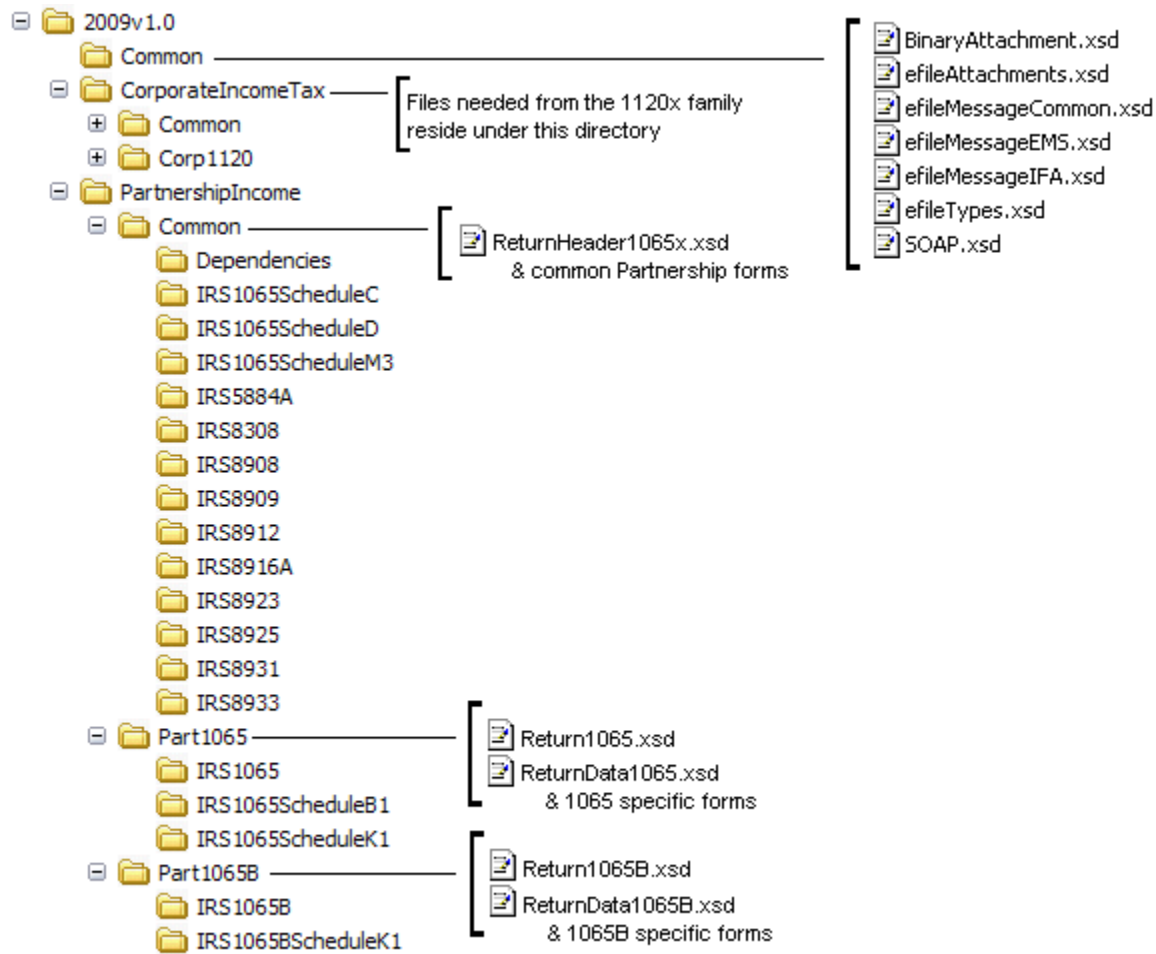

**1120POL** is a directory for Forms 1120-POL related schemas not included in the above directories. It contains the following:

- **Return1120POL.xsd** defines the XML structure for the tax return and wraps around the ReturnHeader1120POL and ReturnData1120POL XML documents in a transmission file.
- **ReturnHeader1120POL.xsd** defines the structure and global data elements for the Form 1120-POL tax return.
- **ReturnData1120POL** defines the content model for a Form 1120-POL tax return. This includes defining all XML forms and schedules in the tax return.

The schemas for the Exempt Organization forms may be found on the IRS.gov Web site at <http://www.irs.gov/charities/article/0,,id=129364,00.html>.

## 2.10.6 1065/1065-B XML Schema File Structure

**Figure 2-30: 1065/1065-B Package**

The following describes the MeF Schema File Structure for Form 1065/1065-B (Figure 2-30 above):

2009v1.0 is the top-level directory of the schemas for the tax year 2009, version “1.0”. It contains the following folders:

- **Common**, which contains the XML schemas that are common to all MeF return and extension types. It contains the following:
  - **BinaryAttachment.xsd**, which defines the binary attachment document XML structure
  - **efileAttachments.xsd**, which defines the attachment document XML structure
  - **efileMessageCommon.xsd**, which defines the transmission header, transmission manifest, and acknowledgement XML structures for the basic message.
  - **efileMessageIFA.xsd**, which defines the transmission header, transmission manifest, and acknowledgement XML structures for the IFA channel.
  - **efileTypes.xsd**, which defines the global data types for MeF schemas.

- **SOAP.xsd**, which defines the XML structure of the SOAP envelope, SOAP header and the SOAP.
- **CorporateIncomeTax**, which is a directory for corporate income related (1120/1120-F/1120S) schemas. It contains the following folders that contain common forms shared with 1065/1065-B:
  - **Common**, which is a top-level directory for schemas for all attachments and forms that are shared among forms common to 1120/1120-F/1120S and 1065/1065-B return types. It contains the following:
    - **Dependencies**, which contain schemas for the supporting XML documents/attachments common to 1120/1120-F/1120S and 1065/1065-B return types.
    - **Various Shared Form directories**, which each contain the schemas for the shared forms and supporting XML documents/attachment between 1120/1120-F/1120S and 1065/1065-B return types.
  - **Corp1120**, which contains schemas specific to the 1120 return type. It also contains the following folder which contains common forms shared with 1065/1065-B:
    - **IRS8902**, which contains the schemas for the shared form, IRS8902, and supporting XML documents/attachments common to 1120/1120-F/1120S and 1065/1065-B return types.
- **PartnershipIncome**, which is a directory for partnership income related (1065/1065-B) schemas. It contains the following folders:
  - **Common**, which is a top-level directory for schemas for all attachments and forms shared among forms 1065 and 1065-B return types. It contains the following:
    - **ReturnHeader1065x.xsd**, which defines the structure and global data elements for the 1065 and 1065-B tax returns.
    - **Dependencies**, which contain schemas for the supporting XML documents/attachments common to 1065 and 1065-B return types.
    - **Various Shared Form directories**, which each contain the schemas for the shared forms and supporting XML documents/attachment between 1065 and 1065-B return types.
  - **Part1065**, which contains schemas specific to the 1065 return type. It contains the following:
    - **Return1065.xsd**, which defines the XML structure for the tax return and wraps around the ReturnHeader1065x and ReturnData1065 XML documents in a transmission file.
    - **ReturnData1065.xsd**, which defines the content model for a 1065 tax return. This includes defining all XML forms and schedules in the tax return.
    - **List of all form folders not shared with the 1065-B**, which contain the schemas for the forms and supporting XML documents/attachment that are specific for the 1065 return type.
  - **Part1065B**, which contains schemas specific to the 1065-B return type. It contains the following folders:
    - **Return1065B.xsd**, which defines the XML structure for the tax return and wraps around the ReturnHeader1065x and ReturnData1065B XML documents in a transmission file.
    - **ReturnData1065B.xsd**, which defines the content model for a 1065-B tax return. This includes defining all XML forms and schedules in the tax return.

- **List of all form folders not shared with the 1065**, which contain the schemas for the forms and supporting XML documents/attachment that are specific for the 1065-B return type.

## 2.10.7 Excise Tax Forms 720/2290/8849 XML Schema File Structure

### 720 Package

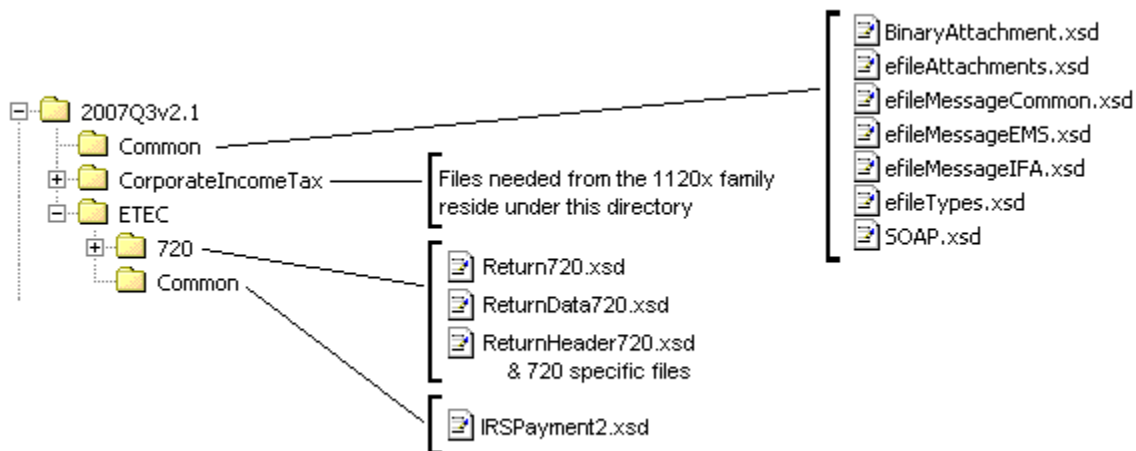

Figure 2-31: 720 Package

**2007Q3v2.1** is the top-level directory of the schemas for the tax year 2007, 3<sup>rd</sup> Quarter, version 2.1. It contains the following folders:

**Common**, which contains the XML schemas that are common to all MeF return/extension types. It contains the following XML schemas:

- **SOAP.xsd** defines the XML structure of the SOAP envelope, SOAP header and the SOAP.
- **efileMessageCommon.xsd**, **efileMessageEMS.xsd**, **efileMessageIFA.xsd**, and **efileAttachments.xsd** define the transmission header, transmission manifest and the acknowledgement XML structures.
- **efileTypes.xsd** defines the global data types for MeF schemas.
- **BinaryAttachment.xsd** defines the content model for the binary attachment XML Document.

**CorporateIncomeTax**, which is a hierarchy of Corporate (1120x) schemas used by Form 720.

**ETEC**, which is the top-level directory of the 2290/720/8849 Excise Tax e-Filing and Compliance schemas. It contains the following:

**Common**, which is a directory for schemas for all attachments and dependencies shared between Excise Tax e-Filing and Compliance Forms 2290 and 720. It contains the following:

- **IRSPayment2.xsd**, which defines the XML structure of payments for Forms 2290 and 720. This file is identical to the IRSPayment.xsd used by other tax types with the exception of including cents in the payment element.

**720**, which is a directory for Form 720 specific schemas not included in the above directories. It contains the following:

- **Return720.xsd**, which defines the XML structure for the extension and wraps around the ReturnHeader720 and ReturnData720 XML documents in a transmission file.
- **ReturnHeader720.xsd**, which defines the structure and global data elements for the Form 720 return.
- **ReturnData720.xsd**, which defines the content model for the Form 720. This includes defining all XML forms and schedules in the return.

## 2290 Package

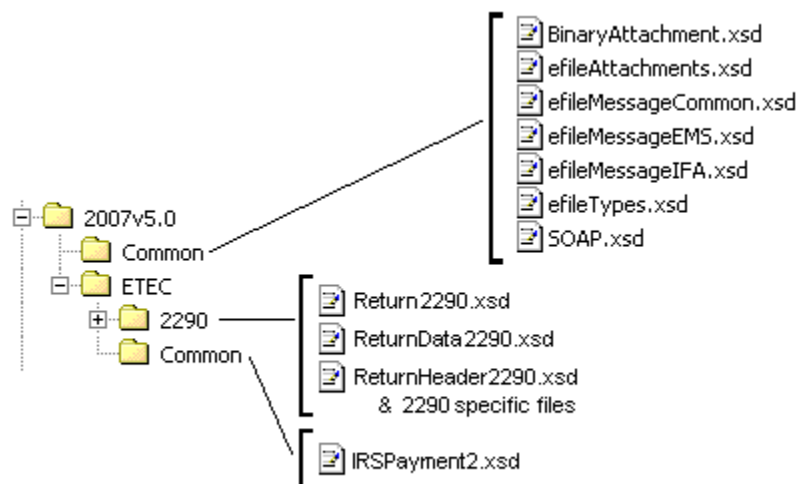

Figure 2-32: 2290 Package

**2007v5.0** is the top-level directory of the schemas for the tax year 2007, version 5.0. It contains the following folders:

**Common**, which contains the XML schemas that are common to all MeF return/extension types. It contains the following XML schemas:

- **SOAP.xsd**, which defines the XML structure of the SOAP envelope, SOAP header and the SOAP.
- **efileMessageCommon.xsd**, **efileMessageEMS.xsd**, **efileMessageIFA.xsd**, and **efileAttachments.xsd**, which defines the transmission header, transmission manifest and the acknowledgement XML structures.
- **efileTypes.xsd**, which defines the global data types for MeF schemas.
- **BinaryAttachment.xsd**, which defines the content model for the binary attachment XML Document.

**ETEC**, which is the top-level directory of the 2290/720/8849 Excise Tax e-Filing and Compliance schemas. It contains the following:

**Common**, which is a directory for schemas for all attachments and dependencies shared between Excise Tax e-Filing and Compliance Forms 2290 and 720. It contains the following:

- **IRSPayment2.xsd**, which defines the XML structure of payments for Forms 2290 and 720. This file is identical to the IRSPayment.xsd used by other tax types with the exception of including cents in the payment element.

**2290** is a directory for Form 2290 specific schemas not included in the above directories. It contains the following:

- **Return2290.xsd**, which defines the XML structure for the extension and wraps around the ReturnHeader2290 and ReturnData2290 XML documents in a transmission file.
- **ReturnHeader2290.xsd**, which defines the structure and global data elements for the Form 2290 return.
- **ReturnData2290.xsd**, which defines the content model for the Form 2290. This includes defining all XML forms and schedules in the return.

## Form 8849 Package

Figure 2-33: Form 8849 Package

**2007v4.0** is the top-level directory of the schemas for the tax year 2007, version 4.0. It contains the following folders:

**Common**, which contains the XML schemas that are common to all MeF return/extension types. It contains the following XML schemas:

- **SOAP.xsd**, which defines the XML structure of the SOAP envelope, SOAP header and the SOAP.

- **efileMessageCommon.xsd**, **efileMessageEMS.xsd**, **efileMessageIFA.xsd**, and **efileAttachments.xsd**, which defines the transmission header, transmission manifest and the acknowledgement XML structures.
- **efileTypes.xsd**, which defines the global data types for MeF schemas.
- **BinaryAttachment.xsd**, which defines the content model for the binary attachment XML Document.

**ETEC**, which is the top-level directory of the 2290/720/8849 Excise Tax e-Filing and Compliance schemas. It contains the following:

**8849**, which is a directory for Form 8849 specific schemas not included in the above directories. It contains the following:

- **Return8849.xsd**, which defines the XML structure for the extension and wraps around the ReturnHeader8849 and ReturnData8849 XML documents in a transmission file.
- **ReturnHeader8849.xsd**, which defines the structure and global data elements for the Form 8849 return.
- **ReturnData8849.xsd**, which defines the content model for the Form 8849. This includes defining all XML forms and schedules in the return.

### 3 MeF Fed/State Program

MeF implemented the following Fed/State Programs:

- Forms 990 and 1120 Fed/State Programs in January of 2006
- Form 1065 Fed/State Program in January 2007
- Form 1040 Fed/State Program in February 2010

The central feature of the MeF Fed/State program is the single point of submission and retrieval for all registered transmitters and State agencies. Federal and state submissions can be transmitted through Internet Filing Application (IFA) or Application-to-Application (A2A). States may retrieve state returns only through A2A.

The IRS and States agree to maintain open line of communication between designated staff on both managerial and technical levels to ensure successful management and operation of the MeF Fed/State program

The IRS role in the Fed/State program is to receive the state return and perform the minimal validation/workflow as explained in Section 3.3. MeF only validates the state submission manifest. MeF never validates the submission in the xml directory. Transmitters should work with the states directly on state return requirements, issues, questions, etc.

MeF will accept two kinds of submissions (1) IRS (federal) submissions and (2) State submissions. Each return/extension must be enclosed in a separate submission, but multiple submissions may be contained in a single message. The IRS and State submissions do not have to be transmitted to MeF together.

Both Federal and State returns must be in XML format. The federal returns must conform to the IRS valid schema versions. You can access the corporate and partnership State Master Schemas at <http://www.statemef.com/>. For more information, contact the State e-File Coordinator. A current list of State Coordinators is available on the [Federal/State e-file for Tax Professionals](#) page on IRS.gov

#### 3.1 State Acknowledgements and State Submission Manifest

States must use the MeF acknowledgement schema for creating their acknowledgement instances. MeF performs schema validation on the state acknowledgement list. If there is an error anywhere in the list, all acknowledgements are rejected back to the state and none are made available to the transmitter. The state must correct the problem and resubmit the entire list.

Transmitters must use the IRS State Submission Manifest for state returns.

For Tax Year 2009, the following updates were made for individual submissions:

- Primary SSN and Spouse SSN were added as optional elements in the State Submission

## Manifest

- Primary Name Control and Spouse Name Control were added as optional elements in the State Submission Manifest

The IRS State Submission Manifest has an optional schema version element length of “12” that is not compatible with the schema version element in the State Return Header, which is required and has length of “20”. The IRS State Submission Manifest will be corrected in Processing Year 2011. It is recommended that software developers not use the optional schema version element in the IRS State Submission Manifest for Processing Year 2010.

### 3.2 Linked Returns (Fed/State returns)

A State submission can be linked to the IRS submission by including the Submission ID element of the federal return in the IRS SubmissionID in State manifest. If the State submission is linked to an IRS submission (also referred to as a Fed/State return), the IRS will check to see if there is an accepted IRS submission under that Submission ID. If there is not an accepted federal return for that tax type, the IRS will deny the State submission and an acknowledgement will be sent to the transmitter. The state has no knowledge that the state return was denied (rejected) by the IRS.

**Note:** If you are going to link a State submission to an IRS submission, send in the IRS submission first and, after it has been accepted, send in the State submission.

If there is an accepted return under that Submission ID, then MeF will do minimal validation on the State submission that includes verifying that the State indicated in the State manifest is a participating state in the applicable 990, 1040, 1065 or 1120 Fed/State Program. MeF will then pass along to the State what the ERO/taxpayer sends in the State submission.

### 3.3 Unlinked State Returns (State Standalone returns)

If the ERO does not link the State return to a previously accepted federal return (also referred to as State Standalone return), then MeF will perform minimal validation as stated above that will include verifying that the State allows State Standalone returns and then will pass along to the State the entire State submission that was sent in by the ERO/taxpayer. Note: The state return is made up of a state and a federal portion. The taxpayer provides both components based on what is required by the state. The IRS passes to the state just the information that has been provided by the taxpayer.

### **3.4 Workflow for Individual, Corporate, Partnership and Exempt Organization State Returns**

- 1) Transmitter sends state return to IRS
- 2) IRS performs minimal validation:
  - a) If the state return is linked to the federal return, IRS will check:
    - i) the IRS SubmissionId in the State Submission Manifest matches an accepted federal submission for that tax year and submission type
    - ii) the State participates in the Fed/State Program for that return type and tax year and:
    - iii) For Business returns: the Filer EIN is a valid number in the IRS database and the name control matches the IRS database. MeF does not reject the state submission if there is a mismatch in this instance, but does forward the results to the state.
    - iv) For individual returns: the Primary SSN is a valid number in the IRS database (for joint returns, either the Primary SSN or the Spouse SSN must match the IRS database). MeF will check the SSN against the federal return and reject if it doesn't match. If the state return is not rejected, MeF forwards the SSN and name control match to the state
  - b) If state return is unlinked, IRS will check that the State participates in the Fed/State Program.
- 3) If the state return passes the validation above, MeF makes the state return available to the state
- 4) State retrieves state returns from MeF
- 5) State sends receipt for state return to MeF
- 6) State processes state return and sends state acknowledgement to MeF
- 7) Transmitter retrieves state acknowledgement from MeF
- 8) State retrieves Acknowledgement Notification (status that transmitter retrieved the state acknowledgement)

#### **3.4.1 Exempt Organization Fed/State Program – Providing Copy of IRS Return to State**

For Forms 990/990-EZ/990-N/990-PF, a filer can request that a copy of the IRS return be provided to one or more participating States. Upon receipt of the request, IRS will validate that the State(s) is participating in the Fed/State program. If it is, then IRS will send a redacted copy

of the accepted return to the State agency(s). Items that are always redacted from the state copy include, but are not limited to, the PIN or Form 8453-EO, the request for the copy and any payment information included with Form 990-PF. In addition, depending on the state, the IRS may also redact the Schedule B if the state does not require it. MeF will process the IRS submission and will generate an acknowledgement for every IRS submission and copy of IRS Forms 990/990-EZ/990-N/990-PF forwarded to a State. Each State is responsible for validating its State submissions and for generating a State acknowledgement for each State submission, which will be returned to the IRS for retrieval by the transmitter. If the Federal 990X return is rejected, no copies will be forwarded to the State.

### 3.4.2 Status Record for State Returns

While the state return is being processed, the transmitter can request the status of the submission. In A2A, the Status Record is retrieved by service requests Get New Submission Status, Get Submission Status or Get Submissions Status. In IFA, the Status Record is retrieved by selecting the Retrieve (Production or Test) Submission Status Records option.

#### Status Record Definitions

Status Name	Description
RECEIVED	The state submission was received by MeF
READY FOR PICKUP	The state submission passed MeF validation and has been made available for the state to retrieve.
SENT TO STATE	The state made a request to retrieve state submissions. The MeF system has marked this state submission as being retrieved by the state. Note: If the state lost connection when trying to retrieve this submission, MeF may have marked it as being retrieved but the state has not gotten the submission yet and it will not be returned in a subsequent Get New Submissions request.
RECEIVED BY STATE	The state sent MeF a receipt that they retrieved the state submission.
ACKNOWLEDGED RECEIVED FROM STATE	The state sent MeF a state acknowledgement for this submission.
ACKNOWLEDGEMENT RETRIEVED	The acknowledgement for the state submission has been retrieved by the transmitter.
NOTIFIED	The state has been notified that the state acknowledgement has been retrieved by the transmitter.
DENIED BY IRS	The state submission did not pass MeF validations. The return was rejected back to the transmitter. The state does not receive any status from MeF on this return.

[See Section 5.4 Status Record for Federal Returns](#) for additional information.

Here is an example of the statuses provided for a state return that passed Fed/State validation:

**Submission Status History:**

Submission Status	Status Date ▼	Status Record Retrieval Date
Notified	2009-09-16	2009-09-16
Acknowledgement Retrieved	2009-09-16	2009-09-16
Acknowledgement Received from State	2009-09-16	2009-09-16
Received by State	2009-09-16	2009-09-16
Sent to State	2009-09-16	2009-09-16
Ready for Pick-Up	2009-09-16	2009-09-16
Received	2009-09-16	2009-09-16

Here is an example of the statuses provided for a state return that did not pass Fed/State validation:

**Submission Status History:**

Submission Status	Status Date ▼	Status Record Retrieval Date
Acknowledgement Retrieved	2009-09-17	2009-09-17
Denied by IRS	2009-09-17	2009-09-17
Received	2009-09-17	2009-09-17

The Status Record is not proof a return was accepted or rejected and includes the following statement:

This status record provides information about what step in the process the return has completed. It is not proof that the return was Accepted or Rejected. You must retrieve the Acknowledgement File and keep with the return records to prove the return was Accepted or Rejected.”

When a state submission is sent to the state agency, IRS provides additional data based on its processing of the state return. The IRS data for business and individual returns can be found in the MeF State and Trading Partners Reference Manual.

## **4 Transmission Methods for MeF**

The MeF system allows you to transmit tax returns and extensions to the IRS through two channels: MeF Internet Filing Application (IFA), and MeF Application-to-Application (A2A).

### **4.1 Transmitting Through Application-to-Application (A2A)**

The following section describes how to transmit a file using A2A and information regarding A2A security.

#### **4.1.1 Security Directive Rules of Behavior for Access to IRS Business Systems**

The following is provided as official guidance to manage system security for systems using the Application-to-Application (A2A) interface to IRS Systems. It is provided for software developers, operational managers, Third Party Transmitters, States, system administrators, etc...

Internal Revenue Service (IRS) Third Party Transmitters and State Trading Partners shall carry out their respective responsibilities for ensuring information systems security and taxpayer privacy commensurate with the sensitivity of the information under their control. This publication provides policies and guidance to be followed by registered organizations to carry out their respective responsibilities in information systems security. Third party transmitters must further establish a security policy and implement automated mechanisms, which can uniquely identify, authenticate, authorize and track all individual users of the applications and machines that use MeF Web services. The third party and its principal will be held responsible for any violation of security conditions identified in publication 4164 by or through their system regardless of what individual might have been directly responsible, whether an employee of the third party organization, an authorized external user of its system, or an unauthorized external user of that system.

IRS e-services registered users must provide true, accurate, current and complete information. IRS sensitive information used to access the IRS Registered User Portal (RUP) including e-services passwords, System IDs, usernames and PINs must be protected and comply with the requirements set forth and agreed to by responsible parties as part of the IRS e-services registration process.

Users shall immediately notify the IRS at 1-866-255-0654 (international callers use 512-416-7750) of any unauthorized use of passwords or accounts, or any other breach of security. In the event that the user experiences a Login failure that leads them to believe that their account has been compromised, the registered user should immediately contact the IRS at the numbers provided above.

##### **4.1.1.1 Penalty for Non-Compliance**

A2A users are using an Official United States Government System, which may be used only for authorized purposes. The Government will monitor and audit the usage of this system, and all persons are hereby notified that the use of this system constitutes consent to such monitoring and auditing. Unauthorized attempts to upload information and/or change information on these Web sites, and any attempts to defraud the government are strictly prohibited and subject to

prosecution under the Computer Fraud and Abuse Act of 1986 and Title 18 U.S.C. Sec. 1001 and 1030. Termination of the user's to conduct business with the IRS, and other penalties may apply.

#### **4.1.1.2 Compliance with U.S. Internet Cryptographic Standards**

All transmitters are advised to use software that supports the U.S. Internet Standards for A2A or Browser-based access. The software needs to comply with U.S. Internet Standards for use of Cryptography in accordance with guidance from the Bureau of Industry and Security, U.S. Department of Commerce ([www.bis.doc.gov](http://www.bis.doc.gov)).

#### **4.1.1.3 Compliance Enforcement**

The IRS retains the right to conduct random, unannounced and unscheduled onsite inspections of any facility using the A2A functionality. These visits will be solely for ensuring compliance with the IRS Security policies specified in section 4, especially the encrypted storage of at rest passwords and the implementation of automated mechanisms which can uniquely identify, authenticate, authorize, and track all individual users of the applications and machines. Any non-compliance will result in immediate termination of the A2A connection privileges until such time the third party can demonstrate compliance. Repeated instances of non-compliance will result in permanent removal of permissions to utilize the A2A functionality of the MeF system.

#### **4.1.1.4 Data Removal**

The IRS requires removal of taxpayer data from systems that are no longer used for the purpose of processing and transmitting taxpayer data. On systems running any Windows operating system, an Administrator should reduce the size of all Windows page files (pagefile.sys) by at least one megabyte on each available hard drive containing a page file. Administrators should also clear all \temp directories and, if using a Web browser for processing or transmitting, clear all temporary files and caches. If the system hard drives will not be sanitized by degaussing, then files containing taxpayer data must be wiped using a file erasure program that performs at least three file overwrites or that meets NIST standards for file data destruction. If a "slack space" data destruction utility is available, it should also be used. After making the above changes, the system should be rebooted. Systems utilizing any other operating systems should be sanitized using methods similar to those described above.

### **4.1.2 Registration for A2A credentials**

The A2A registration and enrollment process for both Transmitters and State Trading Partners and their respective application systems is an automated process.

The Automated Enrollment (AE) application was developed to replace the manual enrollment of application systems for A2A Web Services. The AE application will provide a user interface for enrolling and maintaining application systems.

The AE application is not available to a Third Party Transmitter who supports Excise Tax Forms

720, 2290, or 8849.

Transmitters must apply to become an Authorized IRS e-file Provider by filling out an IRS e-file application online, if they have not previously completed the e-file application process. State Trading Partners will need to complete a new IRS e-file application to participate in the Modernized e-File Programs, even if they have a previous application for their other e-file programs. The IRS e-file application must indicate the form types submitted (such as, 990, 1040, 1120, 1120-POL, 1065, 720, 2290, or 8849) and it must indicate the transmission method of *MeF Internet, XML*.

The Principal or Responsible Official who is completing or revising the IRS e-file application must also delegate one or more persons to access the AE application and enroll application systems for their organization. This is done by accessing the IRS e-file application and adding the delegated users with the authority of *MeF System Enroller*. Each of the MeF System Enrollers will need to complete the e-services registration process, which includes confirming their registration with a token they receive through the mail after they have successfully completed their initial registration. Once the MeF System Enrollers have confirmed their registration, they will be able to log into the existing RUP and access the AE application to enroll and maintain their application systems. The authorized delegated user can:

- Enroll, un-enroll, activate, inactivate, and update Application System IDs (ASIDs) for their organization
- Replace the certificate of a previously enrolled ASID
- Select “Password” or “Certificate” as the Credential Type for an ASID
- Change the credential type from “Password” to “Certificate” or “Certificate to Password”
- Reset the password for a previously enrolled ASID

The Automated Enrollment (AE) External User Guide describes the User Interface for the AE application and can be found on IRS.gov at:  
<http://www.irs.gov/efile/article/0,,id=171946,00.html>.

#### **4.1.3 Strong Authentication**

The IRS is offering strong authentication, which will affect authentication techniques for all A2A Web services. The strong authentication certificate will replace the password and will require a modification to the WSDLs. Each Transmitter and State will be required to register their certificate with MeF through the AE application. You must use the set of files sent to you to build your application so that it can use strong authentication (IRS WSDL version 6.1 or later, or MeF Header.xsd file containing the string 'AppSysID').

**Strong Authentication is the preferred method of authentication, but has not been made mandatory at this time, however users need to prepare as the IRS will require Strong Authentication in the near future.** It is strongly suggested that you start testing and using certificates as soon as possible. It is recommended that a new ATS client be added for developing and testing digital signature code for MeF processing prior to converting existing client applications over to use strong authentication.

A guide is also available that explains the integration and uses of this IRS-provided client code sample to support certificate-based authentication for MeF A2A Web services. In addition to the code itself, this guide provides necessary information for developers to use when integrating the new feature into client software that communicates with the IRS A2A Web services. This guidance is relevant both to client code that will be developed in the future and to pre-existing client code not currently using digital signatures to sign Simple Object Access Protocol (SOAP) messages. If interested in obtaining the Strong Authentication User Guide, please contact the e-help Desk at 1-866-255-0654.

#### **4.1.4 Certificate Management**

A2A Transmitters and States may use digital certificates (X.509) versus passwords upon proper enrollment and registration of the certificate. Encryption of the signing key is important on your system. **Do not store an unencrypted copy of the signing key on your system.** The signing key should be stored in a standard encrypted key store. The IRS will provide Transmitters and States with a pair of libraries to perform signing. These libraries are detailed in Appendix A of the Strong Authentication User Guide. One library is for .NET support and the other code uses the Java support for Web Services. Each of these libraries will use the standard key storage for their environment, whether Windows' certificate store, PKCS#12 (for .NET), or a standard Java key store such as JCEKS or JKS (for Java). Always protect Key store passwords used to encrypt signing keys. For problems associated with certificate management, please contact the e-help Desk at 1-866-255-0654 for assistance.

#### 4.1.5 Transmitting through MeF Application-to–Application (A2A)

Transmitters and States communicate with the MeF system using a series of service requests that are accomplished using messages. The service requests include:

MeF Application-to-Application		
SERVICE REQUEST	TRANSMITTER	STATE AGENCY
Send Submissions	X	
Get New Acknowledgements	X	
Get Acknowledgements	X	
Get Acknowledgement	X	
Get Acknowledgements by Message ID	X	
Get New Submission Status	X	
Get Submissions Status	X	
Get Submission Status	X	
Get New 2290 Schedule 1s	X	
Get 2290 Schedule 1s by Message ID	X	
Get 2290 Schedule 1s	X	
Get 2290 Schedule 1	X	
Get New Submissions		X
Get Submissions		X
Get Submission		X
Get Submissions by Message ID		X
Send Submission Receipts		X
Send Acknowledgements		X
Get New Acknowledgement Notifications		X
Get Acknowledgement Notifications		X
Get Acknowledgement Notification		X
Get Submission Reconciliation List		X
Initial Login (Password only)	X	X
Login	X	X
Logout	X	X
Change Password (Password only)	X	X
Request ETIN Status	X	X
Request ETIN Retrieval	X	X
Request List of State Participants	X	X

Fed/ State

All service requests are synchronous. The request is not complete until the originating system receives a response from MeF. The response contains the information requested, a confirmation, or an error. An error indicates a problem was encountered while processing the request.

Use GetSubmissionsByMsgID and GetAcknowledgementsByMsgID to retrieve submissions or acknowledgements previously retrieved with a GetNewSubmissions or GetNewAcknowledgements service request. You must pass the message ID used in the original GetNewSubmissions or GetNewAcknowledgements request as a parameter to the GetSubmissionsByMsgID and GetAcknowledgementsByMsgID request. These two services are often used to retrieve submissions or acknowledgements previously retrieved but lost due to a timeout.

#### 4.1.6 Password Management

**MeF was scheduled to stop supporting passwords after December 2008 and require all A2A systems use certificates for authentication in January 2009. This change was not implemented. Passwords will continue to be accepted until IRS notifies transmitters that certificates must be used.**

If the current password is stored in a sequential file, the Windows Registry or a relational database, it should be stored using triple DES or AES encryption standards. The application may also prompt the user for the password at startup. Transmission will be encrypted at the transport layer using encryption software containing a NIST-certified FIPS 140-2 compliant encryption module. Use the IFA option for communications with the IRS Systems, rather than storing an unencrypted copy of the password. **Do not use a script of clear text passwords in storage for authenticated transactions with the IRS.**

##### **Password Criteria:**

- Length – a minimum of 8 and a maximum of 30 alphanumeric characters
- Complexity – Use a minimum of one uppercase alpha, one lowercase alpha, one numeric and one special character. Please use at least one of each class of characters. The following set of special characters have been tested for use in passwords and tokens, Please use these special characters: period, comma, colon, semicolon, question mark, exclamation point, dollar sign, plus sign, equal sign, hyphen, underscore, asterisk, left parenthesis, right parenthesis, at sign (@), tilde (~), octothorpe (#), and caret (^).

Do not use single quote ('), double quote ("), ampersand (&), left brace (<), right brace (>), or percent (%).

- Age – do not reuse passwords (20% of password must change, random character changes, no incrementing). Passwords must be changed no less than every 30 days, but cannot be changed more than once every 24 hours. Password reset may be performed by a delegated user with the authority for MeF System Enroller. Change Password cannot be used after the password has expired.

When 15 days have expired since your last password change, you will receive a password change reminder as part of the Login response.

**Note:** If you are caching, it is recommended that you clear the cache after changing your password. This will eliminate any possibility of accidentally submitting the old password.

Failures during a password change are possible. After such a failure, a program cannot be sure whether the system considers it has the new password or the old password. After a failure during the password change, make sure the rejection of the change was not because the new password is invalid.

The next login should typically use the new password. If it fails, log in using the old password. If this also fails, do not try any further. The authorized delegated user should reset the password.

Transmitters and States must immediately inform the IRS of any suspected breach of passwords associated with the MeF processing by contacting the e-help Desk at 1-866-255-0654.

Encryption and decryption of passwords will typically be performed in memory; unless you are using relational database software with built-in encryption. Standard facilities for encryption

are available, and you must use a standardized encryption algorithm compliant with triple Data Encryption Standard (DES) or Advanced Encryption Standard (AES). Remember, you will be encrypting very small amounts of data. An example of .NET encryption of data to go into a registry can be found at <http://msdn2.microsoft.com/en-us/library/k62k71x0.aspx>. To store encrypted information, refer to <http://msdn2.microsoft.com/enus/library/aa302406.aspx>.

To use the built-in Triple-DES support in Java (J2SE 1.4.2 and later, existing as an extension in earlier versions), applications should use the Cipher class. This, API is found at <http://java.sun.com/j2se/1.4.2/docs/api/javax/crypto/Cipher.html>. To encrypt or decrypt a single password using “Cipher”, call the init method, and then the do Final method with your data (the password for encrypt, the binary version of the stored data for decrypt). Creating your object of the Cipher class involves using the Cipher.getInstance method (Cipher.getInstance (“DESede/CBC/PKCS5Padding”) for Triple-DES in version 1.4.2). The cipher key must be the correct size (112 or 168 bits for Triple-DES, 128 bits for AES).

**Note:** By clicking on any of the links in this section, you will leave the IRS Web site and enter a privately owned Web site created, operated and maintained by a private business. The information that this private business collects and maintains as a result of your visit to its Web site may differ from the information that the IRS collects and maintains. (Please see the IRS Web site privacy and security notice for privacy protections IRS provides to Web site visitors). By linking to this private business, the IRS is not endorsing its products, services, or privacy or security policies. We recommend you review the business's information collection policy or terms and conditions to fully understand what information is collected by this private business.

**Password Reset** –Automated Enrollment provides authorized delegated users the ability to reset the password for a previously enrolled Application System IDs (ASIDs)

For more information about A2A, refer to the MeF State and Trading Partners Reference Guide and the MeF Submission Composition Guide.

#### 4.1.7 General Information and Lessons Learned

- **A2A SSL Certificates**

Before any system can transact A2A business with MeF, the appropriate certificates must be loaded onto your system. The certificates are the same for Multipurpose Internet Mail Extension (MIME), Direct Internet Message Encapsulation (DIME) users and Message Transmission Optimization Mechanism (MTOM) users. There are five certificates, and all five are provided to you by the IRS in a single zip file. These certificates must be used for strong authentication services. To obtain the certificates, contact the e-help Desk at 1-866-255-0654.

- **Strong Authentication**

A separate Application System ID must be used for testing digital certificates. You must also upload your digital certificate to the IRS while enrolling your new system using Automated Enrollment. You must also rebuild your services using the 6.1 WSDLs because of changes made to some of the services. Once you have enrolled a system, uploaded your certificate and built services based on the new WSDLs, you can test digital certificates. There are several things to keep in mind during this testing:

- There is no Initial Login service associated with strong authentication like there is for login/password. Begin testing using the login service. Only the login service should contain the binary signature. When your binary signature (login) has been authenticated, a login response will be returned to you. This response will contain a SAML, just as the current login response does. Use the SAML (not the binary signature) in all subsequent services in that session.
- If you are using a “Single Step” service, instead of login, then the Single Step service must contain the binary signature.
- Once you have successfully tested all services using digital certificates, you should convert all your Application System IDs to strong authentication (Digital Certificates).

- **System ID**

If certificates are used, the System ID is put in the AppSysID in the MeF Header for the first service in session only (usually login). AppSysID is put in the User Name Token in the Security Section of the SOAP Header for all subsequent services in same session. The ID links the MeF Header and the Security Section and the SOAP Body for the initial service only. The ID is not needed in subsequent services in the same session.

If passwords are used, put the System ID in the User Name Token in the Security Section for initial and subsequent service.

- **Service Request Encoding**

DO NOT USE base 64 encoding. All requests encoded in base 64 will be rejected.

- **.NET WSE Libraries**

.NET users should use Web Services Enhancements (WSE) 2.0 and 3.0. MeF supports DIME and MIME, and Message Transmission Optimization Mechanism (MTOM). WSE 2.0 contains the DIME classes. WSE 3.0 supports MTOM only. The DIME classes have been removed from 3.0. IRS is now supporting DIME, MIME and MTOM.

- **Attachment Encoding**

Each return is contained in its own zip file, and all return zip files must be placed into a container zip file. The container zip file is attached to the SendSubmissions service request. If a SendSubmissions service contains more than one attachment, the service will be rejected. The attachment must be MIME or DIME encoded.

- **Attachment Content Type**

Whether using IFA or A2A, “attachment content type” should be set to application/octet-stream, not application/zip.

- **2290 Schedule 1 Services**

Even though the Schedule 1 services are listed as Transmitter services, only 2290 Transmitters are authorized access to them.

- **State Communication Testing**

We provide generic state returns for states to test the GetSubmission portfolio of service requests. When ready to test these services, the state should call 202-283-7697, or e-mail Xan Ostro at [Xan.H.Ostro@irs.gov](mailto:Xan.H.Ostro@irs.gov) to have the generic returns loaded. (Approximately 10 returns are loaded per request.)

Upon receiving a GetNewSubmissions request, MeF will return the number of submissions requested (up to 100), if available for retrieval. All 10 will be returned in the first request unless you lower your MaxResults to a number under 10. It is recommended that you request two or three at a time. Lowering your MaxResults to 2 or 3 will permit you to test GetNewSubmissions more than once before having to request that additional state returns be loaded.

These generic returns are for testing service requests, not for validating the returns on your tax system. However, there will come a time when each state will want to test using actual state returns. It is recommended that you contact a Transmitter to transmit those returns. The IRS does not provide individual state returns, nor does the IRS transmit ‘live’ state returns (production). Using a Transmitter will more accurately reflect production conditions. If you cannot locate a Transmitter, the IRS will transmit for you, but you must supply your state returns and the zip file must follow the correct file structure. If it does not, MeF will reject the return and it will not be available for retrieval by the state. Refer to the MeF State and Trading Partners Reference Guide for a complete description of the zip file structure.

**Note:** If an incorrectly structured zip file is sent, the IRS will not correct the file structure for you.

- **Transmitting Large Attachments Using .NET**

Some customers have experienced problems transmitting large attachments (megabytes) when using .Net. If this happens, contact Xan Ostro at 202-283-7697 or at [Xan.H.Ostro@irs.gov](mailto:Xan.H.Ostro@irs.gov).

- **Clock Synchronization**

Make sure your system clock is accurately set. Failure to do so may cause a synchronization failure between your system and MeF. A synchronization failure will result in denial of access until you synchronize your clock. The two standard web sites for time are [www.nist.gov](http://www.nist.gov) or [www.usno.navy.mil/USNO/time](http://www.usno.navy.mil/USNO/time).

We recommend that you do not transmit between 1:59am and 6:00am when clocks are changed for Daylight Savings time in the fall.

- **URLs**

When using A2A use 'la', not 'la1' or 'la2' for ATS and Production unless instructed to do so by MeF. Use of 'la1' and 'la2' defeats load balancing and failover.

For ATS testing between November 2, 2009, and December 29, 2009, use 'la.alt' with the 'la' and 'alt' SSL certificates. Continue to use 'la' only with the 'la' SSL certificates for Production. Beginning December 30, 2009, use only 'la' with the 'la' certificates for both ATS and Production. Continuing to use 'la.alt' after January 3, 2010 may result in a write error. See the table below for the appropriate URL usage and timeframes:

URL	When to use in Production	When to use in ATS
<a href="https://la.www4.irs.gov/a2a/mef/Login">https://la.www4.irs.gov/a2a/mef/Login</a>	At all times	Prior to 11/02/2009 After 12/29/2009
<a href="https://la.alt.www4.irs.gov/a2a/mef/Login">https://la.alt.www4.irs.gov/a2a/mef/Login</a>	n/a	Start 11/02/2009 End 12/29/2009
<a href="https://la1.www4.irs.gov/a2a/mef/Login">https://la1.www4.irs.gov/a2a/mef/Login</a>	Never – this is an incorrect URL	Never – this is an incorrect URL
<a href="https://la2.www4.irs.gov/a2a/mef/Login">https://la2.www4.irs.gov/a2a/mef/Login</a>	Never – this is an incorrect URL	Never – this is an incorrect URL

## **4.2 Transmitting Through the Internet Filing Application (IFA)**

### **4.2.1 Applying to Submit Returns through the Internet**

This section describes the e-services registration and IRS e-file application process for transmitters who wish to transmit MeF returns through the Internet.

Transmitters who plan to transmit the MeF returns through the Internet must complete the IRS e-file application. If your firm is not currently an Authorized IRS e-file Provider, a Principal or Responsible Official of your firm must register and complete the IRS e-file application. If you have previously submitted an IRS e-file application and are currently an authorized Transmitter, you will only need to revise your application to identify one or more of the MeF return form types and to indicate that you wish to transmit returns through the Internet. You will be required to identify an individual or individuals who are authorized to transmit returns for your firm through the Internet.

To register and complete the IRS e-file application, access the IRS Web site (IRS.gov) and complete the following processes:

#### **Registration:**

You must register to gain access to the e-services products, including the IRS e-file application. Any Principals or Responsible Officials of the firm who are listed on the application and any individuals who have been delegated to transmit MeF returns through the Internet must register.

During registration, you will be required to enter your:

- Name
- Tax Identification Number (Social Security Number)
- Date of Birth
- Adjusted Gross Income (AGI) from either your current year or prior year tax return.

The IRS will compare the information you provide with the information received from the Social Security Administration (SSA) and with the tax return information you previously filed.

You will be authenticated through these “shared secrets.” You will also be required to select a:

- Username
- Password
- PIN
- Reminder question to recover a forgotten user name

The IRS will then mail you a letter containing a confirmation code and instructions for completing the e-services confirmation process. IRS will mail the letter to the last address you provided the IRS on your individual tax return (1040, 1040A, etc) or Form 8822, Change of Address. You will have 28 days from the date of the letter to log back into e-services to complete the confirmation process. If you do not confirm your registration within 28 days, your password will expire. You must then use the Forgotten Password or PIN option to set a new password (which will also generate a new confirmation code).

## Application:

After registering, you will need to apply to become an Authorized IRS e-file Provider or you will need to revise your existing IRS e-file application. In completing the application to apply to be an Internet Transmitter, be sure to check:

- the appropriate return form type box: 1040, 1120, 990, 1065, 1120-POL, 720, 2290 or 8849 (See chart below for return form type to use)
- the provider option of Transmitter
- the transmission method of MeF Internet, XML for the Form Types 1040, 1120, 990, 1120-POL, and 1065. MeF Internet, XML is an automatic default for Forms 720, 2290, and 8849.

You will also be required to delegate one or more individuals who are authorized to transmit MeF returns for your firm over the Internet.

Form you wish to transmit	Return Form Type Box to check on application
1040	1040
4868	1040
1120	1120
1120S	1120
1120-F	1120
7004*	1120
990	990
990-EZ	990
990-N	990
990-PF	990
8868	990
1120-POL	1120-POL
1065	1065
1065-B	1065
7004*	1065
720	720
2290	2290
8849	8849

**\*To develop software for or transmit Form 7004 for any form that can be extended by Form 7004, check the 1120 or 1065 box on the IRS e-File Application.**

## Delegation:

The person identified to transmit over the Internet must be given this authority. Access the IRS e-file application and update the delegated user section. Select the Delegated Authority Link and check the MeF Internet Transmitter option. Once this role is added to their profile, the authorized delegated user can log into the RUP and transmit returns through IFA for the organization.

To obtain additional information regarding the e-services registration and IRS e-file application, go to <http://www.irs.gov/taxpros/article/0,,id=109646,00.html> .

#### **4.2.2 Accessing and Logging into MeF IFA**

You must be authorized to submit transmissions or retrieve acknowledgements through IFA. To access and log into MeF Internet Filing complete the following steps:

[Step 1: Click the \*e-file\* logo on the irs.gov Web site](#)

[Step 2: Click the \*\*Modernized e-File\*\* link](#)

[Step 3: Click the \*\*MeF Internet Filing and MeF System Status\*\* link](#)

[Step 4: Click the \*\*Modernized e-File \(MeF\) Internet Filing and Status Page\*\* link](#)

[Step 5: Click the \*\*MeF Internet Filing\*\* link to login](#)

[Step 6: Read the Security Alert and click the OK button](#)

[Step 7: Enter your e-services Username and Password to receive authentication as an authorized Transmitter](#)

[Step 8: Select the organization you will represent in the session](#)

The MeF IFA Web pages supporting these steps are shown in the following pages.

**Step 1:** Click the *e-file* logo on the irs.gov Web site.

**Figure 4-1: IRS.gov Web Site**

Step 2: Click the Modernized e-File (MeF) link in the left hand column under **e-file Topics**.

The screenshot shows the IRS e-file website interface. At the top, there is a navigation bar with links: Home, Contact IRS, About IRS, Site Map, Español, and Help. Below this is a search bar with the text "Keyword/Search Terms" and a "SEARCH" button. A secondary navigation bar lists various categories: INDIVIDUALS, BUSINESSES, CHARITIES, GOVERNMENT ENTITIES, TAX PROFESSIONALS, RETIREMENT PLANS COMMUNITY, and TAX EXEMPT BOND COMMUNITY. The main content area is titled "IRS e-file: Filing your taxes online was never easier!". On the left, under the "e-file Topics" section, a list of links is shown: Free File, Modernized e-File (MeF), Info for e-file Providers, and More Topics. The "Modernized e-File (MeF)" link is highlighted with a blue box. To the right of this list, there is a section titled "IRS e-file Options For:" which contains a table with four rows: Individual Taxpayers, Business and Self-Employed Taxpayers, Large and Mid-Size Corporations, and Tax Professionals. Each row provides a brief description of the e-file options available for that category. The "Modernized e-File (MeF)" link is also mentioned in the descriptions for Business and Self-Employed Taxpayers and Tax Professionals.

**IRS e-file Options For:**

<b>Individual Taxpayers</b>	File your 2007 Individual Income Tax Return electronically (available through October 15, 2008).  You may even qualify to <b>file online for free</b> through the <a href="#">Free File</a> program.
<b>Business and Self-Employed Taxpayers</b>	Electronic filing and payment options for businesses including employment taxes, information returns, partnerships, corporations, and estates & trusts.  Includes information on the new <b>Modernized e-File (MeF)</b> program for partnership returns, Forms 1065/1065-B.
<b>Large and Mid-Size Corporations</b>	Certain large and mid-size corporations are required to electronically file their Forms 1120 and 1120-S, while others may do so voluntarily. We've included information for corporations who prepare and transmit their own corporate returns and for those using the services of third-party tax professionals.
<b>Tax Professionals</b>	IRS <i>e-file</i> information for tax professionals. Several online <a href="#">e-services</a> products are available including the electronic IRS <i>e-file</i> application.  Includes information on the new <b>Modernized e-File (MeF)</b> program for filing partnership returns electronically.

Modernized e-File (MeF) Program Information

Coming Soon to the Modernized e-File (MeF) Program

Find new initiatives to MeF including the 1040 MeF Program.

Modernized e-File (MeF) Forms

Find out what tax forms can be e-filed thru the MeF system.

Modernized e-File (MeF) Program Overview

Find links to MeF form-specific information including known e-file solutions for each tax year. Also find links to general filing, and more).

Modernized e-File (MeF) User Guides & Publications

General information and technical guidance for Electronic Originators, Software Developers and Transmitters interested in transmitting tax returns thru the MeF system.

Modernized e-File (MeF) Schemas and Business Rules

XML Schemas and Business Rules are provided for software developers and transmitters who are interested in developing software for the MeF program.

Modernized e-File (MeF) Providers

Find links to software providers who offer business e-file products and services for the MeF program.

Modernized e-File (MeF) Stylesheets

MeF Stylesheets can be used by external stakeholders to display corporate, partnership, exempt organization and excise tax returns.

Modernized e-File (MeF) Internet Filing

MeF Internet filing is available for corporations, exempt organizations, partnerships and excise tax returns.

Modernized e-File (MeF) Status Page

The Modernized e-File Status Page posts the availability of the MeF-related systems for external use.

Late Legislation Impact for MeF TY2008 Forms and Business Rules

Continual Updates of MeF TY2008 Forms and Business Rules impacted by late legislation. Last Updated 5/12/2009

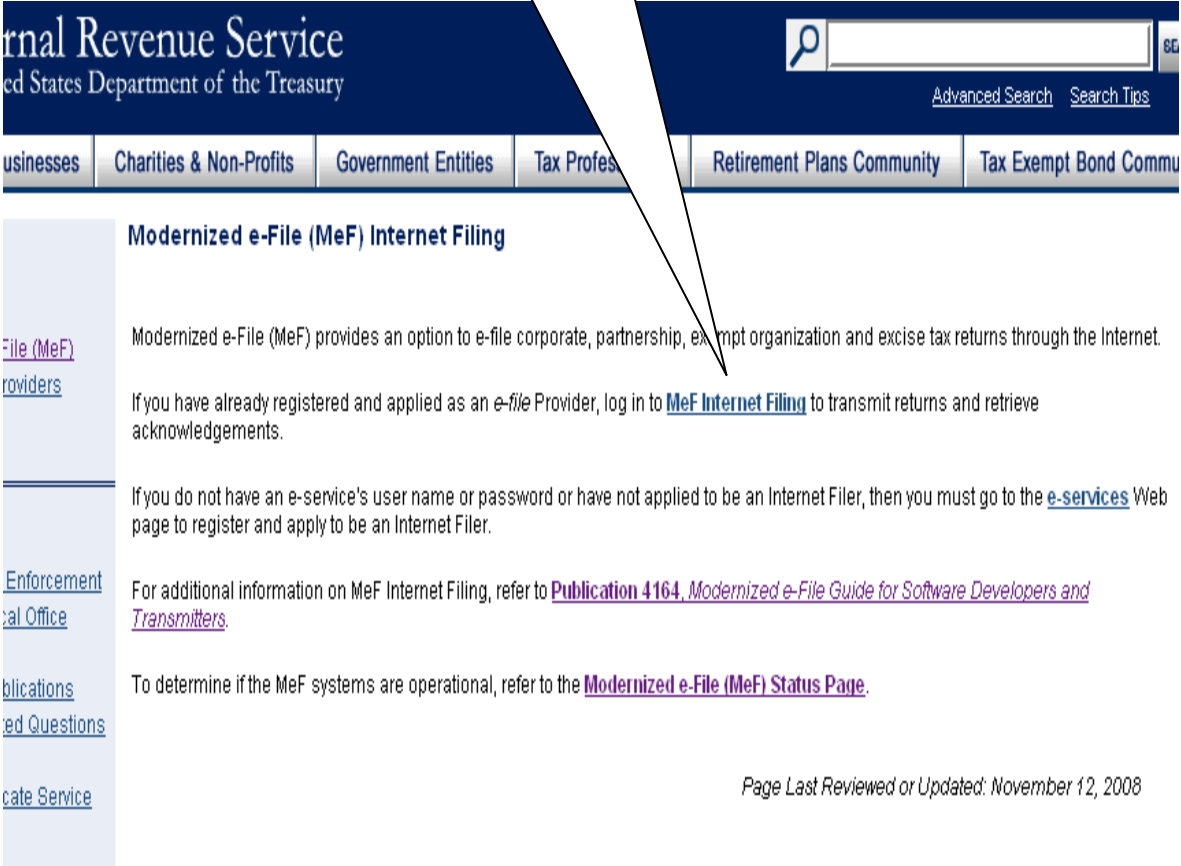

Step 3: Click the MeF Internet Filing link

**Figure 4-3: Modernized e-File (MeF) Program Information Page**

**Step 4:** Click the **MeF Internet Filing** link to Login

The screenshot shows the IRS e-file system interface. At the top, there is a dark blue header with the text "e Service" and "t of the Treasury" in white. Below the header is a navigation bar with several links: "& Non-Profits", "Government Entities", "Tax Profes", and "MeF Internet Filing". The "MeF Internet Filing" link is highlighted with a white box and a red arrow pointing to it. Below the navigation bar, the text "ized e-File (MeF) Internet Filing" is visible. At the bottom, there is a paragraph of text: "ized e-File (MeF) provides an option to e-file corporate, partnership, e".

**Figure 4-4: MeF Internet Filing Page**

**Step 5:** Read the Security Alert and click the OK button to access the MeF Internet Filing Login screen.

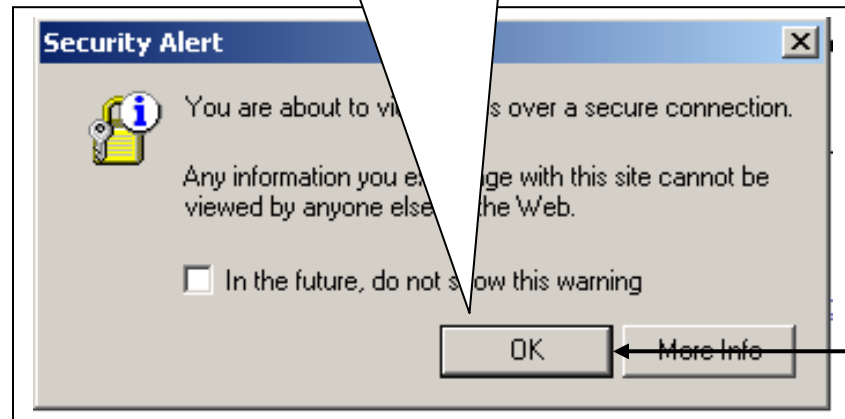

Figure 4-5: IRS.gov Security Alert

**Step 6:** Enter your e-services Username and Password to receive authentication as an authorized Transmitter.

[e-Services Privacy Policy](#)

**Figure 4-7: Select Organization Screen**

### 4.2.3 Submitting a Transmission File

After you select the organization you will represent in this session (see page 90), the MeF Internet Filing Home Page displays. At this page, you can select to:

- Transmit production and test files
- Retrieve production and test acknowledgements
- Retrieve production and test submission status records
- Retrieve production and test 2290 Schedule 1s
- View a list of participating states in the Fed/State program

All tax returns and/or extensions in a transmission file must either be production files or test files. To transmit production or test files complete the following steps:

[Step 1: Select either \*\*Transmit Production File\*\* link or \*\*Transmit Test File\*\* link from the MeF Internet Filing Home Page](#)

[Step 2: Select the ETIN](#)

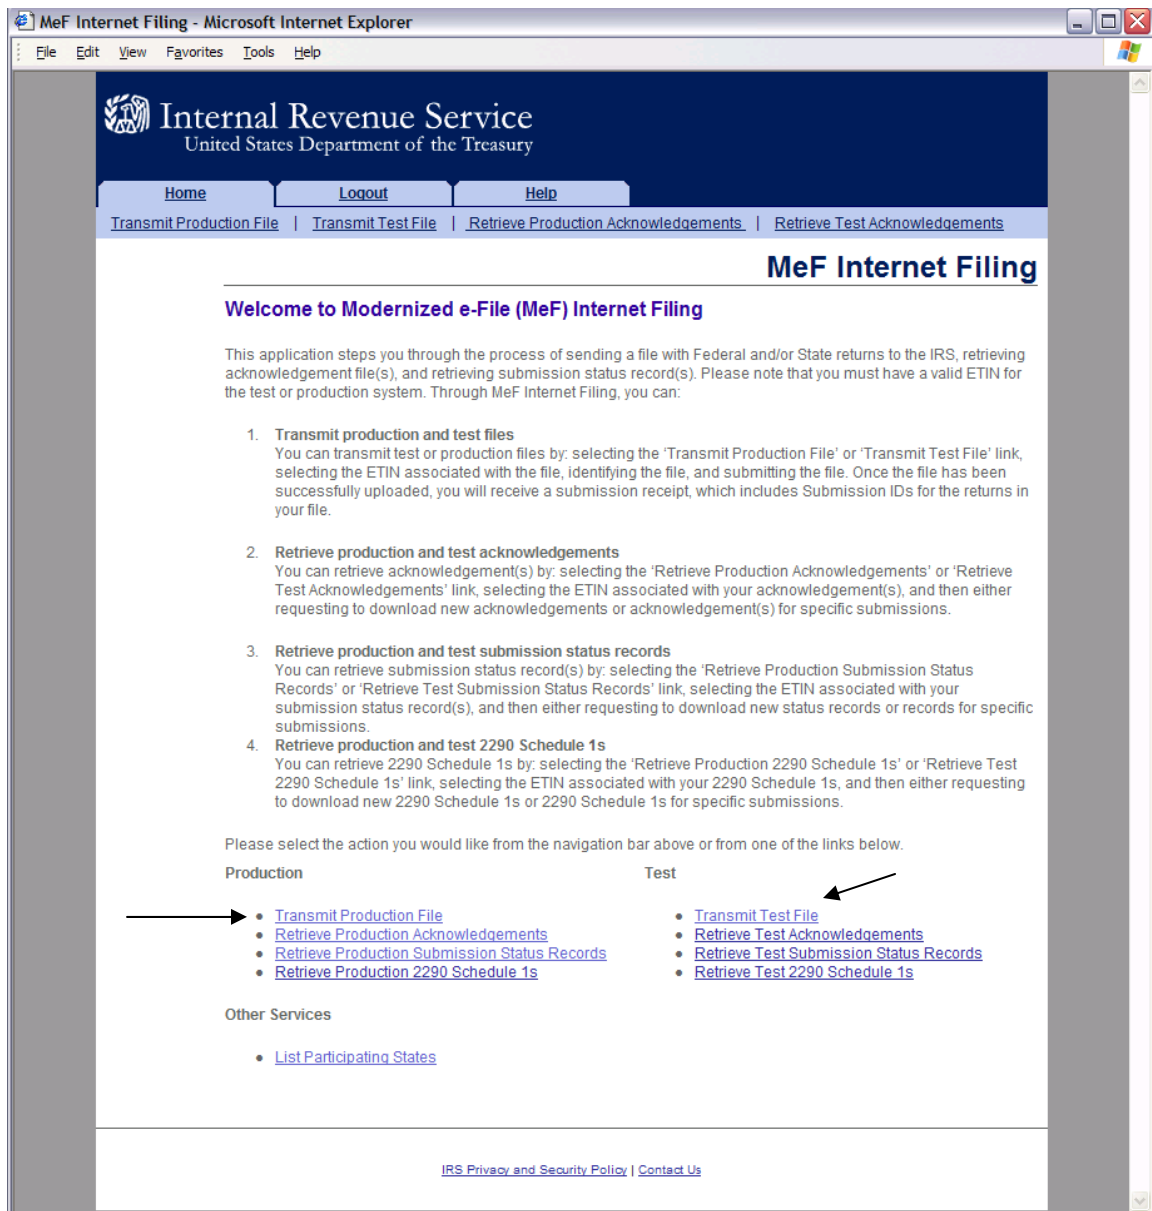

[Step 3: Upload file](#)

[Step 4: View Upload Status Screen Then Close Window](#)

[Step 5: Print or Save Transmission Receipt \(GTX Key\)](#)

[Step 6: Logout of MeF IFA](#)

**Step 1:** Select either **Transmit Production File** link or **Transmit Test File** link from the MeF Internet Filing Home Page

**Figure 4-8: MeF Internet Filing Home Page**

## Step 2: Select the ETIN

The organization for which you are transmitting may have multiple ETINs. Select the ETIN that applies to this transmission. The screen below will display when you select “Transmit a Production File”.

[Browse...](#)

[Submit](#)

[IRS Privacy and Security Policy](#) | [Contact Us](#)

**Figure 4-10: Submit Production Message File Page**

#### Step 4: View Upload Status Screen Then Close Window

The system provides you with an upload status page that monitors the progress of the transmission. The window also displays server-side processing steps, which are updated and checked once the processing has been completed: File Upload, Virus Check, and Preliminary Validation.

Three checks are done during Preliminary Validation:

- the ETIN selected matches the ETIN in the transmission header
- the production/test type selected matches the production/test transmission type in the file
- the number of submissions does not exceed the maximum allowed (which is 100).

Once the transmission has finished, the system prompts you to close the window. It is important to note that the browser that generates this pop-up window is locked, preventing you from navigating to other Web pages until the download is complete.

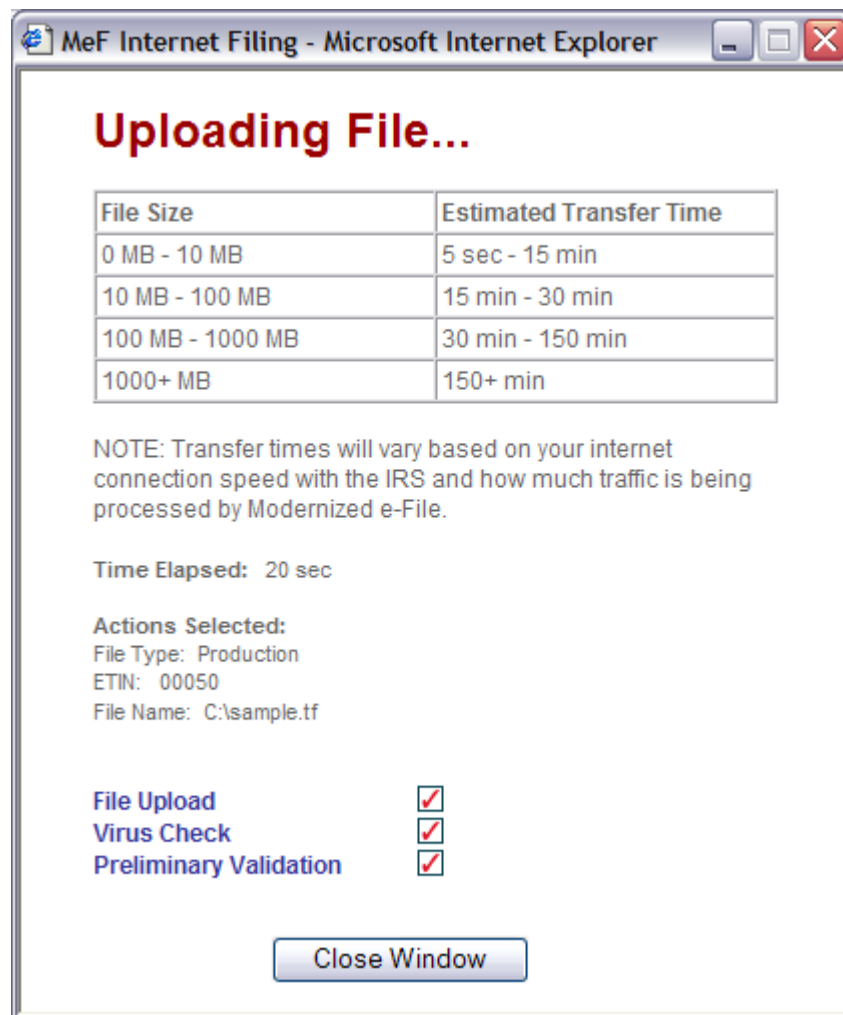

Figure 4-11: Upload Status Screen

## Step 5: Print or Save Transmission Receipt (GTX key)

If the file uploads successfully, IFA displays a Transmission Receipt (also known as a GTX Key) containing the Submission IDs for each return in the file. It is highly recommended that you print and retain a copy of this receipt page. This page just indicates that the IRS received the file.

You must wait for the Acknowledgement to determine if the return was actually accepted or rejected. The system completes validation of the file and then generates an Acknowledgement. The size and complexity of the file you submitted, as well as the load on the system, will determine how long it takes for the Acknowledgement to be generated. For information on retrieving your Acknowledgement, go to [Section 6.1](#) of this publication.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

Figure 4-12: Submission Receipt Page

## Step 6: Logging Out of MeF IFA

To logout of MeF IFA, click the **Logout tab** followed by the Logout button.

Click Home on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

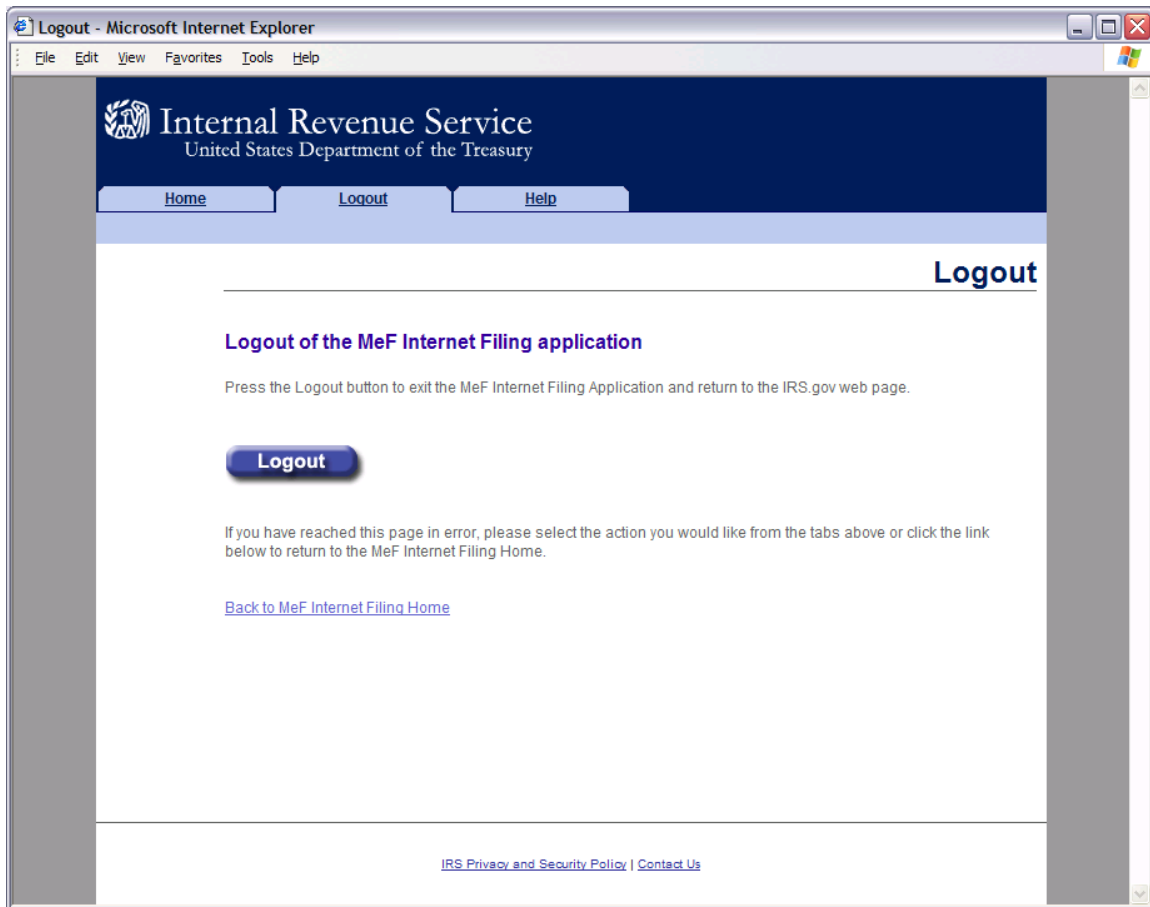

Figure 4-13: MeF Internet Filing Application Logout Page

#### **4.2.4 MeF IFA Error Conditions When Uploading a File**

During the process of uploading a file, the transmitter may encounter an error. You may want to print the error page(s) encountered.

The error messages you may encounter are:

- [No ETIN Found](#)
- [Virus Detected](#)
- [File Upload Failed](#)
- [File Error \(Unable to Process XML\)](#)
- [ETIN Mismatch](#)
- [Number of Submissions Exceeds Maximum](#)
- [System Error - Error Not Identified](#)
- [System Error – Error Identified](#)

The MeF IFA Web pages for these error messages are shown in the following pages.

## No ETIN Found

If the system does not find an associated ETIN for the status you selected, then the following error message displays. Check that you selected the appropriate link – you may have selected “Production” and only have test ETINs. You may go back to the MeF Internet Filing Home Page or terminate the session.

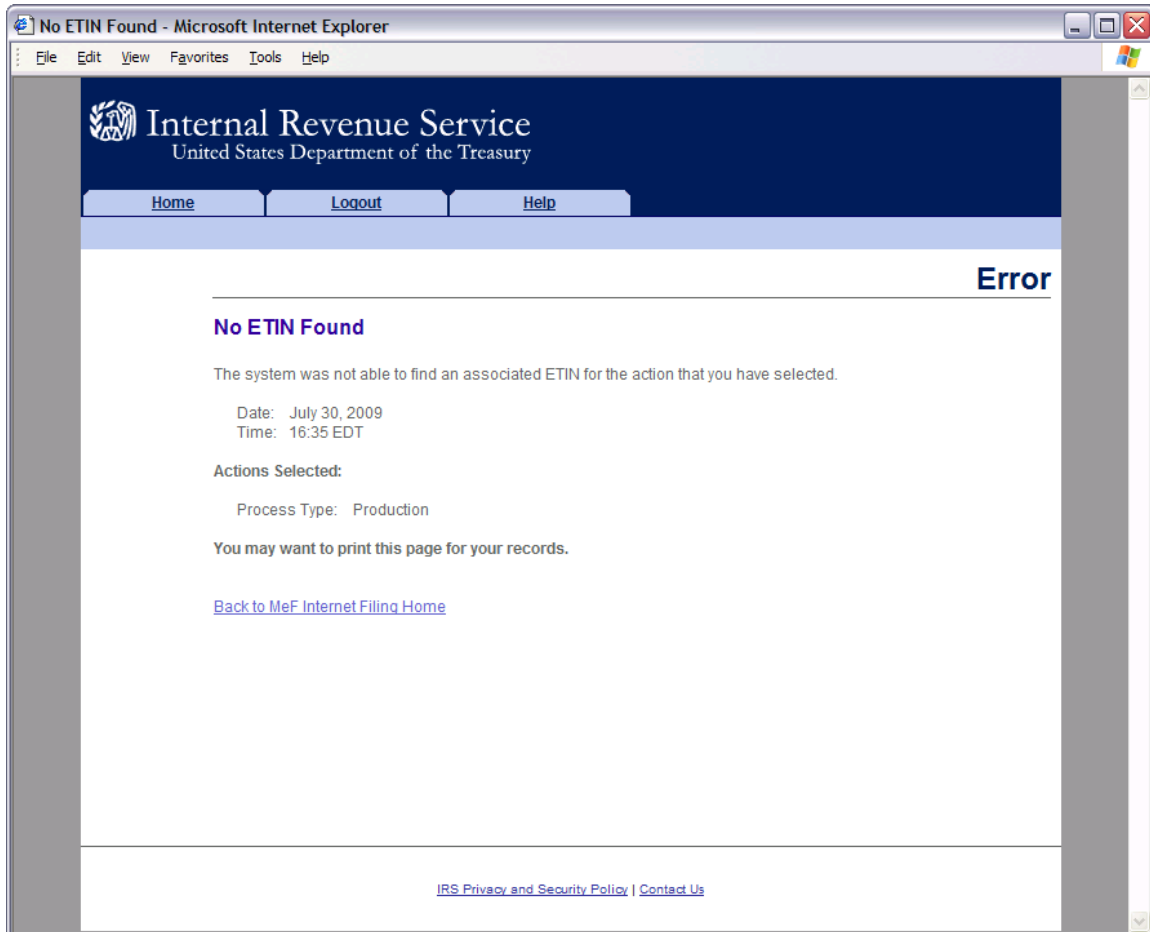

Figure 4-14: No ETIN Found Error Page

## Virus Detected

If a virus is detected in the file, the system deletes the file and displays an error screen, which will include the name of the virus. You may go back to the MeF Internet Filing Home Page or terminate the session. (See [Section 4.3](#) for more information on virus detection).

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

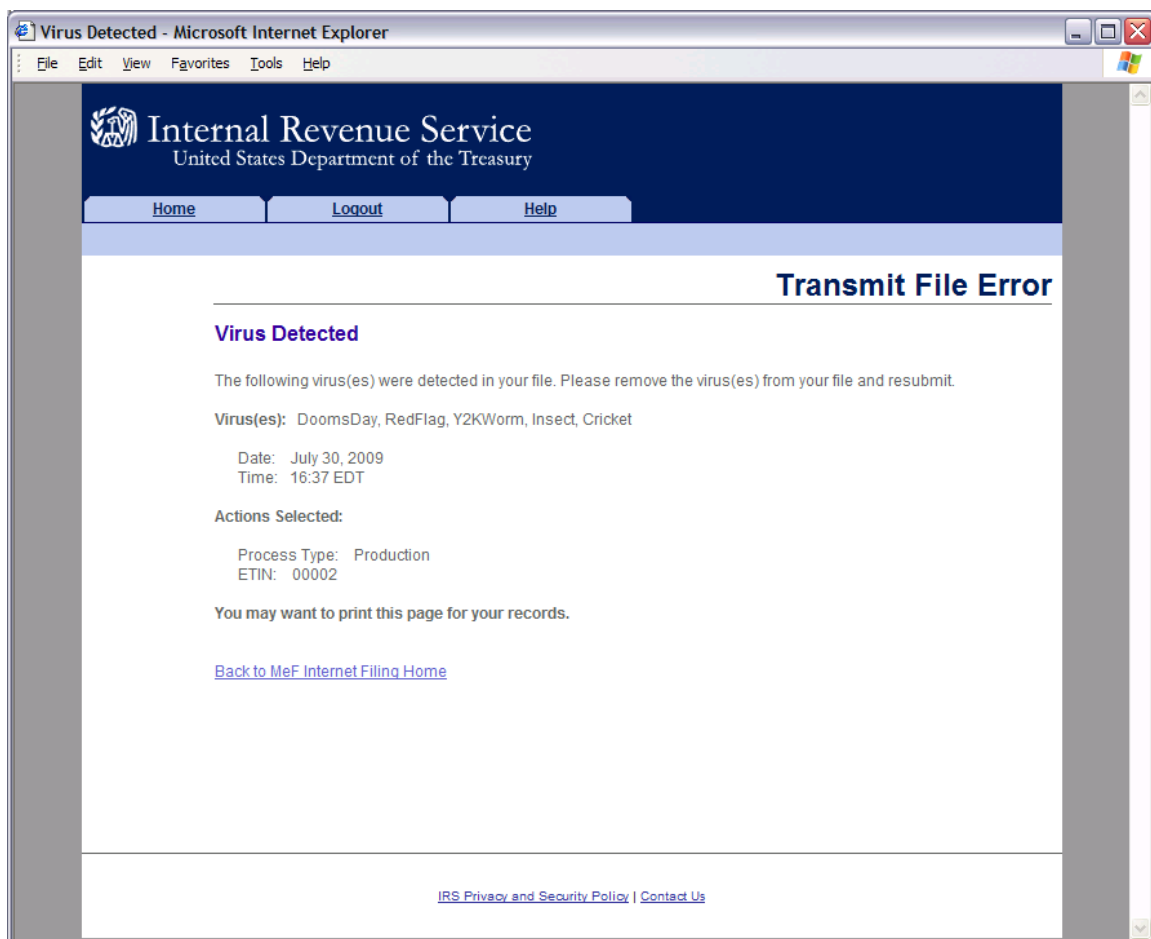

Figure 4-15: Virus Detected Page

## File Upload Error Pages

If an “X” is displayed during the file upload process, you will receive an error page. (If a check mark (✓) displays then the upload was successful)

### File Upload Failed

When the file upload can’t be completed, IFA rejects the file and automatically displays an error page indicating the type of problem encountered.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

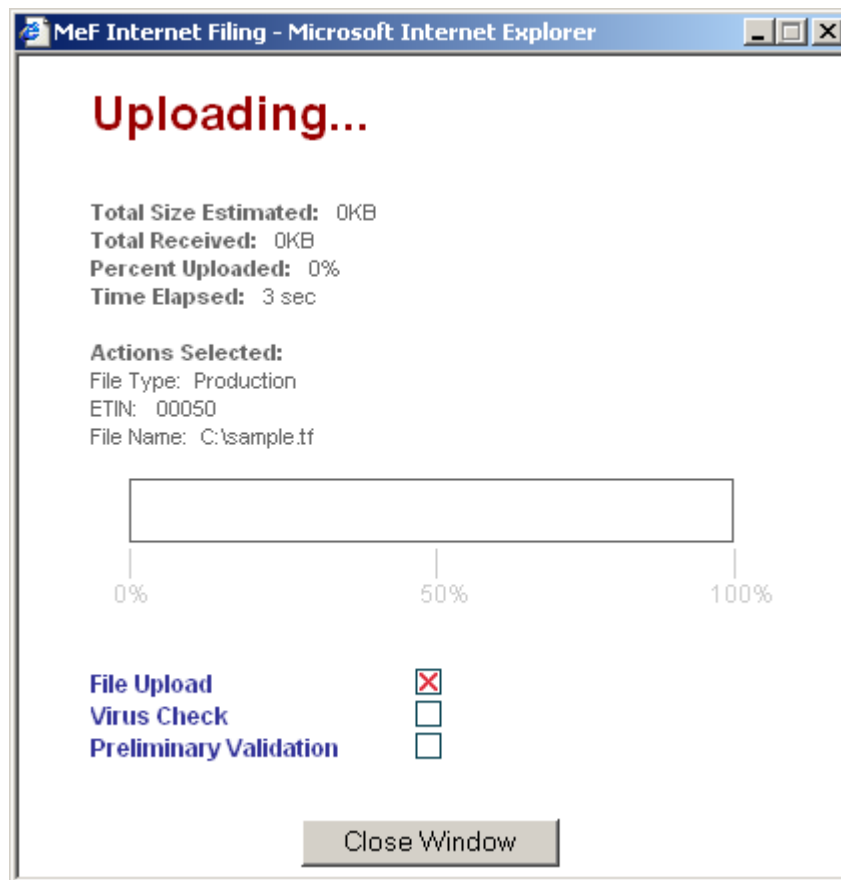

Figure 4-16: Upload Status Pop-up – Unsuccessful File Upload

## File Error (Unable to Process XML)

If a successfully uploaded file contains malformed XML (for example, a bracket may be missing, an element may be missing, etc.), the system rejects the file and displays the following error page.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

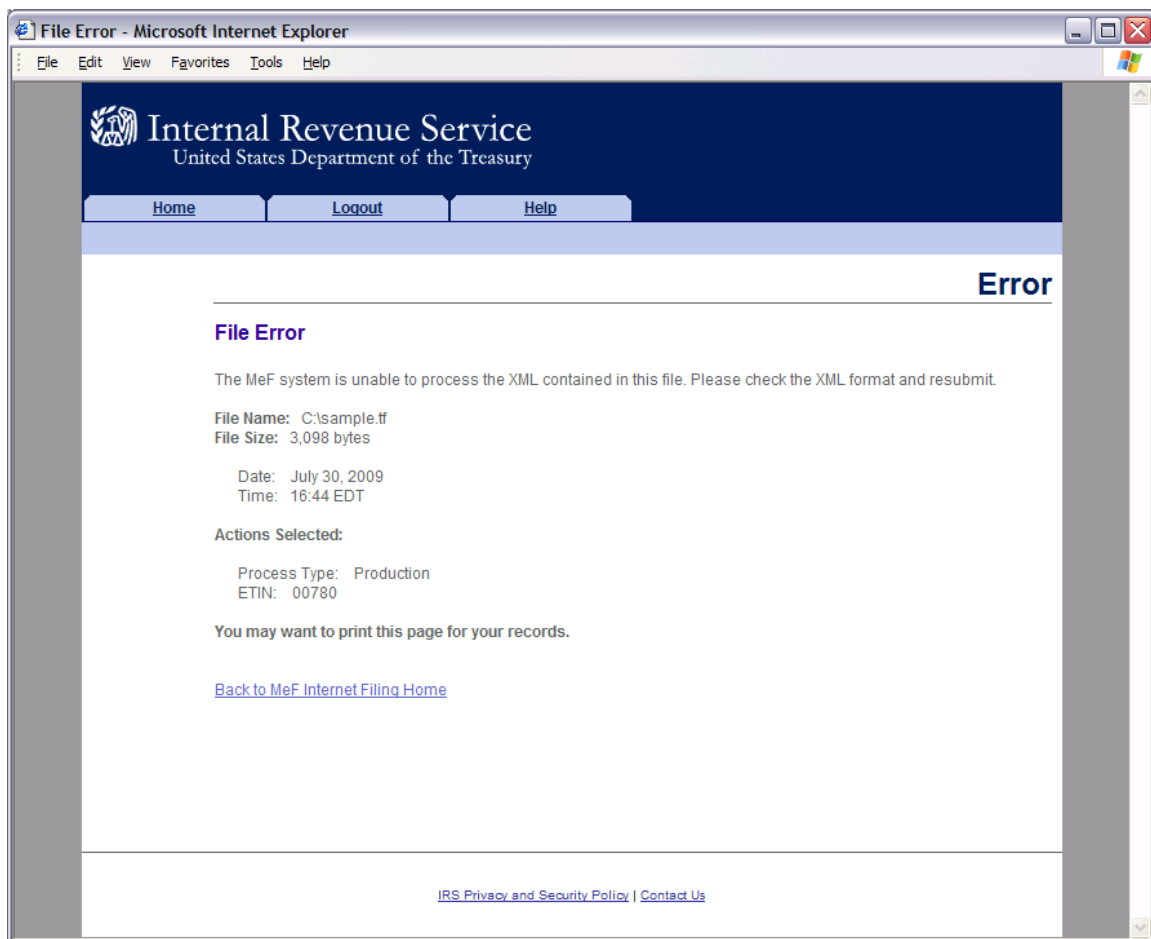

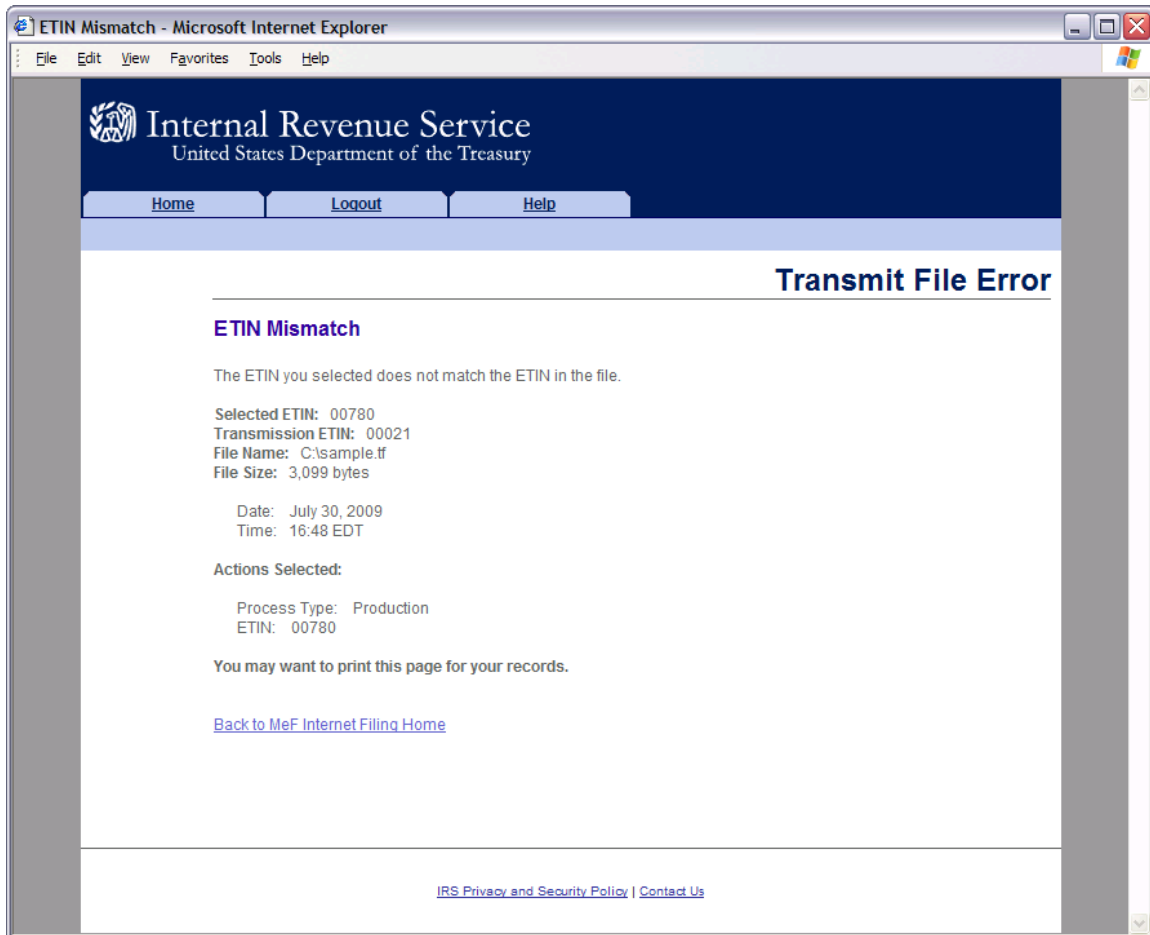

Figure 4-17: File Error Page – Unable to Process XML

## ETIN Mismatch

If the user selected ETIN does not match the ETIN in the file, IFA rejects the file and displays the following error message. Check the value for the Selected ETIN and Transmission ETIN to see if there is a mismatch. In the example shown below, the Selected ETIN is 00780 but the Transmission ETIN is 00021 so the transmission was rejected.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

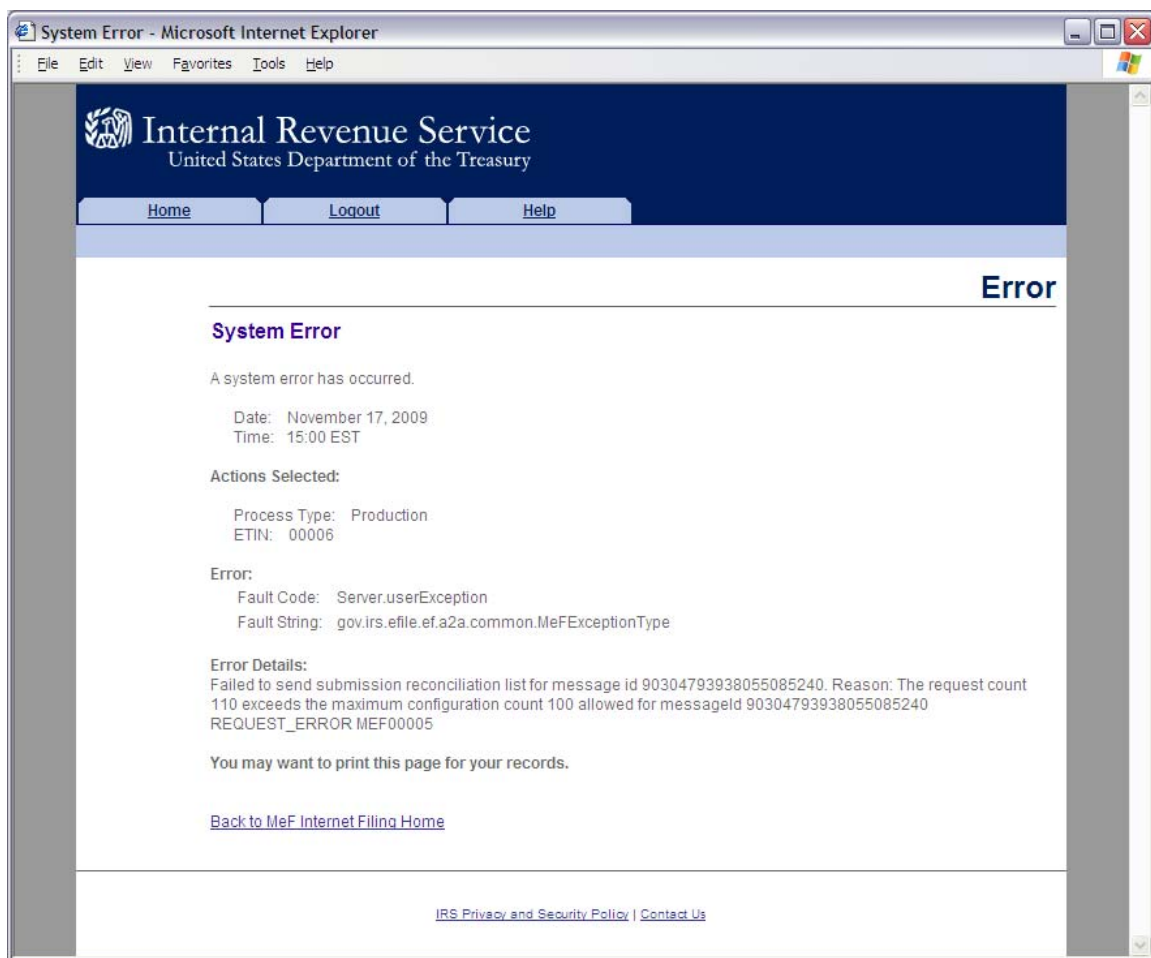

**Figure 4-18: Transmit File Error Page – ETIN Mismatch**

## Number of Submissions Submitted Exceeds Maximum Error

If the number of submissions within the file exceeds the configurable limit, which is currently set to 100, IFA responds with a SOAP fault indicating that the file exceeded the max number of submissions allowed by the system (100) as shown below.

A SOAP fault indicates an error. The user can rectify a SOAP fault when the SOAP fault is caused by a user action.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

**Figure 4-19: Transmit File Error Page – Number of Submissions Submitted Exceeds Maximum**

## System Error (Transmit) – No Error Identified

If the system encounters a problem and cannot transfer and store the file, the system displays the following error message and asks the transmitter to resubmit the transmission file. Call the e-help Desk (1-866-255-0654) if you continue to receive this message. You may want to print this page for reference.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

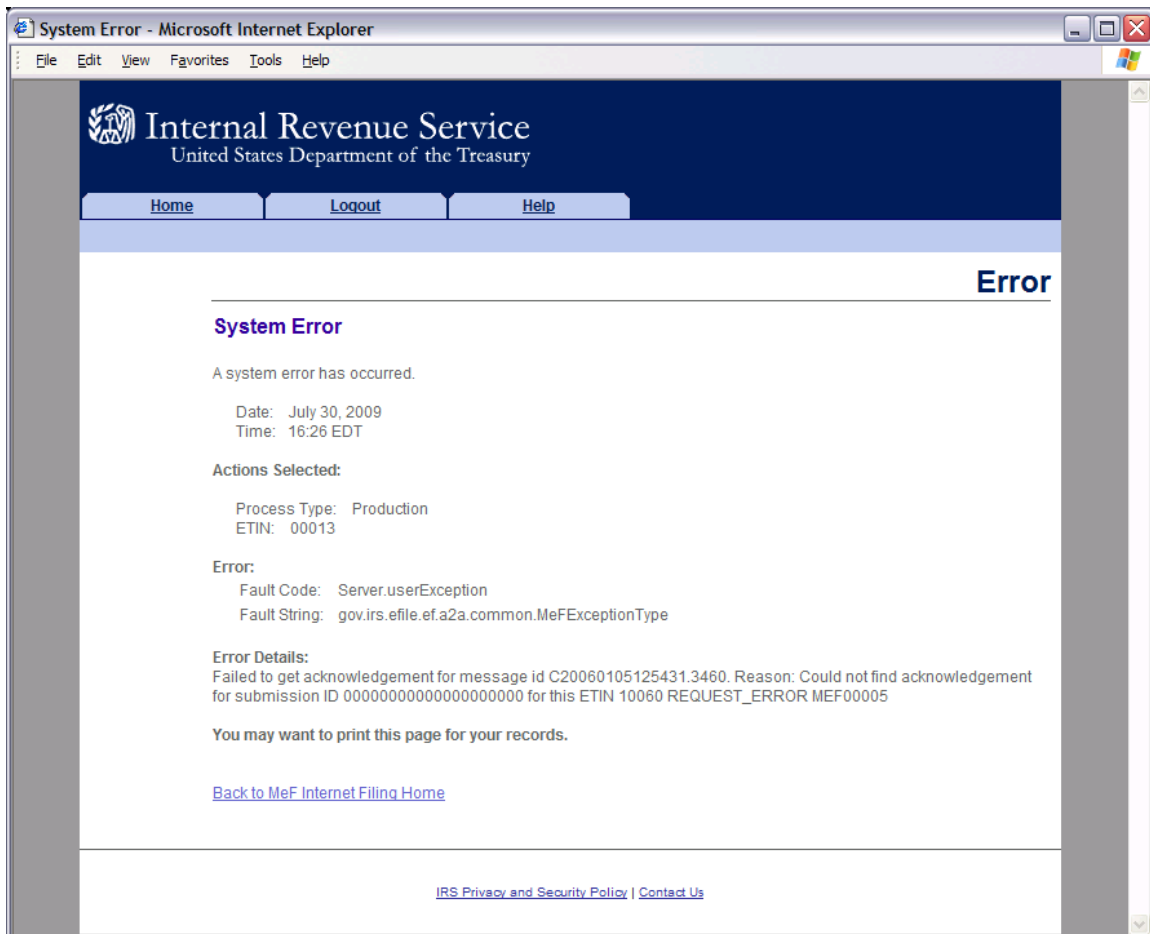

**Figure 4-20: System Error Page**

## System Error (Transmit) – Error Identified

The error page below displays for errors that occur when a file has been transmitted and the system is able to specify the error that occurred.

Click the Home tab on the navigation bar or click [Back to MeF Internet Filing Home](#) to return to the MeF Internet Filing Home page.

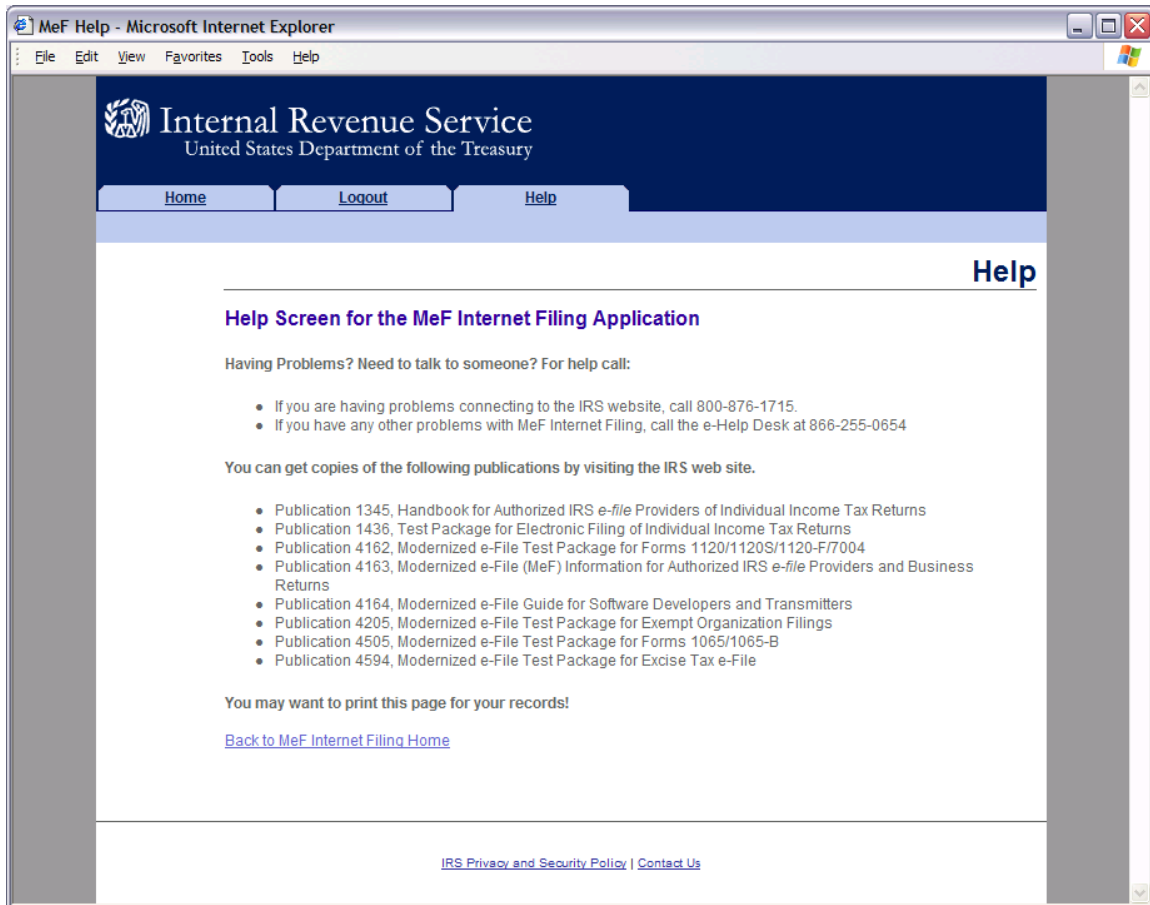

**Figure 4-21: System Error Page with Error Specified**

## 4.2.5 Help Tab

Click the Help tab to access the MeF Internet Filing Help page. This page provides the phone numbers to call if you are experiencing problems. It also lists the names of all of the MeF publications.

**Figure 4-22: Help Screen for the MeF Internet Filing Application**

#### 4.2.6 Browsers and Operating Systems

The client-side browsers and operating systems that will be supported are listed in the following table.

<b>BROWSER\PLATFORM</b>	<b>Windows XP Professional</b>	<b>Windows 2000 Professional</b>
<b>IE 6.0</b>	<b>Yes</b>	<b>Yes</b>
<b>Netscape 8.0</b>	<b>Yes</b>	<b>Yes</b>
<b>Mozilla 1.7</b>	<b>Yes</b>	<b>Yes</b>

## **4.3 Detecting Viruses in MeF Transmissions**

### **4.3.1 Through Internet Filing**

All files being transmitted through IFA will be scanned for viruses. In the event the system detects a virus in the transmission file, the following steps will be taken:

- The transmission will be rejected and an error screen with the message “Virus Detected” will be displayed.
- The session will be terminated.
- The Transmitter must remove the infected data and then call the IRS e-help Desk at 1-866-255-0654 when they are ready to retransmit.

Please refer to [Section 4.2.4, Figure 4-17](#), which shows the error screen that will be displayed.

### **4.3.2 Through Application-to-Application (A2A)**

All files being transmitted through A2A will be scanned for viruses. In the event the system detects a virus in the transmission file, the following steps will be taken:

- The transmission will be rejected and an error response will be returned.
- The Transmitter must remove the infected data and then retransmit the file.

.

## 5 Validating the Transmission and Return Data

This section explains how MeF will perform validations of the transmission and return data through business rules, schema validations, SOAP envelope validation and Transmission Header and Manifest validation.

### 5.1 Business Rules (Categories/Severity)

The following section describes the business rules used in MeF. To the extent possible, the MeF business rules have been standardized across all tax returns currently available in MeF. As additional tax returns migrate to the modernized architecture, the associated business rules for those returns will be rewritten to maintain the standardization across all form types.

Business rules for the MeF forms will be posted to the IRS.gov Web pages found in the MeF Schema Page for each form type. You can access these business rules by selecting the appropriate form type on IRS.gov at: <http://www.irs.gov/efile/article/0,,id=171950,00.html>.

The MeF business rules were written to be atomic; that is, they focus on one condition rather than more than one. They also do not reference legacy e-file sequence numbers, but reference form and line numbers and element names. A crosswalk of the legacy e-file error reject codes to the MeF business rule numbers was developed for Form 1040 and 4868. The tax year 2009 crosswalk can be found on IRS.gov at: <http://www.irs.gov/efile/article/0,,id=209616,00.html>.

The following error information will be provided in your business rule acknowledgement file:

1. **Rule Number** - Each MeF business rule has a number that uniquely identifies the business rule within the MeF system. The rule number consists of a letter identifying the type of return document the rule applies (form, return, transmission, schema, schedule, payment), the form number that owns the rule, followed by the number of the rule within the form.

<i>Identifier</i>	<i>Rule Type</i>
<b>F</b>	<b>Form</b>
<b>R</b>	<b>Return</b>
<b>T</b>	<b>Transmission</b>
<b>X</b>	<b>XML</b>
<b>S</b>	<b>Schedule</b>
<b>FPYMT</b>	<b>Payment</b>

2. **Error Message** - This element provides the description of the rule.
3. **Error Category** - All MeF business rules are divided into 12 error categories. The following eight categories validate the XML data:
  - Multiple Document – more than the required number of documents are included in the tax return. The maxOccurs attribute in the ReturnData restricts the allowable number of the XML document within the tax return. In the cases where the

number of documents is restricted by form and/or line, the number of times the XML document can occur will be restricted by a business rule and the maxOccurrence in the ReturnData will be set to 'unbounded'.

- For example, only one Form 3468 can be attached to each 1120 and 8865. Since more than one 8865 can be attached to the tax return, more than one 3468 may exist in the tax return. Therefore, in the ReturnData1120, maxOccurs="unbounded" and a business rule for each form will exist restricting the number of 3468s that can be attached to each form.
- Missing Document – a tax return document is required but was not included in the tax return.
- Data Mismatch – the data in two fields should be the same but is not. For example, if Form 1120, Line D does not equal Form 1120, Schedule L, Line 15d, then you will receive error F1120-258:
  - If Form 1120, Schedule L is present, Form 1120, Item D "Total Assets" must equal Form 1120, Schedule L, Line 15d.
- Duplicate Condition – the tax return or the transmission file was previously received and accepted by the IRS.
- Math Error – the result of a computation is incorrect.
- Incorrect Data – data violates a business rule even though it is syntactically correct. That is, the data values for elements must conform to the format specified and the data type. Also, the data values for elements must contain only values allowed for them in the schema. For example:

If a payment is submitted with the return, and the IRS Payment record indicates the Taxpayer's Daytime phone number is 0000000000, then you will receive error FPYMT-018:

Taxpayer's Day Time Phone Number in IRS Payment Record cannot equal all zeros.

- Missing Data – data is not provided for a required field.
- Database Validation Error – data provided does not match the IRS database or the data provided should be present in the IRS database but is not. For example, the Electronic Filing Identification Number (EFIN) in the Return Header must be listed in the MeF database and in accepted status.

The following are the remaining three categories for all return types:

- XML Error – the data violates Schema specification. The return and transmission documents must conform to the version of the XML schema they specify.
- System Error – a return encounters a problem with the IRS systems that prevents the return from being processed electronically.
- Unsupported – a submitted item(s) is sent to a location that does not accept it or an unusual condition is encountered in the data.

The following apply to extension Forms 4868, 7004 and Form 8868:

- Not On Time – a document is received after the due date.

4. **Severity** - When a business rule is violated, one of the following severity levels will be issued:

- Reject – the tax return is rejected; however, MeF will continue processing the tax return until 100 errors have occurred. You will need to send the tax return again with the errors corrected.
- Reject and Stop – this severity type will stop processing the return when this reject is encountered.
- Alert - This severity does not cause the return to reject. Information is being provided to the taxpayer about a condition in the return but the return does not reject because of that condition.

5. **Data Value** - Data value causing the violation - when appropriate.

### **Business Rules for Consolidated Returns**

Conformance with XML schemas (format checks) will be performed at all levels of a consolidated return: top-level consolidation, parent return and all subsidiary returns. However, business rules are enforced only at the top level consolidated return. As an example, business rule SN-F1120-001 states “If Schedule N (Form 1120), Line 4a, has a choice of ‘Yes’ indicated, then Form 5471 must be attached.” MeF will look for the Form 5471 to be attached to the top-level consolidated 1120. If Form 5471 is attached to a Parent or Subsidiary return, the validation will not pass, and a reject with rule SN-F1120-001 will be returned in the acknowledgement file.

## 5.2 Validating Transmission File

Once the transmission file is received from IFA or A2A, the MeF system must validate the transmission header before it validates the returns inside. Transmission validation consists of two parts:

1. SOAP envelope validation. SOAP envelope validation ensures transmission file format integrity and that the SOAP header, body, and MIME segments exist and are located in the proper place. If transmission file fails SOAP envelope validation, the entire transmission, including all returns, is rejected.
2. Transmission/Message Header and Manifest validation. The transmission/message header provides some summary information about the file, such as Transmission ID, Message ID, ETIN, and timestamp.

**Note:** The time zone component of the timestamp element is a required data element in the Transmission Manifest. Where there is a timestamp element there must be a time zone component included.

The SOAP header and transmission manifest in the SOAP body are constructed correctly based on the A2A WSDL definition. For IFA, it's the structure contained in the MeF Submission Composition Guide.

The manifest contains the submission count and SubmissionID of each submission in the transmission file. The Submission ID:

- should not be a duplicate of another SubmissionID
- should contain the Electronic Return Originator's EFIN
- EFIN should be the same as the EFIN in the return header.
- YYYY in the SubmissionID must be the current processing year. Any submission sent to the IRS in 2010 must have "2010" in the "YYYY" value of the SubmissionID.

**Note** - When a transmission is rejected, you will not receive an acknowledgement for individual submissions within the transmission. All submissions must be resubmitted.

MeF validates the transmission header against business rules. Below are samples of transmission validation business rules. The complete list of business rules is found on each form's respective IRS.gov Web site shown below.

### Transmission Validation Business Rules

**\*Note:** The Tax Type includes all MeF forms (720, 2290, 8849, 1040, 4868, 1120, 1120-F, 1120S, 990, 990-EZ, 990-N, 990-PF, 1120-POL, 8868, 7004, 1065, 1065-B)

Rule Number	Rule Text	Error Category	Severity	Tax Type
T0000-014	The Submission ID must be globally unique.	Incorrect Data	Reject And Stop	*See Note
T0000-900	Transmission can not be a duplicate of a previously accepted transmission.	Duplicate Condition	Reject and Stop	*See Note

You can access the complete list of validation rules for the transmission header and manifest for each form on IRS.gov at: <http://www.irs.gov/efile/article/0,,id=171950,00.html>.

If the transmission validations (SOAP envelope, header and manifest) pass the validation check, the transmission is accepted and the system begins validating the returns contained in the transmission.

**It is important that you run your transmission file through a validating parser to find any errors before transmitting.**

## 5.3 Validating Tax Returns

Once the transmission file passes validation, the MeF system validates the submissions contained in the file. Submission validation consists of two parts: schema validation and business rule validation.

### 5.3.1 Schema Validation

IRS recommends each return be run against a validating parser prior to being submitted to IRS. This pre-validation is intended to identify the majority of potential error conditions and minimize the chance of receiving errors. A parser compares the XML document to the defined elements and attributes of the schemas to ensure a well-formed document is transmitted. Schemas provide the basic definition for elements – what is required, field length, data type, allowable values, etc. Data integrity depends on each data element complying with the data format specifications. If the tax preparation software uses the IRS-defined XML schemas to create the XML tax return, there should be no data format errors in the return. The MeF system verifies this by validating each return in the transmission file against the schemas. If a data format error is encountered the return is rejected.

**Note:** When an error is found during schema validation, processing is usually stopped at the point of the error so there may be additional errors in the file that have not been identified.

Below are samples of schema validation business rules. The complete list of business rules is found on each form's respective IRS.gov Web site shown below.

\*Note: The Tax Type includes all MeF Forms (720, 2290, 8849, 1040, 4868, 1120, 1120-F, 1120S, 990, 990-EZ, 990-N, 990-PF, 1120-POL, 8868, 7004, 1065, 1065-B)

### Schema Validation Business Rules

Rule Number	Rule Text	Error Category	Severity	Tax Type
X0000-005	The XML data has failed schema validation.	XML Error	Reject And Stop	*See Note above
X0000-010	For each SubmissionID provided in the transmission manifest there must be a submission zip archive entry present in the Attachment Zip file whose name (without the ".zip" extension) matches the SubmissionID.	Incorrect Data	Reject And Stop	*See Note above
X0000-029	A binary attachment submitted in the PDF format must begin with the file header "%PDF-".	Incorrect Data	Reject and Stop	*All MeF Forms except 990-N and Form 4868
X0000-030	The size and CRC232 checksum value must be provided for the submission XML file (i.e. xml data file that starts with "xml/" or "/xml/").	Incorrect Data	Reject and Stop	*See Note above

You can access the schema validation business rules on IRS.gov at:  
<http://www.irs.gov/efile/article/0,,id=171950,00.html>.

For more information regarding validation of the return against the XML schemas, refer to Appendix A of the MeF Submission Composition Guide.

### 5.3.2 Business Rule Validation

The MeF system uses a business rule engine to validate the returns against the rules. When a rule with severity “reject and stop”, or “reject” is violated, an error is generated. Errors result in a rejected return. As submissions are validated, the acknowledgements are made available to the transmitter for retrieval.

When a rule with severity "reject and stop" is violated, processing is stopped so there may be additional errors in the file that have not been identified. The return acknowledgement contains an element called "CompletedValidation." If a rule with severity "reject and stop" is violated, then the value in this field of the acknowledgement file will be "No".

Below are samples of return validation business rules. The complete listing of business rules can be found by selecting the appropriate form type on IRS.gov:

<http://www.irs.gov/efile/article/0,,id=171950,00.html>.

Note: Rules that begin with STATE are rules that support the Fed/State submission.

### Return Validation Business Rules

Rule Number	Rule Text	Error Category	Severity	Tax Type
R0000-075	The Routing Transit Number (RTN) must conform to the banking industry RTN algorithm.	Incorrect Data	Reject	720, 2290, 990-PF, 1120-POL, 1040, 4868, 1065, 1065-B, 1120, 1120-F, 1120S, 4868, 7004, 8868,
R0000-904	Software ID in the Return Header must have passed testing for the form family and tax year.	Database Validation Error	Reject And Stop	720, 2290, 990, 990-EZ, 990-N, 990-PF, 1120- POL, 1040, 4868, 1065, 1065-B, 1120, 1120-F, 1120S, 4868, 7004, 8868
STATE-007	The IRS Submission ID referenced in the State Submission must be that of an IRS Return.	Incorrect Data	Reject	1040, 990, 990-EZ, 990-PF, 1065, 1065-B 1120, 1120-F, 1120S

### 5.3.4 Checksum and Data Values Returned in the Acknowledgement File

When a zip archive tool compresses files and directories into a zip file, it computes a checksum for each zip entry and includes it in the zip file. It is important to note that the checksum of a file zip entry is the checksum of the file before it is compressed. The IRS will use the 32-bit Cyclic Redundancy Code (CRC32) checksum algorithm, as supported by WinZip, PKZIP, PKWare3.0 and GZIP.

This example illustrates where the CRC32 value can be found in the zip archive file. The zip archive tool compresses the following files and directories into a *sample1.zip* file using WinZip:

- */manifest/*
  - *manifest.xml*
- */xml/*
  - *1120S.xml*
- */attachment/*
  - *8453 Signature Document .pdf*
  - *CertifiedHistoricStructuresSch.pdf*

The CRC32 values for the *1120S.xml* file can be found:  
WinZip Classic → File → Properties → Details

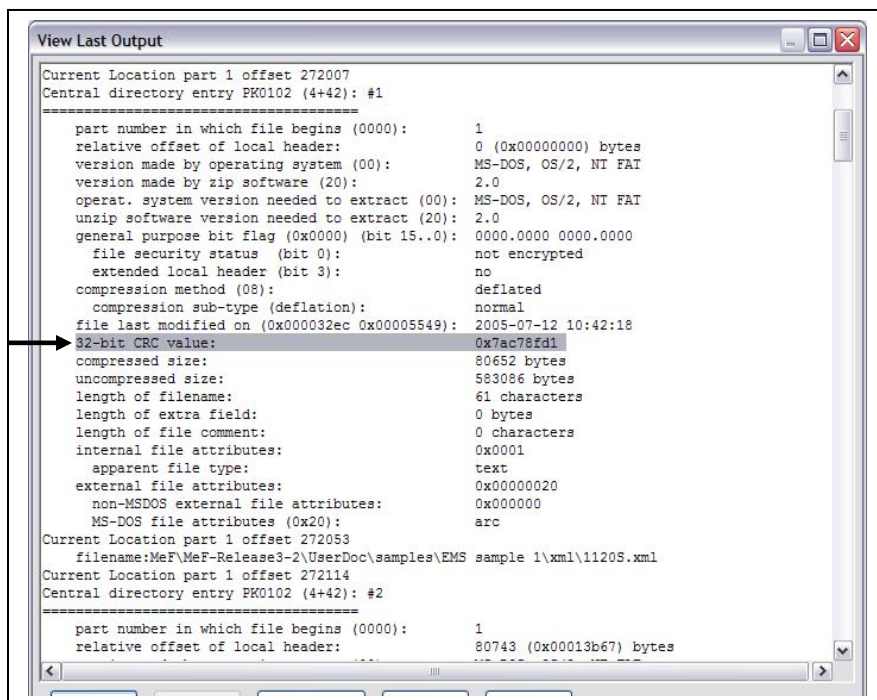

Figure 5-3: CRC Value in the Zip Archive File

The value “0x7ac78fd1” is a hexadecimal number of 32 bits long (the corresponding decimal integer is 2059898833).

The MeF system will only compute the checksum in the XML submission archive file. The checksums of the other zip entries such as the *manifest.xml* file and PDF binary attachments will

not be computed and reported.

1. The MeF system will retrieve the CRC32 checksum value of the submission XML file zip entry and return it in the acknowledgement file as the <EmbeddedCRC32>.
2. The MeF system will compute the CRC32 checksum value of the submission XML file to verify that the computed value is the same as the one embedded in the zip file.

The taxpayer compares the <EmbeddedCRC32> element with the <ComputedCRC32> element to ensure that the file the IRS received is the same size as the file the taxpayer sent. If there are any discrepancies, the taxpayer needs to contact the transmitter to see if the file was changed before transmission.

## 5.4 Status Record for Federal Returns

While the federal return is being processed, the transmitter can request the status of the submission. In A2A, the Status Record is retrieved by service requests Get New Submission Status, Get Submission Status or Get Submissions Status. In IFA, the Status Record is retrieved by selecting the Retrieve (Production or Test) Submission Status Records option.

Below are the values and their descriptions included in the Status Record for federal returns. [See Section 3.4.1 Status Record for State Returns](#) for additional information.

Status Name	Description
ACKNOWLEDGED	The MeF system has created an acknowledgement for the federal submission.
ACKNOWLEDGEMENT RETRIEVED	The acknowledgement for the federal submission has been retrieved by the transmitter.
RECEIVED	The MeF System has received the federal submission.

Here is an example of the statuses provided for a federal return:

### Submission Status History:

Submission Status	Status Date ▼	Status Record Retrieval Date
Acknowledgement Retrieved	2009-11-03	2009-11-03
Acknowledged <input type="text"/>	2009-11-03	2009-11-03
Received	2009-11-02	2009-11-03

The Status Record is not proof a return was accepted or rejected. The Status Record above only indicates a submission was received and an acknowledgement was generated and retrieved. The following statement has been added to the Status Record:

This status record provides information about what step in the process the return has completed. It is not proof that the return was Accepted or Rejected. You must retrieve the Acknowledgement File and keep with the return records to prove the return was Accepted or Rejected.”

## 5.5 Acknowledgment Schema

The acknowledgement schema is shared among all MeF forms and extensions; however, certain elements are form-specific and will not be generated in every instance. The table below explains some of the elements in the acknowledgement and the MeF forms to which they apply:

Element Name	Form	Explanation
<b>AcceptanceStatus</b>  Note: “AcceptanceStatus” replaces “FilingStatus” for all tax years beginning January 2010.	All	1) The value returned for all business returns, business extensions and Form 4868 is “Accepted” or “Rejected.”  2) The value returned for Form 1040 is “Accepted”, “Rejected” or “Exception”  a) The “Exception” status indicates the return has: <ul style="list-style-type: none"> <li>rejected previously with either Business Rule SEIC-F1040-501 and/or R0000-504</li> <li>invalid data based on these business rules in the subsequent submission</li> <li>the ImperfectReturnInd checked on the subsequent submission</li> </ul> IRS will continue to process this return, and a math notice error will be sent to the taxpayer advising of any changes made as a result of this exception processing. These returns will be processed in 4 to 6 weeks from the date of acceptance.  DO NOT RESUBMIT THE TAX RETURN or FILE ON PAPER  b) For all MeF returns, the value of “Accepted” indicates the return is accepted as a filed tax return and will be processed. This does not mean the return will pass all validity checks or post to IRS Master File without delays.
<b>TIN</b>  Note: “TIN” replaces EIN for all tax years beginning January 2010..	All	“TIN” = Taxpayer Identification Number. TIN represents both “SSN” (Social Security Number) and “EIN” (Employer Identification Number)
<b>ReservedIPAddressCd</b>	Form 1040	The value “R” is returned when a reserved IP address is present in the return. The Transmitter should take steps to understand why a reserved IP address was captured and what can be done to prevent this in the future.

<b>Element Name</b>	<b>Form</b>	<b>Explanation</b>
<b>DateOfBirthValidityCd</b>	Form 1040 and 4868	<p>The date of birth validity code is only returned when the PIN Type code = Self-Select Practitioner. The values are:</p> <ul style="list-style-type: none"> <li>• "0" = Date of Birth Validation Not Required</li> <li>• "1" = All Dates of Birth Valid</li> <li>• "2" = Primary Date of Birth Mismatch</li> <li>• "3" = Spouse Date of Birth Mismatch</li> <li>• "4" = Both Dates of Birth Mismatch</li> </ul>
<b>DebtCd</b>	Form 1040	<p>The debt code is returned for accepted or exception returns only. The values are:</p> <ul style="list-style-type: none"> <li>• "N" = no IRS debt or FMS debt.</li> <li>• "I" = IRS debt. The refund may be applied to this debt.</li> <li>• "F" = FMS debt. The Financial Management Services (FMS) manages the Treasury Offset Program for child support, non-federal tax debt and state income tax offsets. For information about FMS debt, taxpayers should contact Financial Management Services at 1-800-304-3107.</li> <li>• "B" = IRS debt and FMS debt</li> </ul>
<b>PINPresenceCd</b>	Form 1040	<p>The PIN presence code is returned for accepted or exception returns. The values are:</p> <ul style="list-style-type: none"> <li>• "Practitioner"</li> <li>• "Self-Select Practitioner"</li> <li>• "Self-Select On-line"</li> </ul>
<b>ITINMismatchCd</b>	Form 1040	<p>The value "M" is returned if the primary taxpayer has an Individual Tax Identification Number (ITIN) and there is a valid SSN on a Form W-2.</p>
<b>CompletedValidation</b>	All	<p>The completed validation codes returned are:</p> <ul style="list-style-type: none"> <li>• "Yes" if the validation completed successfully</li> <li>• "No" if the validation failed with a Reject-Stop error.</li> </ul>

To provide taxpayers with the assurance that the return the IRS received is the same return as the one the taxpayer believes was sent to IRS, the MeF system will report certain form entries in the acknowledgement: taxable income, total tax, net income (loss), balance, expected refund or balance due. This data will only be returned on the acknowledgement of the applicable form type. The taxpayer will need to check the data in the acknowledgement file against what they think was sent to the IRS to ensure that the file the IRS received is correct

Element Name	Form	Explanation
TaxableIncome	Form 1120, 1120S and 1120-F	The taxable income from Form 1120 and 1120-F will be returned.  The data from Form 1120S, Line 6 (Total income (loss)) will be returned as taxable income for Form 1120S.
TotalTax	Form 1120, 1120S and 1120-F	The total tax from Form 1120 and 1120-F will be returned.  The data from Form 1120S, Line 22c will be returned as total tax for Form 1120S.
NetIncomeLoss	Form 1065 and 1065-B	The data from the NetIncomeLoss field of the AnalysisOfNetIncome LossType will be returned for both Forms 1065 and 1065-B
ExpectedRefund Or BalanceDue	Form 1040	If the return contains an expected refund, the ExpectedRefund element and amount will be returned. If the return contains a balance due, then the BalanceDue element and amount will be returned. If the return has zero or no entry for these fields, then neither element is included.  Note: The amount returned as the “expected refund” does not mean this is the refund amount IRS is issuing to the taxpayer. The return will go through further processing after the acknowledgment is issued and the refund may be adjusted. The taxpayer will be notified if the refund has been adjusted.

The return acknowledgement will include the submission ID, return TIN (Taxpayer Identification Number), return type (since a transmission can include a combination of any of the MeF return types), and the acceptance status (see table on previous page). If the return is rejected, it will include the first 100 errors that were found. Each error generated contains the following information:

**DocumentID** – identifies in which form/schedule within the return the error occurs

**Path** - (Xpath) to the data element causing the violation, when available

**Error Category** - Errors are grouped into a small number of categories

**Error Message** - Rule text or XML validator message

**Rule Number** - Each rule is identified by a unique rule number

**Severity** - 'Reject And Stop' or 'Reject'

**Data value** - Data value causing the violation - when appropriate

MeF will generate “Alerts” when there is an issue that needs to be brought to the attention of the taxpayer. Alerts will be included in the acknowledgement file of accepted returns or rejected returns.

## 5.6 Generating Acknowledgement Files

Once the transmission is received, the MeF system validates the file and creates a Message response or an Error and a return acknowledgement within 24 hours. However, in previous filing seasons, many return acknowledgements were returned within 2-3 minutes, depending on the size of the message, number of validations in the return, and the load on the system. When a transmission is rejected, processing stops and return validation cannot begin.

The transmission response indicates the transmission errors that were found during validation. The transmission acknowledgement will include:

- the transmission ID
- timestamp
- transmission status: “A” for Accepted or “R” for Rejected
- errors (if applicable)
- GTX Key

If the transmission is rejected, there will only be a transmission acknowledgement. If the transmission is accepted, the MeF system continues to validate the returns within the file. One acknowledgement is generated for each return in the file.

Refer to the items in the Acknowledgement Schema (in the efileAttachments.xsd file), for all of the items that can be included in the return acknowledgement.

## 6 Retrieval Methods for MeF

This section describes:

- what transmitters and state agencies retrieve
- how they retrieve messages from the IRS
- how MeF generates acknowledgements for messages (transmissions) and returns (submissions) transmitted to the IRS
- how to retrieve acknowledgements through IFA and Application-to-Application

Transmitters can retrieve Acknowledgements and Status Records. States can retrieve Submissions and Acknowledgement Notifications.

- The Acknowledgement includes the Acceptance Status, “Accepted” or “Rejected”, of a return or extension. An Acknowledgement with “Accepted” is the proof that a federal return/extension has been accepted for processing by IRS. Form 1040 has an additional acceptance status of “Exception”. [See Section 5.4 Acknowledgement Schema](#) for more information on “Exception” status.
- The Status Record provides the status of the submission. The value “ACKNOWLEDGED” is not proof the return was accepted. It means an acknowledgement was generated, but does not prove the return was accepted or rejected.

If the message rejects, the system stops validating the submissions and generates a reject acknowledgement. If the message is accepted, MeF continues validating the submissions and generates an acknowledgement for each submission.

If a submission is transmitted through IFA, the subsequent acknowledgement generated will only be available through IFA. If a submission is transmitted through A2A, the subsequent acknowledgement generated will only be available through A2A.

The Acknowledgement Notification is generated for the State when the transmitter has retrieved the state acknowledgement. It includes the SubmissionID of the acknowledgement retrieved by the transmitter and the date and time (timestamp) the acknowledgement was retrieved by the transmitter. IRS does not create an acknowledgement notification when a federal return acknowledgement is retrieved or when a State submission has been denied.

## 6.1 Retrieving the Acknowledgement through Internet Filing

The following section describes the procedure for retrieving an acknowledgement through the Internet Filing Application.

As submissions are validated, the acknowledgements are made available to the transmitter for retrieval. When the transmitter requests New Acknowledgements, he/she indicates how many acknowledgements he/she wants to download (up the maximum of 100). The system will make available to the transmitter as many new (not previously retrieved) acknowledgements as are available, up to the count he/she requested. If there are additional new acknowledgements available, the screen will provide the following statement: "There are additional acknowledgements available for retrieval."

You do not have to pick up acknowledgement files before transmitting. However, you will need to pick up your acknowledgement as soon as possible to provide the taxpayer with their acknowledgement. MeF stores the acknowledgement file for one year from the date the acknowledgement was first created. You may re-retrieve an acknowledgement by following the steps in Section 6.1.1. They cannot be retrieved after one year.

### 6.1.1 Retrieving an Acknowledgement File

Refer to [Section 4.2.2](#) for Accessing and Logging into MeF IFA.

After the transmitter has logged in and selected the organization they will represent in this session, the MeF Internet Filing Home Page is displayed. The transmitter may then retrieve a production or test acknowledgement file by selecting the corresponding link. Retrieving submission acknowledgements involves the following steps:

[Step 1: Request Retrieval of the Acknowledgements](#)

[Step 2: Select the ETIN Associated with the Acknowledgements](#)

[Step 3: Select the Type of Acknowledgements for Download](#)

[Step 4: Download the Acknowledgement\(s\)](#)

The MeF IFA Web pages supporting these steps are shown in the following pages. In addition, the [Download Popups](#) seen while downloading acknowledgements is included after Step 4.

## Step 1: Request Retrieval of the Acknowledgements

Select the “Retrieve Production Acknowledgement” or “Retrieve Test Acknowledgement” file link/navigation tab, as appropriate.

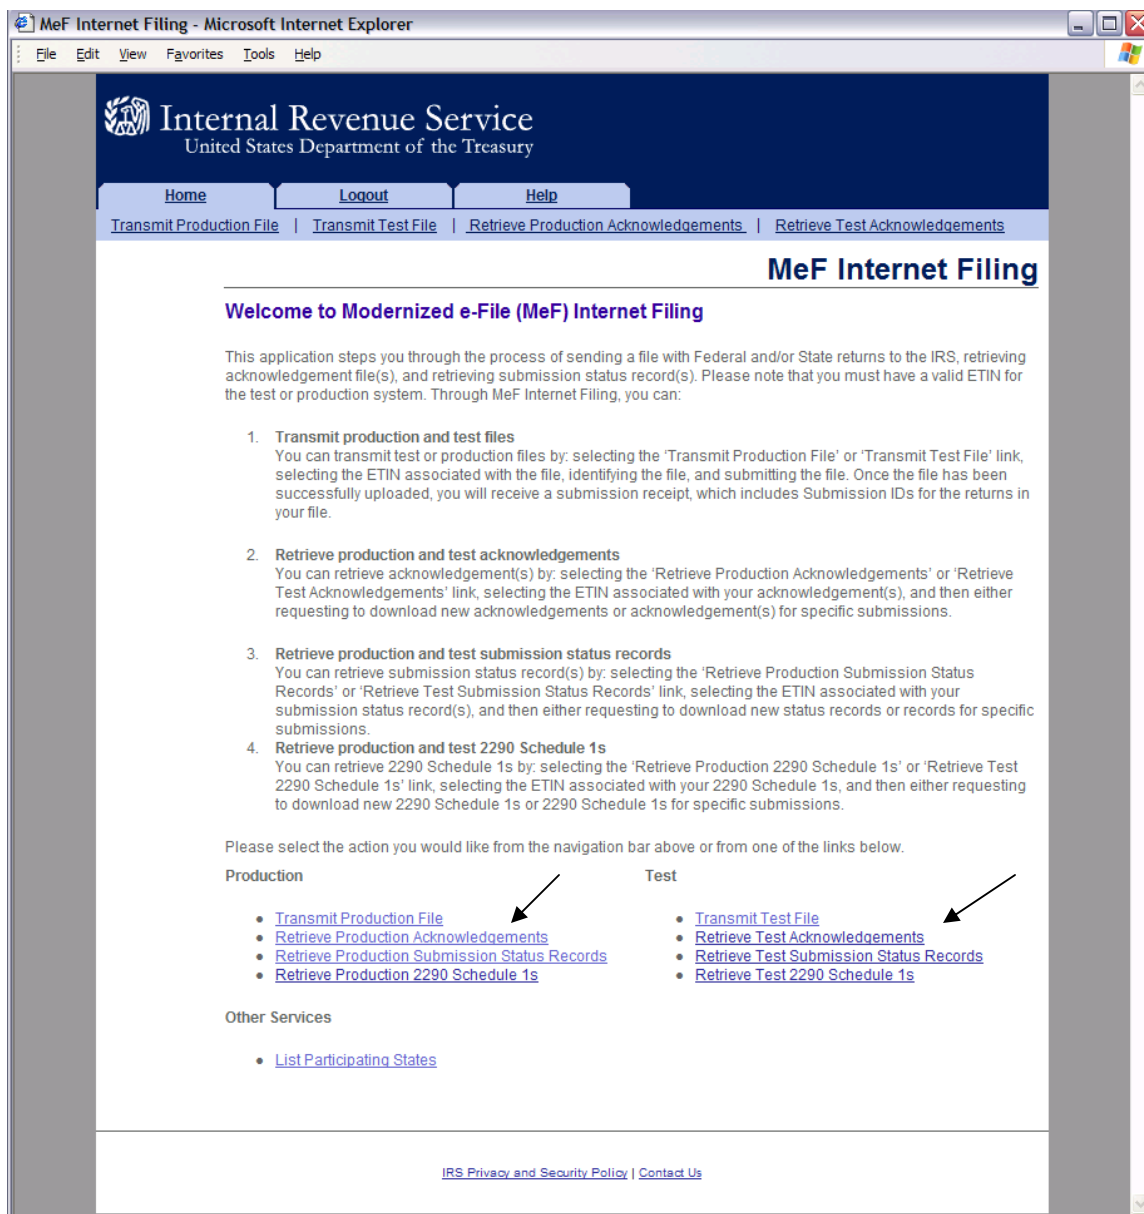

Figure 6-1: MeF Internet Filing Home Page

## Step 2: Select the ETIN Associated with the Acknowledgements

The Select ETIN for Production Acknowledgements page displays the ETINs authorized for the transmitter's use, in sorted order.

Figure 6-2: Select ETIN for Production Acknowledgement File Page

### Step 3: Select the Type of Acknowledgements for Download

The Retrieve Submission Acknowledgements screen allows the transmitter to retrieve either specific previously downloaded acknowledgements or all new acknowledgements (that is, not previously downloaded). The maximum number of acknowledgements you can retrieve at one time is 100. Select one of the following:

- **Retrieve new acknowledgements** radio button (selected by default). Normally the transmitter sends one return at a time through IFA and wants to retrieve the acknowledgement for that return. The default values "ALL:" can be used in this case. The user can limit the acknowledgements to types of returns (corporate, partnership, etc) or agency type (Federal or State) by selecting the appropriate values from the respective drop down boxes. The user can also select the number of new Acknowledgements to retrieve, up to the maximum of 100.
- **Retrieve previously downloaded acknowledgements based on Submission ID(s)** radio button. Enter the Submission ID(s) into the text box labeled "Enter Submission ID(s)". Each Submission ID should be separated by a comma, followed by a space. The Submission IDs are listed in the Transmission Receipt you received after your message successfully transmitted.

After selecting one of the radio buttons above, click the **Submit** button.

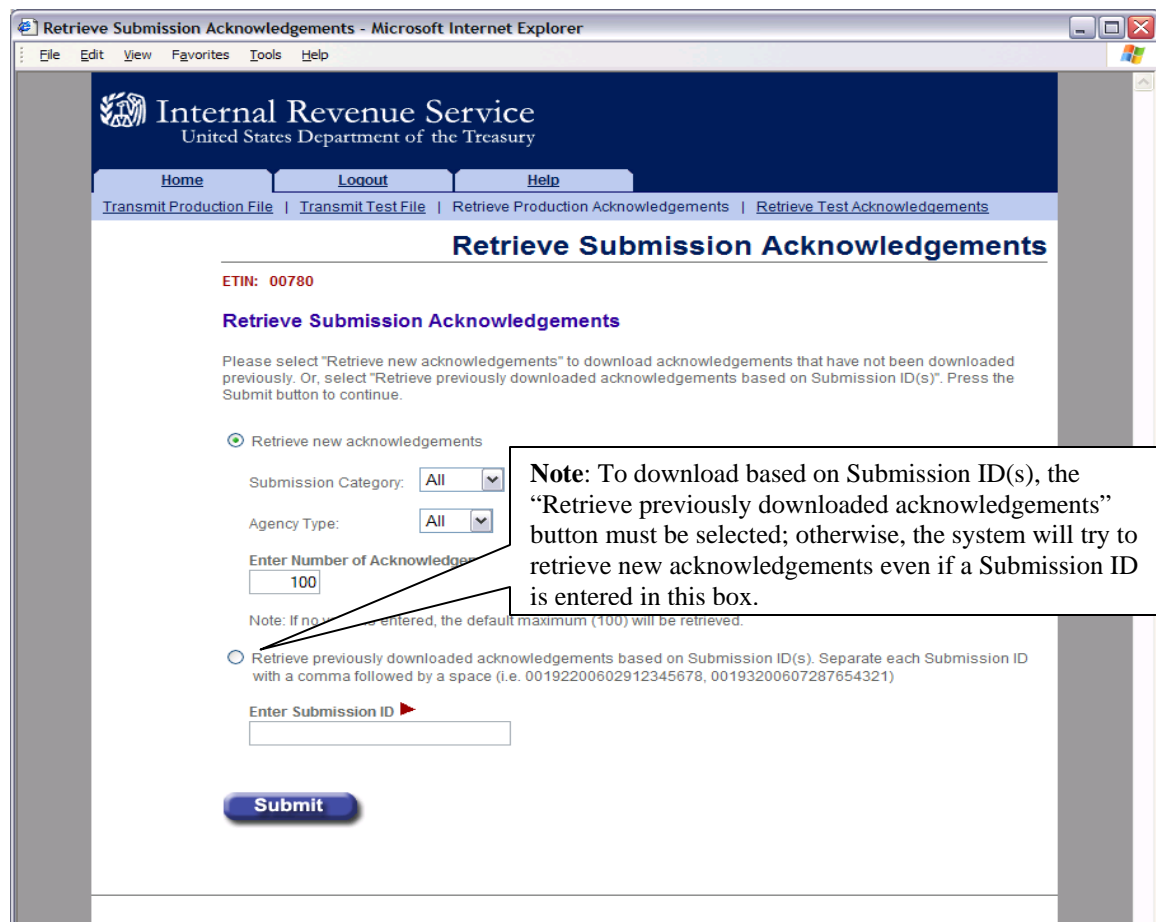

Figure 6-3: Retrieve Submission Acknowledgement

## Step 4: Download Acknowledgements

The Download Acknowledgements screen displays the Submission IDs for acknowledgements for the associated ETIN.

- Acknowledgements that can be included in the zip file are marked “Yes” in the **Include in File** column. Click the **Download** button to retrieve the acknowledgements.
- Acknowledgements that will not be included in the zip file are marked “No” in the **Include in File** column. The reason for not including the acknowledgement is supplied in the **Notes** column.

Figure 6-4 below displays the results when “Retrieve New Acknowledgements” is selected.

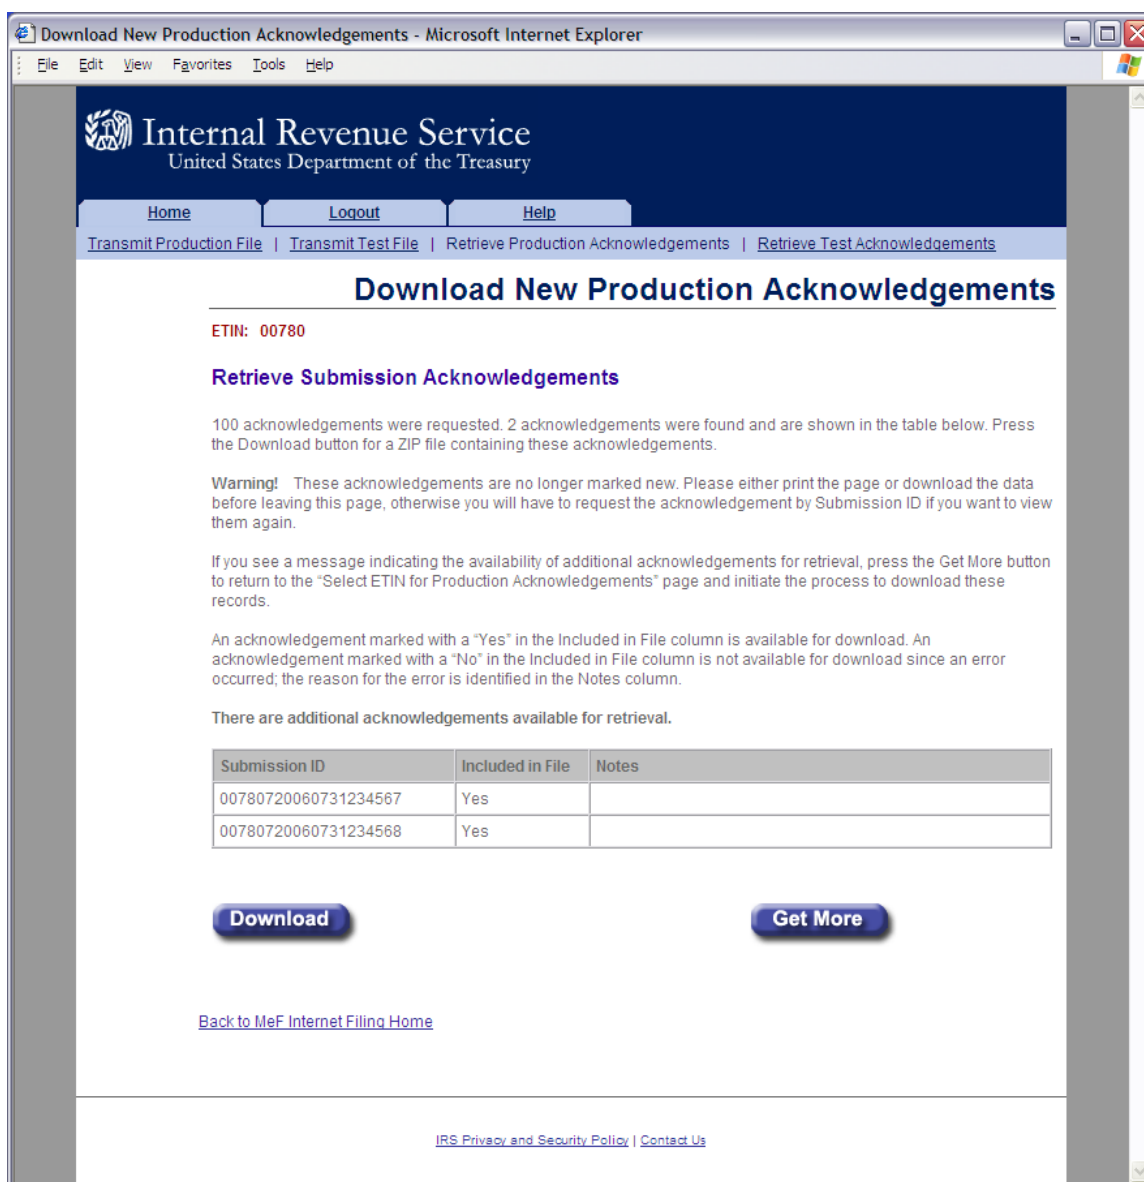

Figure 6-4: Download New Production Acknowledgements Page

Figure 6-5 below displays the results when “Retrieve previously downloaded acknowledgements based on Submission ID(s)” is selected. The “Notes” column explains why the acknowledgments are not available to be downloaded.

**Download Specific Production Acknowledgements**

ETIN: 00780

**Retrieve Submission Acknowledgements**

Acknowledgements were found for the following 3 submissions. Press the Download button to download a ZIP file containing these acknowledgements.

An acknowledgement marked with a "Yes" in the Included in File column is available for download. An acknowledgement marked with a "No" in the Included in File column is not available for download since an error occurred; the reason for the error is identified in the Notes column.

Submission ID	Included in File	Notes
00780720060731234567	Yes	
00780720060731234568	No	Failed to get Acknowledgements reason: Could not find acknowledgement for submission ID 00780720060731234569 for this ETIN 00780.
00780720060731234569	No	Failed to get Acknowledgements reason: Could not find acknowledgement for submission ID 00780720060731234569 for this ETIN 00780.

**Download**

**Figure 6-5: Download Specific Production Acknowledgments Page**

## Download Popups

During the download process, the following screens will display; screens will vary based on the configuration and version of the transmitter's operating system and browser. The following screens are from Internet Explorer 6.0 running on Windows 2000.

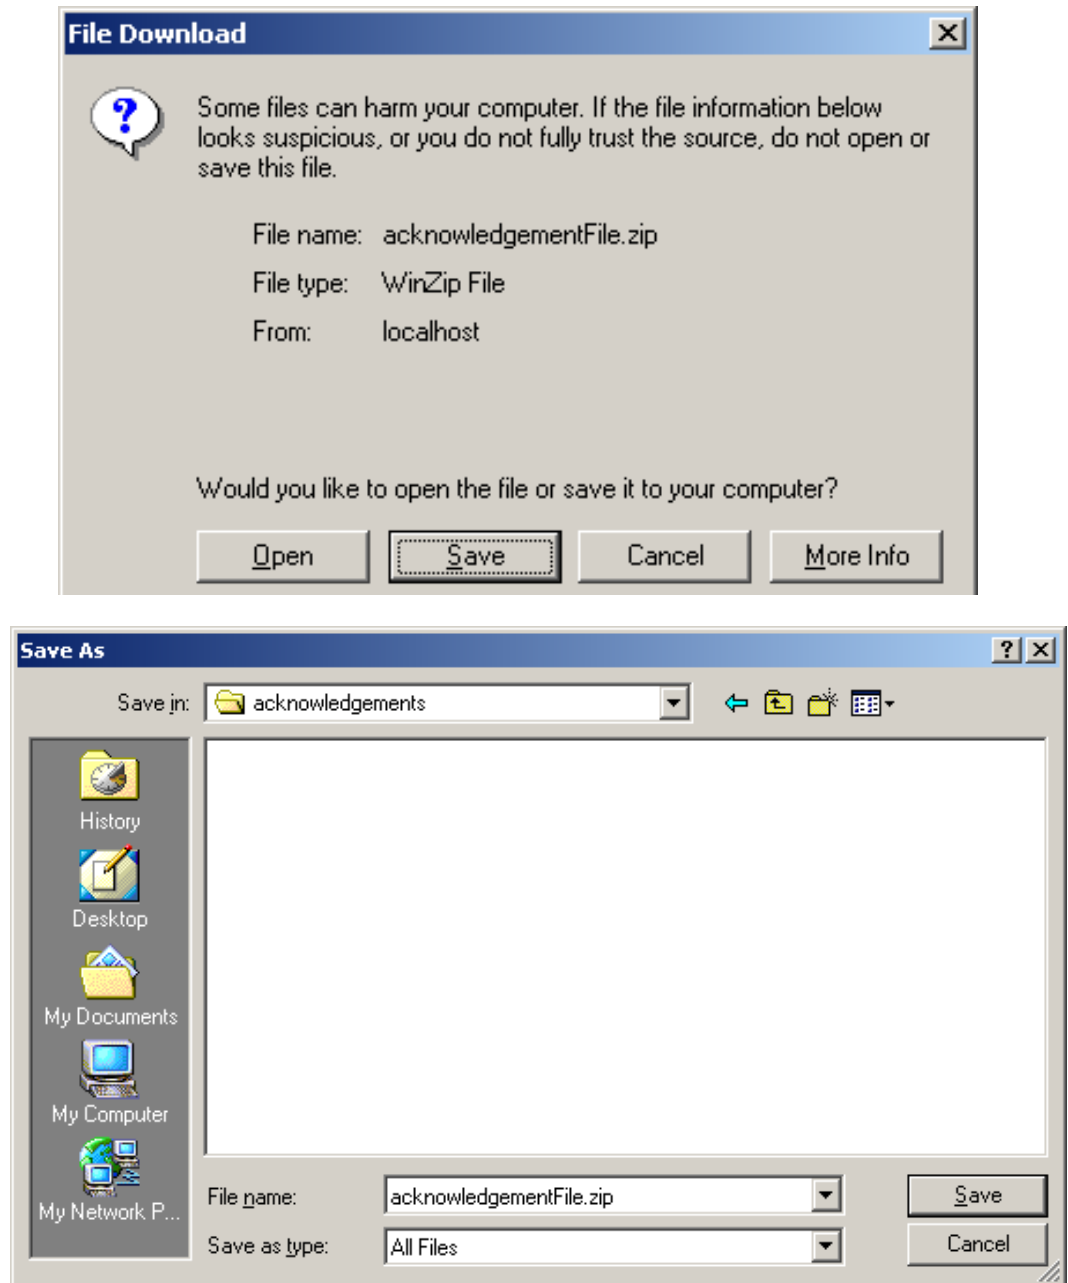

Figure 6-6: File Download and File Destination Windows

### 6.1.2 MeF Error Messages When Retrieving Acknowledgments

The following error messages may occur when attempting to retrieve acknowledgements:

- [No ETIN found](#)
- Number of Acknowledgements Requested Exceeds Maximum
- [Input Error \(Number of Acknowledgements\)](#)
- [Input Error \(Submission ID List\)](#)
- [Acknowledgments Not Found Error](#)
- [Not IFA Error](#)
- [System Error \(Retrieve\) – Error Not Identified](#)
- [System Error \(Retrieve\) – Error Identified](#)

The MeF IFA Web pages for these error messages are shown in the following pages.

## No ETIN Found

If the system does not find any associated ETINs for the user ID and customer ID, then the following error message displays. Check to ensure that you selected the appropriate link – you may have selected “Production” and only have test ETINs. You may go back to the MeF Internet Filing Home Page or terminate the session.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

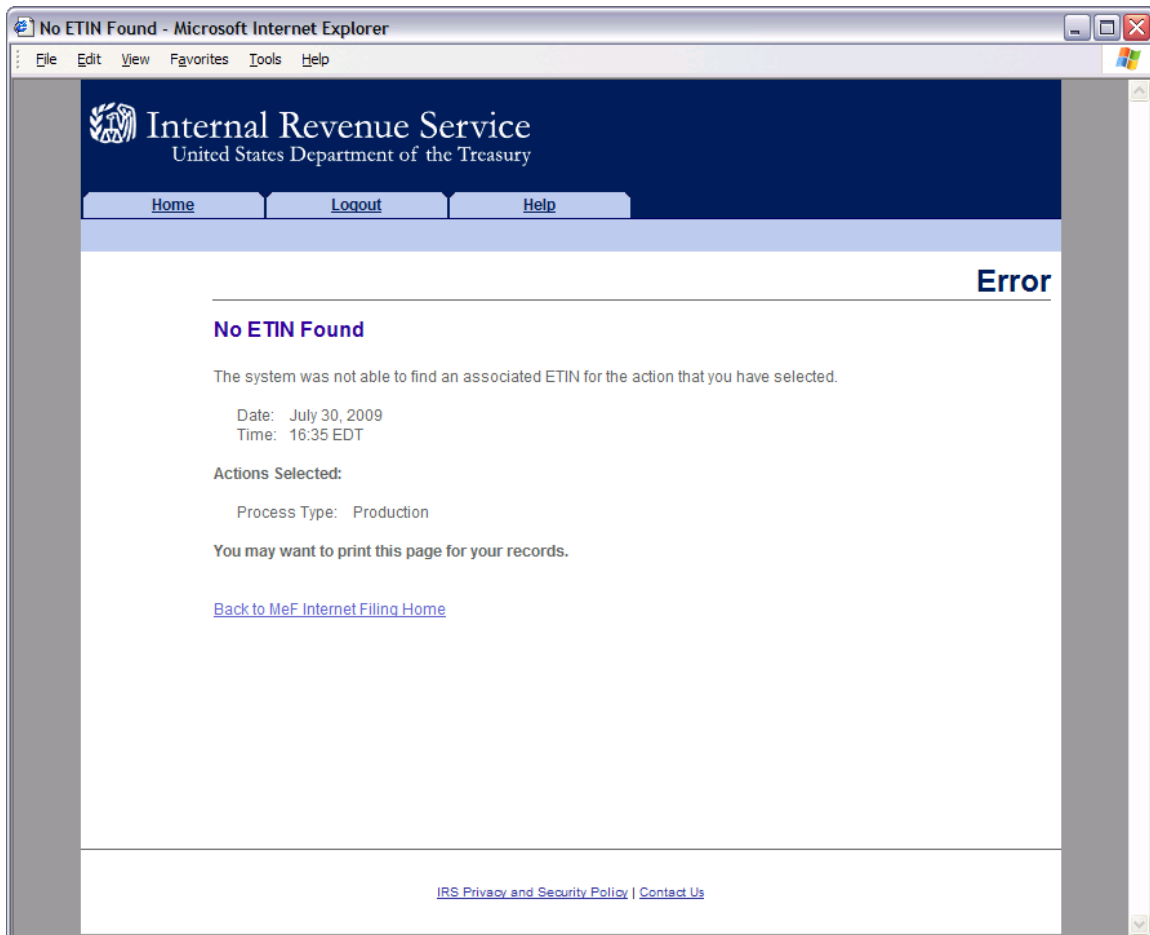

Figure 6-7: No ETIN Found Error Page

## Number of Acknowledgements Requested Exceeds Maximum

The error page below displays when the transmitter attempts to retrieve more acknowledgements than the maximum allowed, which is currently 100.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

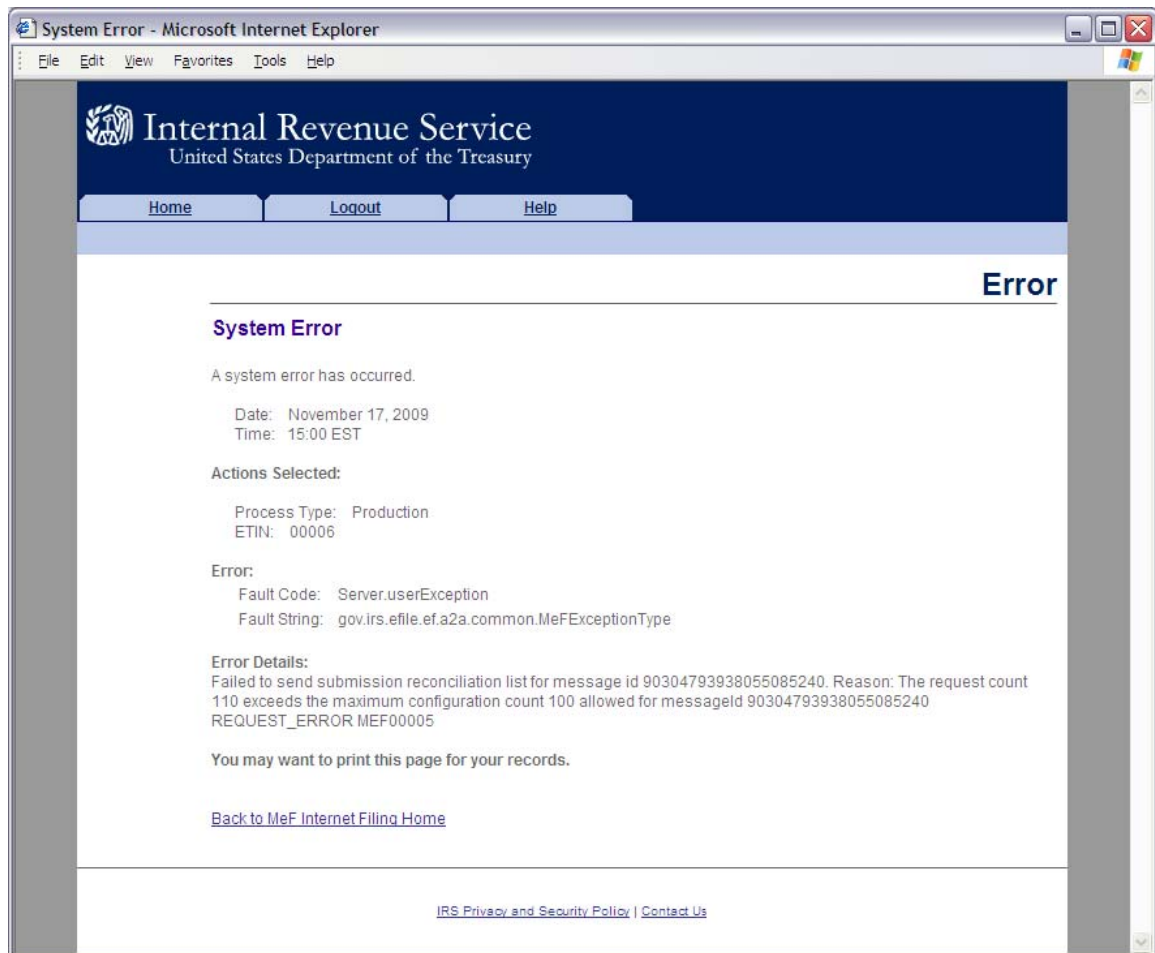

Figure 6-8: Number of Acknowledgements Exceeds Maximum Error Page

## Input Error (Invalid Format)

This error page displays when the number of acknowledgements, submission status records or 2290 Schedule 1s entered to retrieve new acknowledgements is not in the correct numeric format.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

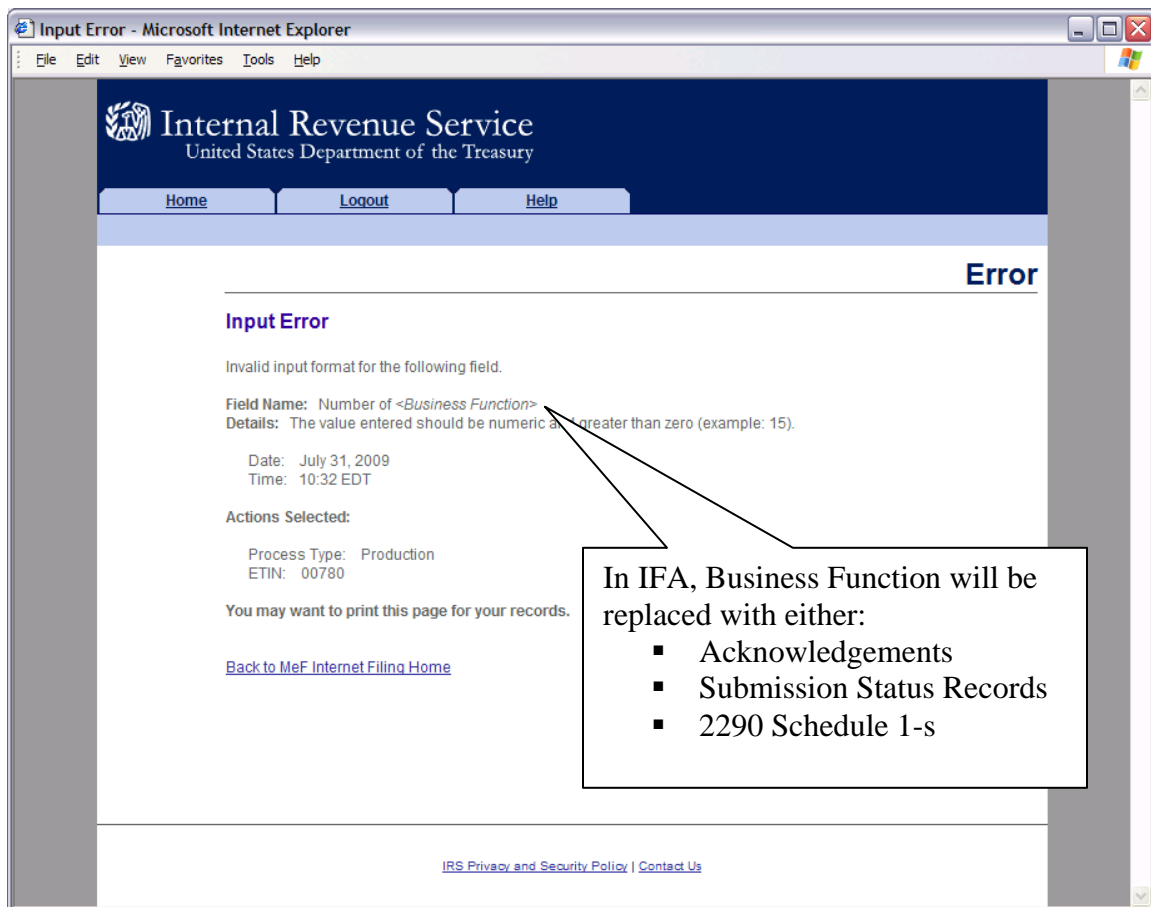

Figure 6-9: Input Error Page

## Input Error (Submission ID List)

This error page displays when the Submission ID list entered to retrieve specific acknowledgements is not in the correct format.

Click the **Home** tab on the navigation bar or click **Back to MeF Internet Filing Home** to return to the MeF Internet Filing Home page.

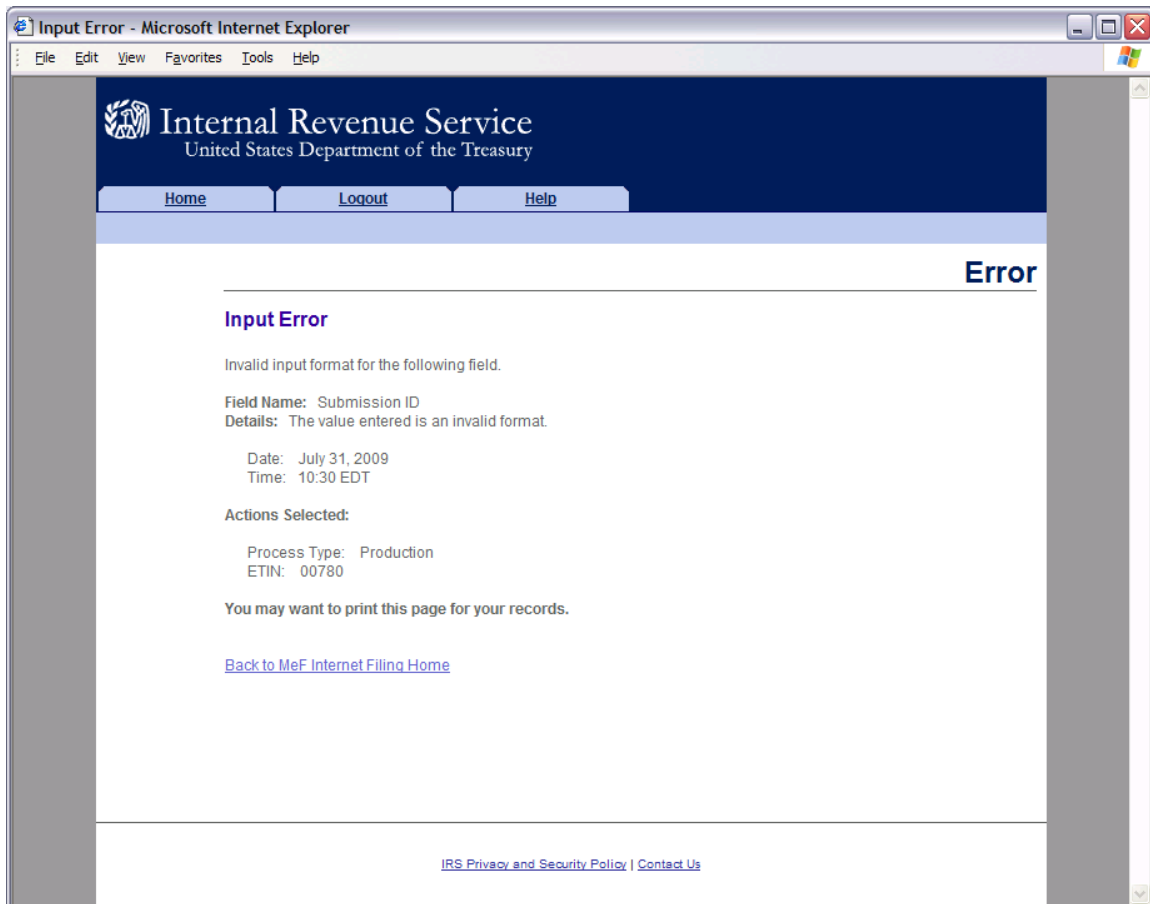

Figure 6-10: Input Error Page

## Retrievals Requested Not Found Error

This error page displays under any of the following circumstances:

- No acknowledgements are found, and the user has selected “New Acknowledgements” or has requested one or more acknowledgement(s) by entering a Submission ID.
- The return did not come in through Internet Filing (IFA).
- The system has not completed processing the submission and an acknowledgement is not available yet.

**Note:** This last circumstance is a common reason that the user will see this screen. It is not really an error. The user just needs to wait a little more time to allow the system to complete processing and try to retrieve the acknowledgement again.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

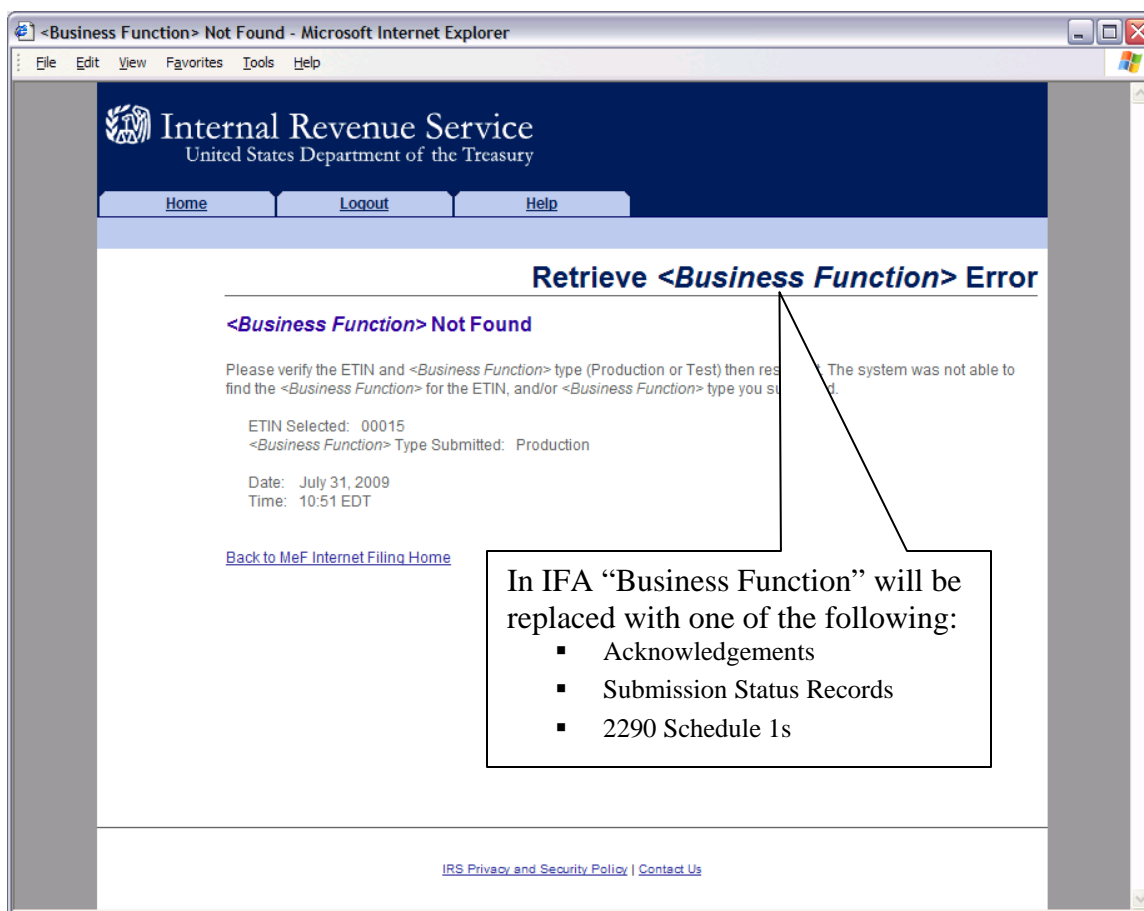

Figure 6-11: Retrieve Acknowledgement Error Page – Acknowledgements Not Found

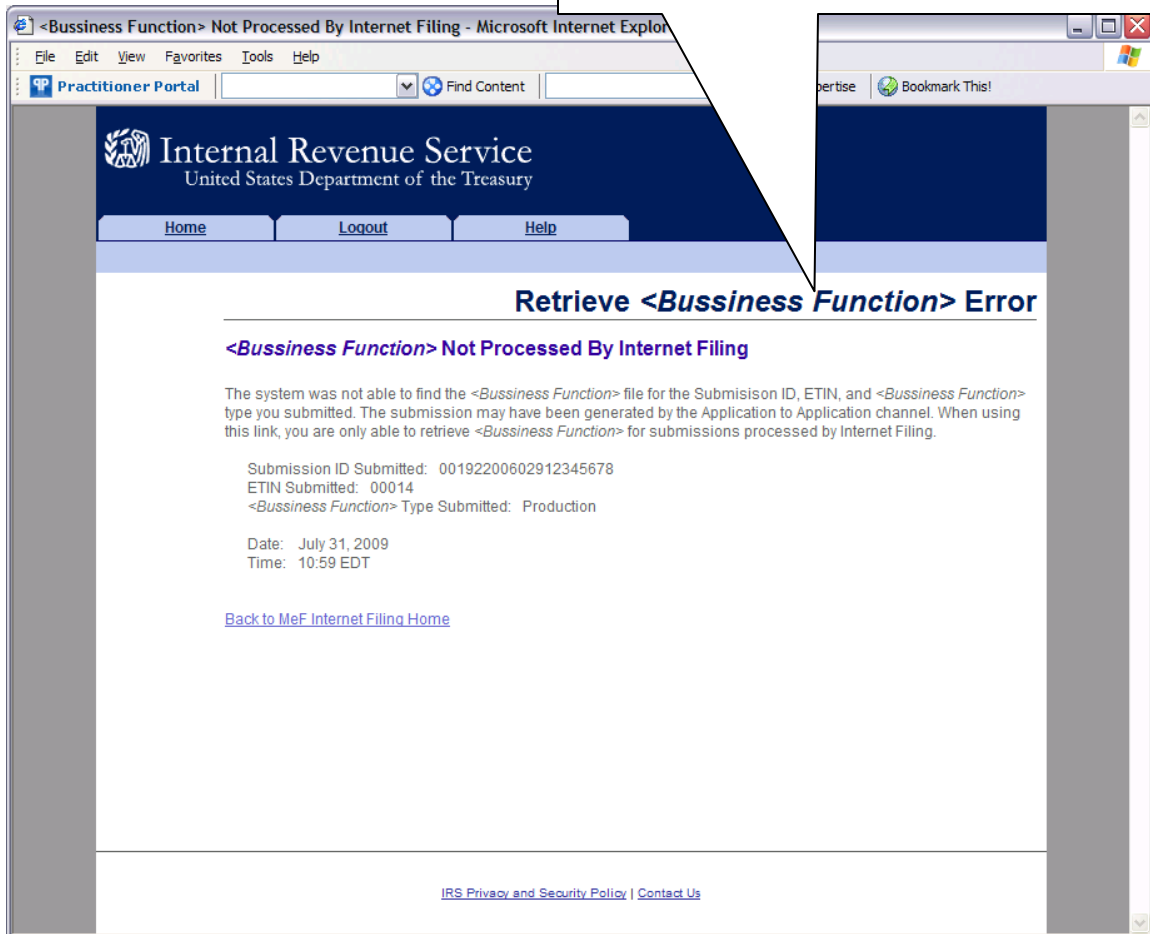

## Not Processed by IFA Error

This error page displays when the user has requested an acknowledgement that was not processed by IFA.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

In IFA “Business Function” will be replaced with one of the following:

- Acknowledgements
- Submission Status Records
- 2290 Schedule 1s

**Figure 6-12: Retrieve Acknowledgement Error Page – Acknowledgements Not Processed by Internet Filing**

## System Error Retrieve

This error page displays when a system error has occurred while trying to retrieve an acknowledgement. Call the e-help Desk (1-866-255-0654) if you continue to receive this message.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

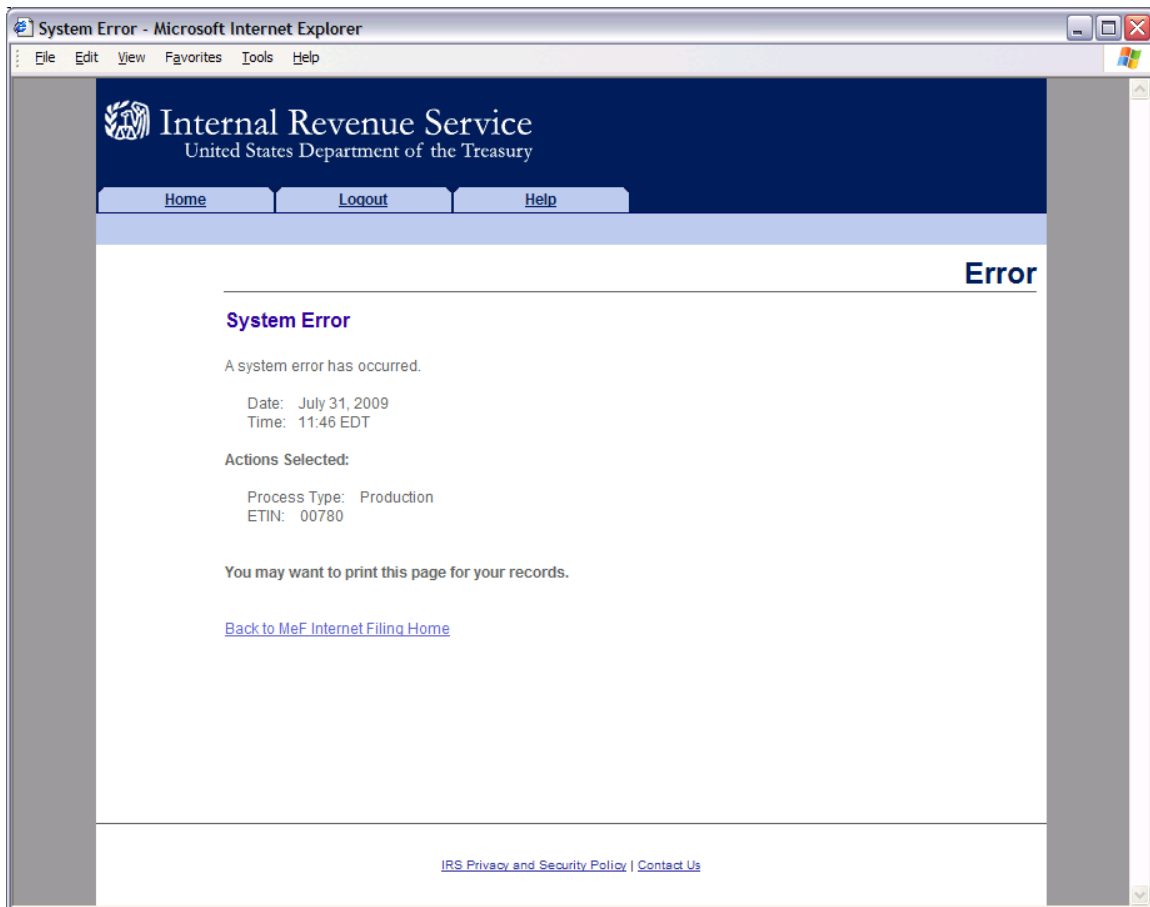

Figure 6-13: System Error Page – System Error Page – Back-end Error

## System Error (Retrieve)

This error page displays for errors occurring when retrieving acknowledgements and the system was able to specify the error that occurred.

Click the Home tab on the navigation bar or click Back to MeF Internet Filing Home to return to the MeF Internet Filing Home page.

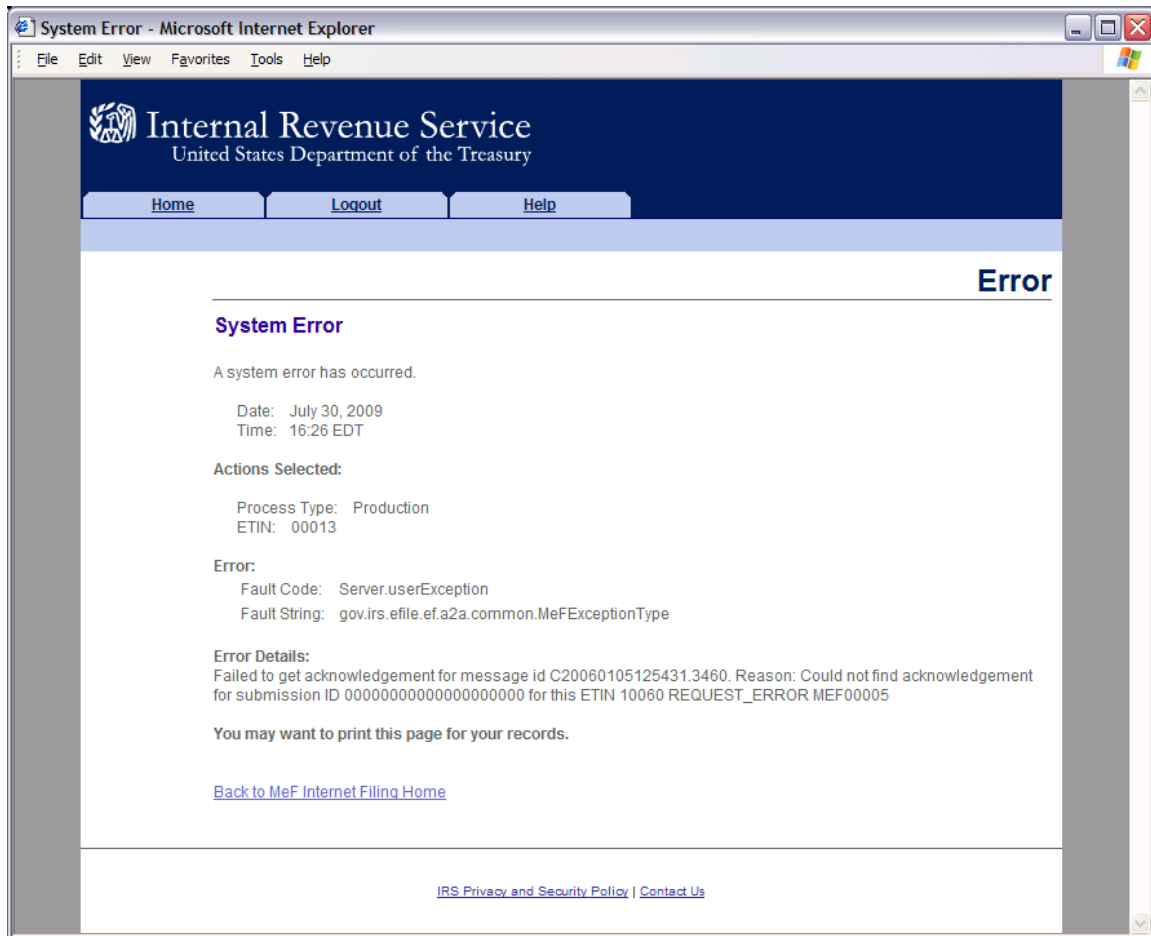

Figure 6-14: System Error Page with Error Specified

## **6.2 Viewing a List of Participating States in the Fed/State Program**

Refer to [Section 4.2.2](#) for Accessing and Logging into MeF IFA.

After the transmitter has logged in and selected the organization they will represent in this session, the MeF Internet Filing Home Page is displayed. A transmitter then performs the following steps to view a list of participating states in the Fed/State program:

[Step 1: Select List Participating States under Other Services.](#)

[Step 2: Select an ETIN to associate with the Production list of Participating States.](#)

The list of participating states will then display; an example is provided after Step 2.

## Step 1: Select List Participating States under Other Services.

Click the List of Participating States link at the bottom of the page.

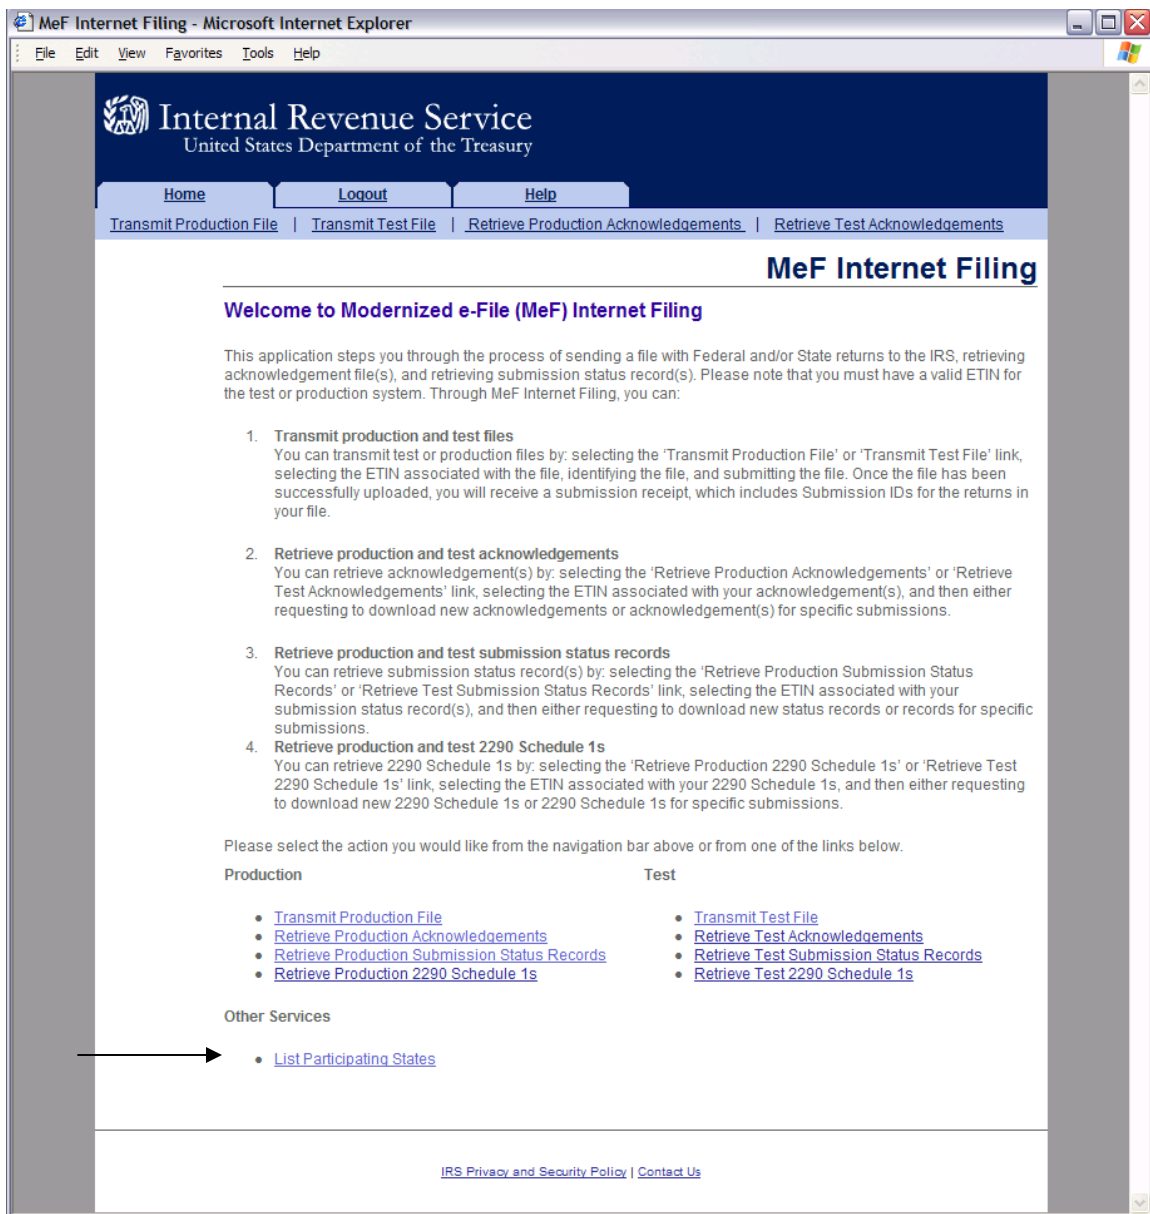

Figure 6-15: Select List Participating States

## Step 2: Select an ETIN to associate with the Production list of Participating States.

Click the radio button of the ETIN to be associated with the Production list of participating states. Then click Continue.

The screenshot shows a web browser window titled "Select ETIN for List Participating States - Microsoft Internet Explorer". The page header features the Internal Revenue Service logo and the text "Internal Revenue Service, United States Department of the Treasury". Below the header is a navigation bar with links: Home, Logout, Help, Transmit Production File, Transmit Test File, Retrieve Production Acknowledgements, and Retrieve Test Acknowledgements. The main heading is "Select ETIN for List Participating States". Below this, a sub-heading "Select ETIN" is followed by a paragraph: "The list of ETIN(s) associated with your account in the Production system is shown below. Please select the ETIN that you would like to use to retrieve acknowledgements and press the Continue button." A section titled "Choose an ETIN" with a red arrow icon points to a grid of radio buttons. The grid contains 24 ETINs arranged in 4 rows and 6 columns. The ETINs are: 00001, 00002, 00003, 00004, 00005, 00006; 00010, 00011, 00012, 00013, 00014, 00015; 00016, 00017, 00020, 00021, 00030, 00031; 00032, 00033, 00034, 00035, 00036, 00040; 00041, 00042, 00043, 00044, 00050, 00051; 00052, 00053, 00060, 00780. The radio button for 00780 is selected. Below the grid is a blue "Continue" button. At the bottom of the page, there are links for "IRS Privacy and Security Policy" and "Contact Us".

## List Participating States

### State Participation Results

The following states have indicated that they are participating in the MeF Fed/State program. Please contact each state to determine when it will begin accepting returns.

State	Category	Fed/State	Standalone
Maryland	CORP	Yes	No
	EO	Yes	No

## 6.3 Retrieving Production Federal and/or State Submission Status Records

Refer to [Section 4.2.2](#) for Accessing and Logging into MeF IFA.

After the transmitter has logged in and selected the organization they will represent in this session, the MeF Internet Filing Home Page is displayed. A transmitter then performs the following steps to retrieve Production/Test submission status records:

- Step 1: [Select an option to retrieve either Production or Test submission status records](#)
- Step 2: [Select an ETIN to associate with the Production/Test submission status records](#)
- Step 3: [Submit a request to retrieve the Production/Test submission status records](#)
- Step 4: [Download new Production submission status records](#)
- Step 5: [Download specific Production submission status records based on Submission ID](#)

The MeF IFA Web pages supporting these steps are shown in the following pages. The [Status Records Not Found](#) Error Message is provided after Step 6.

## Step 1: Select an Option to Retrieve Either Production or Test Submission Status Records.

Click either the Retrieve Production Submission Status Records or Retrieve Test Submission Status Records at the bottom of the page.

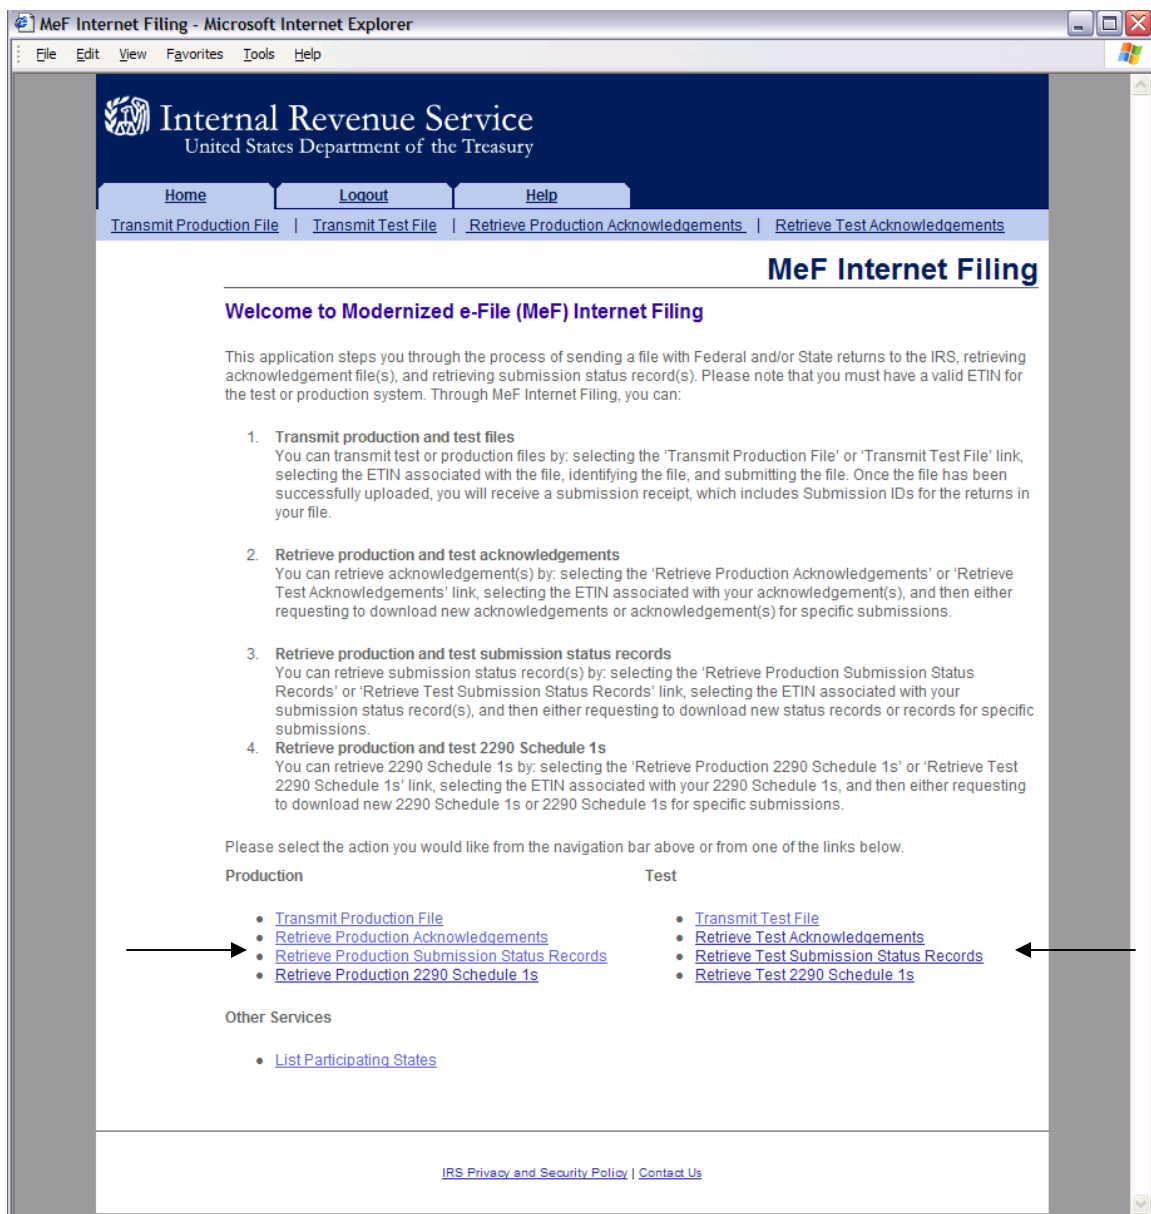

Figure 6-18: Select an Option to Retrieve Either Production or Test Submission Status Records

## Step 2: Select an ETIN To Associate with the Production/Test Submission Status Records

After selecting the **Retrieve Production (or Test) Submission Status Record** link, the Select ETIN for Production Submission Status Records page displays. This page shows all unique ETINs authorized for the transmitter's use, sorted in order horizontally.

Click the radio button of the ETIN to be associated with the Production list of participating states.

Click the Continue button.

Figure 6-19: Select ETIN for Production Submission Status Records Page

### Step 3: Submit a Request to Retrieve Production Submission Status Records

The Retrieve Production Submission Status Records page allows the transmitter to retrieve either specific previously downloaded submission status records, or all new submission status records (that is, not previously downloaded).

To retrieve new submission status records:

- Click the “Retrieve new submission status records” radio button (set as default).
- Enter a number between 1 and 100 (the current maximum) in the “Enter Number of Submission Status Records” text box, to specify the number of submission status records to retrieve at one time.

**Note:** The maximum number of submission status records a transmitter can submit for retrieval is configurable. If the transmitter doesn’t specify a number, then the default maximum number 100 will be used.

To retrieve previously downloaded submission status records based on Submission ID(s):

- Click the “Retrieve previously downloaded submission status records based on Submission ID(s)” radio button
- Enter the Submission ID(s) to be retrieved in the Enter Submission ID(s) text box.

**Note:** Each Submission ID should be separated by a comma, followed by a space. Submission IDs are listed on Submission Receipts, reporting the successful transmission of a message.

Click the Submit button

### Retrieve Production Submission Status Records

ETIN: 00780

#### Retrieve Submission Status Records

Please select "Retrieve new submission status records" to download submission status records that have not been downloaded previously. Or, select "Retrieve previously downloaded submission status records based on Submission ID(s)". Press the Submit button to continue.

☒ Retrieve new submission status records

Enter Number of Submission Status Records 

100

Note: If no value is entered, the default maximum (100)

☐ Retrieve previously downloaded submission status records based on Submission ID(s)

Submission ID with a comma followed by a space (i.e. 00349720060731234560, 00349720060731234501)

Enter Submission ID(s) 

Submit

**Note:** To download based on SubmissionID(s), select the “Retrieve previously downloaded acknowledgments” button. If this button is not checked, the system will try to retrieve new acknowledgements even if you enter a submissionID in the box

Figure 6-20: Retrieve Production Submission Status Records Page

## Step 4: Download New Production Submission Status Records

If the transmitter elects to retrieve new submission status records on the Retrieve Production Submission Status Records page (see Figure 6-20), the Download New Production Submission Status Records page displays, showing any new status records found. Click the **Download** button for a ZIP file containing the submission status records shown in the table.

**Important!** Since these records will no longer be marked new, you should either download the records before leaving this page or print this page for future reference. To view any additional status records you don't download now, you will have to request the records by Submission ID.

If you see the message "There are additional new submission status records available for retrieval." click the "Get More" button to return to the Select ETIN for Production Submission Status Records page (see Figure 6-19).

## 6.4 Retrieving Form 2290 Schedule 1s

Refer to [Section 4.2.2](#) for Accessing and Logging into MeF IFA.

After the transmitter has logged in and selected the organization they will represent in this session, the MeF Internet Filing Home Page is displayed. A transmitter then performs the following steps to retrieve Production Form 2290 Schedule 1s:

[Step 1: Request Retrieval of the Form 2290 Schedule 1s](#)

[Step 2: Select the ETIN associated with the Form 2290 Schedule 1s](#)

[Step 3: Select the Type of Form 2290 Schedule 1s to Retrieve](#)

[Step 4: Download new Form 2290 Schedule 1s](#)

[Step 5: Download Specific Form 2290 Schedule 1s based on Submission ID](#)

The MeF IFA Web pages supporting these activities are shown in the following pages.

## Step 1: Request Retrieval of the Form 2290 Schedule 1s

Click on either the **Retrieve Production 2290 Schedule 1s** link or the **Retrieve Test 2290 Schedule 1s** link at the bottom of the page.

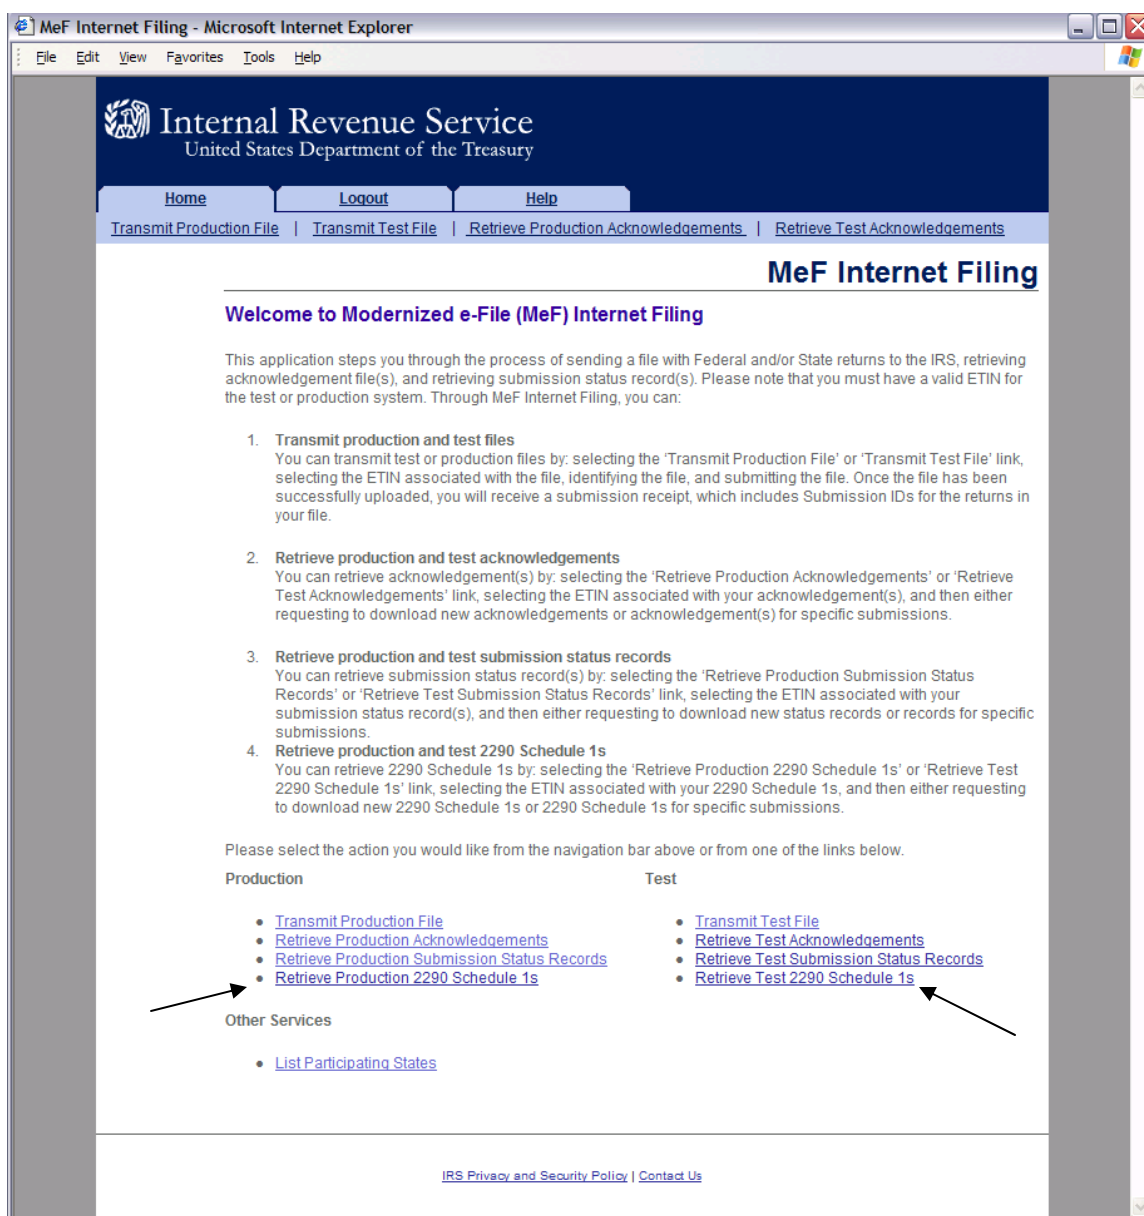

Figure 6-23: Retrieve Production or Test Form 2290 Schedule 1s

## Step 2: Select the ETIN associated with the Form 2290 Schedule 1s

After selecting the Retrieve Production (or Test) 2290 Schedule 1s link, the Select ETIN for Production 2290 Schedule 1 page displays. This page shows all ETINs (unique) authorized for the transmitter's use, in order sorted horizontally.

Click the radio button of the ETIN to be associated with the Production list of participating states.

Click the Continue button.

Figure 6-24: Select ETIN for Production 2290 Schedule 1s Page

### Step 3: Select the Type of Form 2290 Schedule 1s to Retrieve

The Retrieve Production 2290 Schedule 1s page allows the transmitter to retrieve either specific previously downloaded 2290 Schedule 1s, or new 2290 Schedule 1s (that is, not previously downloaded).

To retrieve new 2290 Schedule 1s:

- 1) Click the Retrieve new 2290 Schedule 1s radio button (selected by default).
- 2) Enter a number between 1 and the configurable maximum, currently 100, in the “Enter Number of 2290 Schedule 1s” text box, to specify the number of 2290 Schedule 1s to retrieve at one time. **Note:** If the transmitter doesn’t specify a number, then the default maximum number, currently 100, will be used.
- 3) Click the Submit button

To retrieve previously downloaded 2290 Schedule 1s:

- 1) Click the Retrieve previously downloaded 2290 Schedule 1s based on Submission ID(s) radio button.
- 2) Enter the Submission ID(s) to be retrieved in the Enter Submission ID(s) text box. **Note:** Each Submission ID should be separated by a comma, followed by a space. (Submission IDs are listed on Submission Receipts, reporting the successful transmission of a message.)
- 3) Click the Submit button.

## 6.5 Retrieving Acknowledgements through Application-to-Application (A2A)

Transmitters communicate with the MeF system using a series of service requests that are accomplished using messages. The service requests include:

MeF Application-to-Application		
SERVICE REQUEST	TRANSMITTER	STATE AGENCY
Get New Acknowledgements	X	
Get Acknowledgements	X	
Get Acknowledgement	X	
Get Acknowledgements by Message ID	X	

As submissions are validated, the acknowledgements are generated and made available to the transmitter for retrieval. All the submissions in the originating SendSubmissions request do not have to process before acknowledgements become available to the transmitter. When the transmitter requests GetNewAcknowledgements, he/she indicates how many acknowledgements he/she wants to download, (up to the current maximum of 100). The transmitter can retrieve as many acknowledgements that are available, up to the number he/she requested.

The response message provides information in the MoreAvailable field. If the value in that field is "false" then there are no more acknowledgements ready to retrieve. If the value in that field is "true", then there are more acknowledgements available to download. It is important to note that these acknowledgements can be for submissions from different SendSubmissions messages sent by the transmitter.

A2A does not have a transmission acknowledgement. There is a response that contains a receipt. If errors are found in the message, the message service response indicates the error with the letter 'E' appended to the end of the message ID, and the response itself contains the specific error. These are not retrieved through the GetNewAcknowledgements service request. The service request response handles all this.

There are four Get Acknowledgement types:

- GetNewAcknowledgements - This request retrieves acknowledgements not previously retrieved by another GetNewAcknowledgements.
- GetAcknowledgements up to max count - This request requires the submission IDs of the submissions for which the acknowledgements are being requested.
- GetAcknowledgement - This request requires the submission ID of the submission for the acknowledgement being requested.
- GetAcknowledgementsByMsgId – This request requires the Message ID of the original GetNewAcknowledgement for the acknowledgements being requested. The MessageId of the GetNewAcknowledgement goes in the SOAP body of this request.

For more information about A2A, refer to the MeF State and Trading Partners ICD and the MeF Submission Composition Guide.

## 6.6 Retrieving State Submissions through Application-to-Application (A2A)

State agencies communicate with the MeF system using a series of service requests that are accomplished using messages. The service requests include:

MeF Application-to-Application		
SERVICE REQUEST	TRANSMITTER	STATE AGENCY
Get New Submissions		X
Get Submission		X
Get Submissions		X
Get Submissions by Message ID		X

The State applications have authorization to programmatically request a Web Service to retrieve submissions. Each State is responsible for validating their State submissions, and for generating a State acknowledgement for each State submission, which will be returned to the IRS for retrieval by the transmitter. Both Federal and State returns must be in XML format, with optional PDF, when allowed by the state.

There are four Get Submission types:

1. GetNewSubmissions - This request retrieves submissions not previously retrieved, up to max count. The default setting is up to 100 submissions and 2GB per filer. The state can request IRS change the default count and size.
2. GetSubmission - This request requires the submission ID of the submission requested.
3. GetSubmissions - This request requires the submission IDs of the submissions requested.
4. GetSubmissionsByMsgID - This request requires the message ID of the submissions requested.

For more information about A2A, refer to the MeF State and Trading Partners Reference Guide and the MeF Submission Composition Guide.

## 7 Payment Options

### 7.1 Electronic Funds Withdrawal

The MeF Program will allow a taxpayer to pay the balance due on Form 1040/1120/1120-F/1120S/1120-POL/990-PF/1065/1065-B/720/2290 tax returns or the 4868/7004/8868 extension forms by authorizing an electronic funds withdrawal. A taxpayer filing an individual return or extension can also include an estimated tax payment, IRSESPayment, with either the Form 1040 or Form 4868.

If the taxpayer chooses this payment method, they may authorize the entire payment (no greater than 200% of the balance shown on the return) or a partial payment be made at the time that their tax return/extension form is electronically filed.

**Note:** For extension Forms 7004 and 8868, the payment must equal the amount shown as the balance due. For extension Form 4868, the payment must equal the amount shown on Form 4868, Line 7 (Amount you are paying).

The taxpayer must specify the bank account from which they wish to have the payment withdrawn and the date on which the withdrawal will be made. This allows the taxpayer to pay the balance due when tax return or form is processed or schedule the payment for withdrawal on a future date, not later than the return's due date. For returns transmitted after the due date, the payment date must be the same as the date the return is transmitted.

**Note: The Forms 720 and 2290 are to be paid when the return is filed.**

Form 7004 does not extend the time to pay tax. If the entity is a corporation or affiliated group of corporations filing a consolidated return, the corporation must remit the amount of the unpaid tax liability shown on line 8 on or before the due date of the return. If you file Form 7004 electronically, you can pay by Electronic Funds Withdrawal (EFW). Refer to Form 8878-A. A trust (Form 1041), electing large partnership (Form 1065-B), or REMIC (Form 1066) will be granted an extension even if it cannot pay the full amount shown on line 8. But it should pay as much as it can to limit the amount of penalties and interest it will owe. Foreign corporations that maintain an office or place of business in the United States should pay their tax as described below for domestic corporations. If you are requesting an extension of time to file Form 1042, see the deposit rules in the instructions for the form to determine how payment must be made.

If the electronic funds withdrawal (EFW) is authorized, an IRS Payment record, or IRS ES Payment record for Form 1040 and 4868, must be attached to the electronic return and an EFW consent statement must be signed as described in [Section 9, Electronic Signature Specifications](#).

Domestic corporations must deposit all income tax payments by using the Electronic Federal Tax Payment System (EFTPS) or Form 8109, Federal Tax Deposit Coupon, by the due date of the return. If the corporation expects to have a net operating loss carryback, the corporation can reduce the amount to be deposited to the extent of the overpayment resulting from the carryback, provided all other prior year tax liabilities have been fully paid and Form 1138, Extension of Time for Payment of Taxes by a Corporation Expecting a Net Operating Loss Carryback, is filed with Form 7004. Additional EFTPS information is posted to <http://www.irs.gov/efile/article/0,,id=98005,00.html>

Entities that do not bank in the United States that need to make a payment cannot pay using EFW or EFTPS. On all checks or money orders, write the entity's taxpayer identification number (TIN), the type of tax return, and the tax year to which the payment applies. Make the check or money order payable to "United States Treasury" and mail to the address shown in the specific form's instruction.

**Note:** the payment record can only be attached at the top-level return and any payment attached otherwise will not be processed.

The following information is required in the payment record:

- Routing Transit Number
- Bank Account Number
- Account Type
- Payment Amount
- Requested Payment Date
- Taxpayer's Daytime Phone Number

### **7.1.1 EFW Payment When Return is Rejected**

EFW payments are only processed with accepted returns or accepted extensions. If the return and payment cannot be submitted by the due date taxpayers should consider submitting their payment by other means to avoid assessment of late fees. Other electronic payment options include EFTPS (requires enrollment), credit/debit card, Same-Day (Fedwire®) payment (primarily used for business payments). For information on electronic payment options visit IRS.gov (search: e-pay). Another option is to pay by check or money order.

The "10-Day Rule" for business returns, allowing for additional days to perfect a return (explained in Section 1.4.2) does not apply to payments.

### **7.1.2 EFW Payment Cancellation**

To revoke or cancel any EFW payment, contact the U.S. Treasury Financial Agent, toll-free, at 1-888-353-4537. Cancellation requests must be received no later than 8:00 p.m., Eastern Standard Time, at least two business days prior to the scheduled payment date. If there is a change to the bank account information provided on the return or form, call this number to cancel the scheduled payment. Please wait at least ten (10) days from when your IRS e-file return was accepted before calling to inquire about the status of your payment. When calling, please be prepared to provide the Taxpayer Identification Number (TIN), exact payment amount, and bank account number entered in your payment record.

The following is a sample of business rule checks to ensure a routing number is in the payment record. The complete list of business rules is found on each form's respective IRS.gov Web site shown below.

\*Note: Business Rule applies to Forms 720, 2290, 1040, 4868, 1120, 1120-F, 1120S, 1120-POL, 990-PF, 8868, 7004, 1065 and 1065-B.

R0000-075	The Routing Transit Number (RTN) must conform to the banking industry RTN algorithm.	Incorrect Data	Reject	See *Note above
R0000-906	Routing Transit Number (RTN) included in the return must be present in the e-File database.	Database Validation Error	Reject	See *Note above

The complete listing of business rules can be found by selecting the appropriate form type on IRS.gov: <http://www.irs.gov/efile/article/0,,id=171950,00.html>.

The following is a sample of business rules associated with the IRS Payment record. The complete list of business rules is found on each form's respective IRS.gov Web site shown below.

Rule Number	Rule Text	Error Category	Severity	Tax Type
FPYMT-018	Tax payer's Day Time Phone Number in IRS Payment Record cannot equal all zeros.	Incorrect Data	Reject	720 2290 1120 1120S 1120-F 1120-POL 990-PF 8868, 7004, 1065, 1065-B
FPYMT-040	Taxpayer's Day Time Phone Number in IRS Payment Record or IRS ES Payment Record cannot equal all zeros.	Incorrect Data	Reject	1040 4868
FPYMT—27	If the timestamp (in the GTX key or Response to Send Submissions Request) is on or before the due date of the return (three and one half months after the "TaxPeriodEndDate" in the Return Header), then the "RequestedPaymentDate" in the IRS Payment Record must be on the due date or before the due date but not more than five days prior to the received date.	Incorrect Data	Reject	1065 1065-B
FPYMT-029	If the timestamp is on or before the due date of the return (two months and 15 days after the "TaxPeriodEndDate" in the Return Header), then the "RequestedPaymentDate" in the IRS Payment Record must be on the due date or before the due date but not more than five days prior to the received date.	Incorrect Data	Reject	1120 1120-F 1120S 1120-POL
FPYMT-050	If IRS Payment Record is present, then the "Requested Payment Date" in the IRS Payment Record must be on or before the due date but not more than 5 days prior to the received date, unless Form 4868 Line 8 checkbox or Line 9 checkbox is checked.	Incorrect Data	Reject	4868
FPYMT-054	If the timestamp (in the GTX key or Response to Send Submissions Request) is on or before the due date of the return, then the "RequestedPaymentDate" in the IRS Payment Record must be on the due date or before the due date but not more than five days prior to the received date.	Incorrect Data	Reject	1040

The complete listing of business rules can be found by selecting the appropriate form type on IRS.gov: <http://www.irs.gov/efile/article/0,,id=171950,00.html>.

## 8 MeF Alternative Signatures

### 8.1 Electronic Signature Requirement for Corporations, Partnerships, Exempt Organization Returns (except Form 990-N), Forms 720 and 8849

For corporations, partnerships, exempt organization returns (except Form 990-N) and Forms 720 and 8849, the MeF system requires taxpayers and Electronic Return Originators (EROs) to use one of the following two alternative signature options for signing electronic returns

- Practitioner PIN method
- Scanned Form 8453

A Large Taxpayer or a taxpayer filing through an on-line provider must use the scanned Form 8453 signature method when filing returns for corporations, partnerships, exempt organizations (except Form 990-N), Forms 720 and 8849. Publication 4163 has detailed information about Large Taxpayers.

The selected signature option must be identified in the Return Header. MeF validates that a signature exists for each return. If the taxpayer uses a PIN to sign the return, all the appropriate PIN information must be present in the return header. If the electronic return does not contain the required signatures, it will be rejected.

### 8.2 Electronic Signature Requirement for Form 2290

The Form 2290 Return Header schema includes the Form 2290 signature and the Schedule 1 (Form 2290) Consent to Disclosure of Tax Information signature. The Schedule 1 (Form 2290) signature is optional and used when the taxpayer consents to disclose information about the taxpayer's payment of the Heavy Highway Vehicle Use Tax (HVUT) to the federal Department of Transportation (DOT), U.S. Customs and Border Protection (CBP), and to state Departments of Motor Vehicles (DMV)

The table below identifies the signature options for Form 2290 and Schedule 1 (Form 2290) Consent to Disclosure of Tax Information:

Signature Option	Available for Form 2290?	Available for Schedule 1 (Form 2290) Consent to Disclosure?
Self-Select PIN	Yes (on-line filers only)	Yes (on-line filers only)
Practitioner PIN	Yes	No
Scanned Signed Form	Yes	Yes

### **8.2.1 Alternate Signature Requirements for Form 2290 online filers only**

Taxpayers who complete Form 2290 using commercially available software are allowed to:

- sign the return by creating and entering a 5 digit self-select PIN number as the TaxpayerPIN in the Return Header.
- sign Schedule 1 (Form 2290) Consent to Disclosure of Tax Information by creating and entering a 5 digit self-select PIN number as the Consent to VIN Data Disclosure (ConsentToVINDataDisclosure) in the Return Header. This PIN is not required to be the same PIN used for the Form 2290 signature above.

Under this exception, the taxpayer will sign, date and enter the PIN on Form 8453-EX and/or Schedule 1 (Form 2290) Consent to Disclosure. These documents will be retained by the taxpayer and provided to IRS if requested. This method is not available to taxpayers who use the services of an ERO.

If the taxpayer is not submitting Form 8453-EX as a PDF file in the electronic submission, the signature option “Binary Attachment 8453 Signature Document” should NOT be selected. If the taxpayer is not submitting the Schedule 1 (Form 2290) Consent to Disclosure Tax Information as a PDF file in the electronic submission, the signature option “Binary Attachment VIN Disclosure Statement” should NOT be selected.

### **8.3 Electronic Signature Requirement for Extension Forms 4868, 7004 and 8868**

Extension Forms 4868, 7004 and 8868 only require a signature if there is a payment attached. If providing a payment with:

- Form 4868, the Practitioner PIN, Self-Select PIN or Electronic Filing PIN method may be used.
- Form 8868, the Practitioner PIN or scanned 8453 method may be used (See [Section 11.1](#)).
- Form 7004, the Practitioner PIN method or ACHDebitAgreementIndicator must be used to sign the extension application and payment.

### **8.4 Electronic Signature Requirement for Form 990-N**

There is no signature requirement for the electronically filed Form 990-N.

## 8.5 Electronic Signature Requirement for Form 1040

For Form 1040, the MeF electronic signature options are:

- Self-Select PIN
- Practitioner PIN

IRS does not provide a Form 8453 signature option for Form 1040. Questions and Answers on the Form 1040 and 4868 PIN options can be found on IRS.gov:

- [Practitioner PIN Method for Forms 1040 and 4868 MeF](#)
- [Self-Select PIN Method for Forms 1040 and 4868 MeF](#)

## 8.6 Electronic Signature Methods

This section provides information on electronic signature methods:

- Practitioner PIN Option
- Self-Select PIN Option
- Form 8453 Signature Document

Section 8.1 through 8.5 explains which signature options are available for each form that can be filed through MeF.

### 8.6.1 Practitioner PIN Option

Taxpayers who use an ERO to e-file their return may use the Practitioner PIN signature option. If the signature option of “PIN Number” is chosen, the taxpayer and ERO will be required to sign the return with a personal identification number (PIN). The Practitioner PIN may only be used by a taxpayer using an ERO. The Practitioner PIN option consists of two PINs – one for the taxpayer and one for the Practitioner.

- 1) **Taxpayer PIN** --The taxpayer chooses the PIN that they wish to use to sign their return. The Taxpayer's PIN must be 5 numeric characters and cannot contain all zeros.
- 2) **Practitioner PIN** --The ERO selects an eleven position PIN to sign the return. The first 6 positions of the Practitioner PIN will be made up of the EFIN of the ERO and the next 5 positions will be made up of 5 numeric characters that the ERO will select.

The taxpayer must decide whether they want to enter their own PIN or whether they authorize the ERO to enter the PIN they choose as their signature.

This authorization is made on the following Forms 8879 (TY2009 Forms can be found on IRS.gov at <http://www.irs.gov/formspubs/lists/0,,id=97817,00.html>):

- Form 8879 for Form 1040
- Form 8879-C for Form 1120
- Form 8879-I for Form 1120-F
- Form 8879-S for Form 1120S
- Form 8879-EO for Exempt Organization returns
- Form 8879-PE for Form 1065
- Form 8879-B for Form 1065-B
- Form 8879-EX for Forms 720 and 8849

**Do not send Form 8879 to IRS in the electronic submission or by paper.** The taxpayer should give the Form 8879 to the ERO. See Form 8879 instructions for details.

The required PIN information is placed in the Return Header. The following fields are required for the Practitioner PIN or the return will reject:

Corporate Returns & Exempt Organization Returns (except 990-N)	Partnership Returns	Forms 720, 2290 & 8849
Practitioner PIN	Practitioner PIN	Practitioner PIN
PIN Entered by Indicator	PIN Entered by Indicator	
Taxpayer PIN	Taxpayer PIN	
Date Signed	Date Signed	
Name of Officer	Name of Partner	
Title of Officer	Title of Partner	

Form 1040 Not Joint Filing Status Self-Select Practitioner	Form 1040 Joint Filing Status Self-Select Practitioner	Form 1040 Not Joint Filing Status Practitioner	Form 1040 Joint Filing Status Practitioner
Primary Date of Birth	Primary Date of Birth	Primary Signature	Primary Signature
Primary Prior Year AGI/Prior Year PIN/Electronic Filing PIN	Primary Prior Year AGI/Prior Year PIN/Electronic Filing PIN	Taxpayer Signature Date	Taxpayer Signature Date
Primary Signature	Primary Signature	Jurat Disclosure Code	Jurat Disclosure Code
	Spouse Date of Birth	Primary PIN Entered By Indicator	Primary PIN Entered By Indicator
	Spouse Prior Year AGI/Prior Year PIN/Electronic Filing PIN		Spouse Signature
	Spouse Signature		Spouse Signature Date
			Spouse PIN Entered By Indicator

The Practitioner PIN requirements for Form 1040 business rules include exceptions for deceased taxpayers: F1040-670, F1040-671, F1040-697, F1040-698.

The business rules in the table below are associated with the Practitioner PIN.

Rule Number	Rule Text	Error Category	Severity	Forms
F1040-120	If Form 1040 Line 2 checkbox "Married filing jointly" is checked (element 'IndividualReturnFilingStatusCd' has the value 2) and the 'PINTypeCode' in the Return Header has a value, then the following fields in the Return Header must have a value: 'PrimarySignatureDate', 'JuratDisclosureCode', 'PrimaryPINEnteredBy', and 'SpousePINEnteredBy'.	Missing Data	Reject	1040
F1040-121	If Form 1040 Line 2 checkbox "Married filing jointly" is not checked (element 'IndividualReturnFilingStatusCd' does not have the value 2) and the 'PINTypeCode' in the Return Header has a value, then the following fields in the Return Header must have a value: 'PrimarySignatureDate', 'JuratDisclosureCode', 'PrimaryPINEnteredBy'.	Missing Data	Reject	1040
R0000-029	If the Signature Option "PIN Number" is selected (the element "SignatureOption" in the Return Header has a value of "PIN Number") then the following fields must have a value in the Return Header: "PractitionerPIN", "TaxpayerPIN", "Name" of the "Officer", "Title" of the "Officer", "DateSigned" and "PINEnteredBy" Indicator.	Missing Data	Reject	1120, 1120-F, 1120S, 990, 990-EZ, 990-PF, 1120-POL, 8868
R0000-030	In the Return Header, if the Practitioner PIN is provided then the EFIN in the PractitionerPIN must be the same as the EFIN of the Originator.	Data Mismatch	Reject	All MeF Forms except 990-N
R0000-031	Taxpayer PIN in the Return Header cannot equal all zeros.	Incorrect Data	Reject	All MeF Forms except 990-N
R0000-032	Signature Option in the Return Header is a required field and must have either the value "Binary Attachment 8453 Signature Document" or "PIN Number".	Missing Data	Reject	1120, 1120S, 990, 990-EZ, 990-PF, 1120-POL
R0000-068	If the Signature Option "PIN Number" is selected (the element "SignatureOption" in the Return Header has a value of "PIN Number") then the following fields must have a value in the Return Header: "PractitionerPIN", "TaxpayerPIN", "Name" of the "Partner", "Title" of the "Partner",	Missing Data	Reject	1065, 1065-B
R0000-085	If the signature option "PIN Number" is selected (the element "SignatureOption" in the Return Header has a value of "PIN Number") and the PIN entered by option "ERO" is selected (the element "PINEnteredBy" in the Return Header has a value of "ERO"), then the PractitionerPIN field must have a value in the Return Header and this value cannot equal all zeros.	Incorrect Data	Reject	720, 2290, 8849

All MeF business rules can be found on IRS.gov [Modernized e-File Schemas and Business Rules Web page](#).

### **8.6.2 Self-Select PIN option**

The self-select PIN option is available for Forms 1040, 4868 and 2290. The PIN is any five numbers except all zeros the taxpayer chooses to enter as the electronic signature. Guidance for Form 2290 is provided in [Section 8.2 Electronic Signature Requirement for Form 2290](#).

The Data Validation for Forms 1040 and 4868 are:

#### **Primary Taxpayer**

- Social Security Number
- Name Control
- Date of Birth
- Prior Year Adjusted Gross Income and/or Prior Year PIN and/or Prior Year Electronic Filing PIN.

#### **Spouse, When Married Filing Jointly**

- Spouse Social Security Number
- Spouse Name Control
- Spouse Date of Birth
- Prior Year Adjusted Gross Income and/or Prior Year PIN and/or Prior Year Electronic Filing PIN.

Taxpayers filing a joint Form 1040 or 4868 each need a PIN and each may choose any five numbers. As part of the authentication process, each taxpayer enters their date of birth, and either their original prior year adjusted gross income (AGI) or their prior year PIN/Electronic Filing PIN.

If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing the signature authorization form (Form 8879 for 1040 and Form 8878 for Form 4868) containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic format and/or the Form 8879/8878. However, the ERO must receive the taxpayer-signed signature authorization before the return is transmitted or is released for transmission to the IRS.

If both the AGI and prior year PIN are included in the electronic submission, only one of the entries must match the IRS database for the return to pass this validation.

The Electronic Filing PIN is being implemented in January 2010 and can be used by filers who cannot locate their prior year AGI or prior year PIN. Taxpayers can access the Electronic Filing PIN (Help) application on IRS.gov and receive a 5 digit PIN to electronically file their return or extension after providing the following information as shown on their 2008 tax return:.

- Social Security Number (or Individual Taxpayer Identification Number)
- First and Last Name
- Date of Birth
- Filing Status
- complete mailing address

If the information entered does not match IRS records, taxpayers can contact IRS at 1-866-704-7388 to receive their Electronic Filing PIN.

### 8.6.3 Scanned Form 8453 Option

The scanned Form 8453 signature option is available for Forms 720, 2290, 8849, 1120, 1120-F, 1120S, 1065, 1065-B, 990, 990-EZ, 990-PF, and 1120-POL. The scanned Form 8453 must be used if the taxpayer decides not to use, or is prohibited from using, the Practitioner PIN option. If the scanned Form 8453 signature option is used:

- the taxpayer and ERO (if applicable) must sign the paper Form 8453.
- the signed Form 8453 must be scanned into a PDF document and inserted into the electronic return as a binary attachment.
- the signature option “Binary Attachment 8453 Signature Document” must be identified in the Return Header.
- the Description in the binary attachment must be “8453 Signature Document”.

For more information about binary attachments, refer to [Section 2.2](#). The following business rule is associated with the Scanned Form 8453 option.

Rule Number	Rule Text	Error Category	Severity	Tax Type
R0000-032	Signature Option in the Return Header is a required field and must have either the value "Binary Attachment 8453 Signature Document" or "PIN Number".	Missing Data	Reject	720, 2290, 8849, 1120, 1120-F, 1120S, 990, 990-EZ, 990-PF, 1120-POL, 1065, 1065-B

Business rules for the MeF forms will be posted to the IRS.gov Web pages found in the Current Valid Schema Page for each form type. You can access these business rules by selecting the appropriate form type on IRS.gov at: <http://www.irs.gov/efile/article/0,,id=171950,00.html>

PDF files of the Forms 8453, which will be used for each of the programs shown below, can be accessed from the irs.gov Web site at <http://www.irs.gov/formspubs/lists/0,,id=97817,00.html>.

- Form 8453-C for Form 1120
- Form 8453-S for Form 1120-C
- Form 8453-EO for Exempt Organization returns
- Form 8453-PE for Form 1065
- Form 8453-B for Form 1065-B
- Form 8453-I for Form 1120-F
- Form 8453-EX for Forms 720/2290/8849

## **8.7 Elections That Require Separate Signatures**

IRS Counsel reviewed Treasury Regulations to identify elections that require a signature to determine if the requirements can be changed. IRS published the results to this review on [www.irs.gov](http://www.irs.gov) on the e-file for Large and Mid-Size Businesses Web page. Elections that require a separate signature may be submitted in PDF format.

## **8.8 Forms Attached to 1120/1120S with Separate Signatures**

Many forms that may be attached to Form 1120 and 1120S have separate signature lines. During the development of MeF, IRS identified the forms with separate signature lines and requested IRS Counsel issue special instructions to facilitate electronic filing. Regulation T.D. 9300 contains amendments to the Income Tax Regulations (26 CFR Part 1) and Procedure and Administration Regulations (26 CFR part 301) and eliminates some regulatory requirements considered to have been impediments to the electronic submission of tax returns and other forms filed by corporations, partnerships and other businesses with regard to third party signature requirements. These regulations impeded electronic filing by 1) requiring taxpayers to include third party signatures on their tax returns; 2) requiring taxpayers to attach documents or statements generated by third parties; or 3) requiring a taxpayer to sign an IRS form and file it as an attachment to their income tax return. T.D. 9300 eliminates the impediments for taxable years beginning after December 31, 2002. The regulations generally affect taxpayers who are required to file any of the following forms: 926, 973, 982, 1120, 1120S, 1122, 5471, 5712-A, 8832. See T.D. 9300 for a complete list. In addition, effective May 30, 2006, T.D. 9264 also eliminated signature impediments by stating that by signing the return, a taxpayer is attesting to the validity of the Form 1120 as well as all of the attachments.

## **9 Electronic Signature Specifications**

### **9.1 Jurat/Disclosure Guidelines**

1. This section provides guidelines for the jurat/disclosure language to be included in software packages for electronically filed returns and extensions.
2. In all instances, the appropriate jurat/disclosure text must be provided to the officer of the corporation or exempt organization prior to the presentation of fields used to enter signature(s) (PIN).
3. A filer requesting a copy of an Exempt Organization return be sent to a state charity regulating agency(s) must have a separate screen or screens for the disclosure consent allowing disclosure to the state agency and a separate screen or screens for the signature jurat and disclosure consents permitting disclosure to the ERO.
4. It is imperative that all taxpayers who use the Electronic Funds Withdrawal feature are provided with the appropriate Electronic Funds Withdrawal (EFW) text for their review. Only the approved EFW text displayed in this publication is to be used.
5. Software products intended for use by tax professionals may also provide functionality to print a graphic equivalent of the jurat/disclosure statements for the officer of the corporation or exempt organization to sign as an alternative to viewing and signing the statement on the input screen. A graphic equivalent may be appropriate when the officer of the corporation will not be present to review the completed return in the presence of the ERO, and has elected to authorize the ERO to enter the officer's PIN that they selected.

### **9.2 Jurat Language Text Selections**

This section identifies the Perjury, Consent to Disclosure and Electronic Funds Withdrawal text selections (components) used to develop jurat language statements for electronic filing tax preparation software where the Practitioner PIN method is selected. The software must provide the capability to incorporate these into the appropriate text for presentation to a taxpayer for their review.

### 9.2.1 Form 1040 Jurat

The Jurat Disclosure Code options in the Form 1040 Return Header are:

- Online Self Select PIN
- Self Select PIN by ERO
- Practitioner PIN

The perjury statement and consent to disclosure are required on all Form 1040 electronic returns.

#### **The Perjury Statement**

Under penalties of perjury, I declare that I have examined this return including any accompanying statements and schedules and, to the best of my knowledge and belief, it is true, correct, and complete.

#### **Consent to Disclosure**

I consent to allow my Intermediate Service Provider, transmitter, or Electronic Return Originator (ERO) to send my return to IRS and to receive the following information from IRS: a) an acknowledgement of receipt or reason for rejection of transmission; b) an indication of any refund offset; c) the reason for any delay in processing or refund; and, d) the date of any refund.

The following consent should only be presented when the taxpayer has selected the Electronic Funds Withdrawal option:

#### **Electronic Funds Withdrawal Consent**

If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an ACH electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of my Federal taxes owed on this return and/or a payment of estimated tax, and the financial institution to debit the entry to this account. I further understand that this authorization may apply to future Federal tax payments that I direct to be debited through the Electronic Federal Tax Payment System (EFTPS). In order for me to initiate future payments, I request that the IRS send me a personal identification number (PIN) to access EFTPS. This authorization is to remain in full force and effect until I notify the U.S. Treasury Financial Agent to terminate the authorization. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

**Taxpayer Signature when Self-Select PIN (Online Self-Select PIN or Self-Select by ERO) will be used to sign the return:**

I am signing this Tax Return/Form and Electronic Funds Withdrawal Consent, if applicable, by entering my PIN below.

-----  
Taxpayer's PIN: \_\_\_\_\_ Date : \_\_\_\_\_  
Taxpayer's Date of Birth: \_\_\_\_\_  
Taxpayer's Prior Year Adjusted Gross Income : \_\_\_\_\_ \*  
Taxpayer's Prior Year PIN/Electronic Filing PIN: \_\_\_\_\_ \*  
Spouse's PIN: \_\_\_\_\_  
Spouse's Date of Birth: \_\_\_\_\_  
Spouse's Prior Year Adjusted Gross Income : \_\_\_\_\_ \*  
Spouse's Prior Year PIN/Electronic Filing PIN: \_\_\_\_\_ \*

**\*NOTE: Taxpayers may use either the Prior Year AGI or Prior Year PIN/Electronic Filing PIN for authentication. If both are included in the record only one has to match IRS records.**

**Taxpayer Signature when Practitioner PIN method will be used to sign the return.**

I am signing this Tax Return and Electronic Funds Withdrawal Consent, if applicable, by entering my PIN below.

-----  
Taxpayer's PIN: \_\_\_\_\_ Date \_\_\_\_\_  
Spouse's PIN: \_\_\_\_\_ Date \_\_\_\_\_

Use the ERO Declaration and Signature for Self-Select and Practitioner PIN when the return is transmitted by an Electronic Return Originator (ERO).

**ERO Declaration and Signature**

I declare that the information contained in this electronic tax return (or request for refund) is the information furnished to me by the taxpayer. If the taxpayer furnished me a completed tax return, I declare that the information contained in this electronic tax return is identical to that contained in the return provided by the taxpayer. If the furnished return was signed by a paid preparer, I declare I have entered the paid preparer's identifying information in the appropriate portion of this electronic return. If I am the paid preparer, under the penalties of perjury I declare that I have examined this electronic return, and to the best of my knowledge and belief, it is true, correct, and complete. This declaration is based on all information of which I have any knowledge.

**ERO Signature**

**I am signing this Tax Return (or request for refund) by entering my PIN below.**

**ERO's PIN** \_\_\_\_\_  
*(enter EFIN plus 5 Self-Selected numeric)*

### 9.2.2 Form 4868 Jurat

The consent to disclosure is required on all Form 4868 electronic submissions.

#### Consent to Disclosure

I consent to allow my Intermediate Service Provider, transmitter, or Electronic Return Originator (ERO) to send this form to IRS and to receive the following information from IRS:

(a) Acknowledgment of receipt or reason for rejection of transmission, and (b) if delayed, reason for any delay in processing the form.

:

**The following Electronic Funds Withdrawal Consent and taxpayer signature should only be presented when the taxpayer has selected the Electronic Funds Withdrawal option and the Self-Select PIN option is used.**

#### Electronic Funds Withdrawal Consent

I authorize the U.S. Treasury and its designated Financial Agent to initiate an ACH electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of my Federal taxes owed, and the financial institution to debit the entry to this account. This authorization is to remain in full force and effect until I notify the U.S. Treasury Financial Agent to terminate the authorization. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

#### Taxpayer Signature for Self-Select PIN

**I am signing this Tax Return/Form and Electronic Funds Withdrawal Consent by entering my Self Select PIN below.**

-----  
Taxpayer's PIN: \_\_\_\_\_ Date: \_\_\_\_\_  
Taxpayer's Date of Birth: \_\_\_\_\_  
Taxpayer's Prior Year Adjusted Gross Income \_\_\_\_\_ \*  
Taxpayer's Prior Year PIN/Electronic Filing PIN \_\_\_\_\_ \*  
Spouse's PIN: \_\_\_\_\_  
Spouse's Date of Birth: \_\_\_\_\_  
Spouse's Prior Year Adjusted Gross Income: \_\_\_\_\_ \*  
Spouse's Prior Year PIN/Electronic Filing PIN \_\_\_\_\_ \*

**\*NOTE: Taxpayers may use either the prior year AGI or PIN for authentication. If both are included in the record only one has to match IRS records.**

The following taxpayer signature for EFW is required when Practitioner PIN signature method is used.

**Electronic Funds Withdrawal Consent**

I am signing this Electronic Funds Withdrawal Consent by entering my PIN below.

-----  
Taxpayer's PIN: \_ \_ \_ \_ \_ Date: \_ \_ \_ \_ \_

Spouse's PIN: \_ \_ \_ \_ \_ Date: \_ \_ \_ \_ \_

There is no signature requirement for the Form 4868 itself. A taxpayer signature is only required to authorize the withdrawal.

### 9.2.3 Form 1120, 1120-F and 1120S Jurat

The Form 1120, 1120-F, or Form 1120S electronic return signed by the Practitioner PIN method must contain the following text.

#### **Perjury Statement**

Under penalties of perjury, I declare that I am an officer of the above corporation and that I have examined a copy of the corporation's 2010 electronic income tax return and accompanying schedules and statements and to the best of my knowledge and belief, it is true, correct, and complete.

#### **Consent to Disclosure**

I consent to allow my electronic return originator (ERO), transmitter, or intermediate service provider to send the corporation's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) an indication of any refund offset, (c) the reason for any delay in processing the return or refund, and (d) the date of any refund.

**The following Electronic Funds Withdrawal Consent should only be presented when the taxpayer has selected the Electronic Funds Withdrawal option.**

#### **Electronic Funds Withdrawal Consent**

I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the corporation's Federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institution involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

#### **Officer's Signature**

I am signing this Tax Return and Electronic Funds Withdrawal Consent, if applicable, by entering my self selected PIN below.

-----  
Officer's PIN \_ \_ \_ \_ \_

Date: \_ \_ \_ \_ \_

#### **ERO Declaration**

I declare that the information contained in this electronic tax return is the information furnished to me by the corporation. If the corporation furnished me a completed tax return, I declare that the information contained in this electronic tax return is identical to that contained in the return provided by the corporation. If the furnished return was signed by a paid preparer, I declare I have entered the paid preparer's identifying information in the appropriate portion of this electronic return. If I am the paid preparer, under the penalties of perjury, I declare that I have examined this electronic return, and to the best of my knowledge and belief, it is true, correct, and complete. This declaration is based on all information of which I have any knowledge.

#### **ERO Signature**

**I am signing this tax return by entering my PIN below**

**ERO's PIN** \_ \_ \_ \_ \_ (Enter EFIN plus 5 self-selected numerics)

## 9.2.4 Form 7004 Jurat

No signature is required on the Form 7004 unless the taxpayer has selected the Electronic Funds Withdrawal option. If selected, the Form 7004 electronic extension signed by the Practitioner PIN method must contain the following text.

### Perjury Statement

Under penalties of perjury, I declare that I have been authorized by the above taxpayer to make this authorization and that I have examined a copy of the taxpayer's electronic extension (Form 7004) for the tax period indicated above and to the best of my knowledge and belief, it is true, correct, and complete.

### Consent to Disclosure

I consent to allow my electronic return originator (ERO), transmitter, or intermediate service provider to send the corporation's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) an indication of any refund offset, (c) the reason for any delay in processing the return or refund, and (d) the date of any refund.

### Electronic Funds Withdrawal Consent

I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the taxpayer's balance due on Form 7004, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institution involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

### Officer's Signature

I certify that I have the authority to execute this consent on behalf of the organization. I am signing this Disclosure Consent by entering my self-selected PIN below.

-----  
Officer's PIN \_ \_ \_ \_ \_

Date: \_ \_ \_ \_ \_

### ERO Declaration

**ERO's EFIN/PIN.** Enter your six-digit EFIN followed by your five-digit self-selected PIN.

-----  
do not enter all zeros

I certify that the above numeric entry is my PIN, which is my signature to authorize submission of the electronic application for extension and electronic funds withdrawal for the corporation indicated above. I confirm that I am submitting application for extension in accordance with the requirements of the Practitioner PIN method and Publications 4163, Modernized e-File Information for Authorized IRS e-file Providers, and 3112, IRS e-file Application and Participation.

### 9.2.5 Forms 1065 and 1065-B Jurat

The Form 1065 electronic return signed by the Practitioner PIN method must contain the following text.

#### **Perjury Statement**

Under penalties of perjury, I declare that I am a general partner or limited liability company member manager of the above partnership and that I have examined a copy of the partnership's 2009 electronic return of partnership income and accompanying schedules and statements and to the best of my knowledge and belief, it is true, correct, and complete.

#### **Consent to Disclosure**

I consent to allow my electronic return originator (ERO), transmitter or intermediate service provider to send the partnership's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, and (b) the reason for any delay in processing the return.

#### **Signature of General Partner or Limited Liability Company Member Manager**

I certify that I have the authority to execute this consent on behalf of the partnership as general partner or limited liability company member manager of the partnership. I am signing this Disclosure Consent by entering my self-selected PIN below.

-----  
General Partner or Limited Liability Company Member Manager's PIN \_ \_ \_ \_ \_  
Date: \_ \_ \_ \_ \_

#### **ERO Declaration**

I declare that the information contained in this electronic return is the information furnished to me by the partnership. If the partnership furnished me a completed return, I declare that the information contained in this electronic return is identical to that contained in the return provided by the partnership. If the furnished return was signed by a paid preparer, I declare I have entered the paid preparer's identifying information in the appropriate portion of this electronic return. If I am the paid preparer, under the penalties of perjury, I declare that I have examined this electronic return, and to the best of my knowledge and belief, it is true, correct, and complete. This declaration is based on all information of which I have any knowledge.

#### **ERO Signature**

**I am signing this tax return by entering my PIN below:**

**ERO's PIN** \_ \_ \_ \_ \_  
(Enter EFIN plus 5 self-selected numerics)

**The Form 1065-B electronic return signed by the Practitioner PIN method must contain the following text.**

The Perjury Statement, Officer's Signature and ERO Declaration for the Form 1065-B is the same as the Form 1065 above. The Consent to Disclosure and Electronic Funds Withdrawal Consent for the Form 1065-B are shown below:

**Consent to Disclosure**

I consent to allow my electronic return originator (ERO), transmitter, or intermediate service provider to send the partnership's return to the IRS and to receive from the IRS **(a)** an acknowledgement of receipt or reason for rejection of the transmission, **(b)** an indication of any refund offset, **(c)** the reason for any delay in processing the return or refund, and **(d)** the date of any refund.

**The following Electronic Funds Withdrawal Consent should only be presented when the taxpayer has selected the Electronic Funds Withdrawal option.**

**Electronic Funds Withdrawal Consent**

If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the partnership's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at **1-888-353-4537** no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

### 9.2.6 Forms 990, 990-EZ, 990-PF, 1120-POL and 8868 Jurat

No signature is required on the Form 8868 unless the taxpayer has selected the Electronic Funds Withdrawal option. If selected, the Form 8868 electronic extension signed by the Practitioner PIN method must contain the text shown below. The Form 990, Form 990-EZ, 990-PF or Form 1120-POL electronic return signed by the Practitioner PIN method must contain the following text:

#### **Perjury Statement**

Under penalties of perjury, I declare that I am an officer of the above exempt organization and that I have examined a copy of the exempt organization's 2009 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, it is true, correct, and complete.

#### **Consent to Disclosure**

I consent to allow my electronic return originator (ERO), transmitter, or intermediate service provider to send the exempt organization's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) an indication of any refund offset, (c) the reason for any delay in processing the return or refund, and (d) the date of any refund.

**The following Electronic Funds Withdrawal Consent should only be presented when the Form 1120-POL or Form 8868 filer has selected the Electronic Funds Withdrawal option:**

#### **Electronic Funds Withdrawal Consent**

I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the exempt organization's Federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institution involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

#### **Officer's Signature**

I am signing this Tax Return and Electronic Funds Withdrawal Consent, if applicable, by entering my self-selected PIN below.

-----  
Officer's PIN \_ \_ \_ \_ \_

Date: \_ \_ \_ \_ \_

**ERO Declaration**

I declare that the information contained in this electronic return is the information furnished to me by the corporation. If the exempt organization furnished me a completed return, I declare that the information contained in this electronic return is identical to that contained in the return provided by the exempt organization. If the furnished return was signed by a paid preparer, I declare I have entered the paid preparer's identifying information in the appropriate portion of this electronic return. If I am the paid preparer, under the penalties of perjury, I declare that I have examined this electronic return, and to the best of my knowledge and belief, it is true, correct, and complete. This declaration is based on all information of which I have any knowledge.

**ERO Signature**

**ERO's PIN** \_ \_ \_ \_ \_  
(Enter EFIN plus 5 self-selected numerics)

### 9.2.7 Forms 720, 2290 and Form 8849 Jurat

The Form 720, Form 2290, or Form 8849 electronic return signed by the Practitioner PIN method must contain the following text.

**The beginning and ending dates of the period must be included in the Perjury Statement.**

#### **Perjury Statement**

Under penalties of perjury, I declare that I have examined a copy of my electronic return and accompanying schedules and statements for the period beginning \_\_\_\_\_ and ending \_\_\_\_\_ and to the best of my knowledge and belief, they are true, correct, and complete.

#### **Consent to Disclosure**

I consent to allow my electronic return originator (ERO), transmitter, or intermediate service provider to send my return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) an indication of any refund offset, (c) the reason for any delay in processing the return or refund, and (d) the date of any refund.

**The following Electronic Funds Withdrawal Consent should only be presented when the taxpayer has selected the Electronic Funds Withdrawal option.**

#### **Electronic Funds Withdrawal Consent**

I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days before the payment (settlement) date. I also authorize the financial institution involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment.

#### **Taxpayer's Signature**

I am signing this Tax Return and Electronic Funds Withdrawal Consent, if applicable, by entering my self selected PIN below.

-----  
Officer's PIN \_ \_ \_ \_ \_

Date: \_ \_ \_ \_ \_

**ERO Declaration**

I declare that the information contained in this electronic return is the information furnished to me by the taxpayer. If the taxpayer furnished me a completed return, I declare that the information contained in this electronic return is identical to that contained in the return provided by the taxpayer. If the furnished return was signed by a paid preparer, I declare I have entered the paid preparer's identifying information in the appropriate portion of this electronic return. If I am the paid preparer, under the penalties of perjury, I declare that I have examined this electronic return, and to the best of my knowledge and belief, it is true, correct, and complete. This declaration is based on all information of which I have any knowledge.

**ERO Signature**

**I am signing this tax return by entering my PIN below:**

**ERO's PIN** \_\_\_\_\_

(Enter EFIN plus 5 self-selected numerics)

**The following additional Consent to Disclosure and Signature must also be presented when the Schedule 1 (Form 2290) is signed using the Practitioner PIN method:**

**Consent to Disclosure**

By entering my PIN, I hereby consent to the Internal Revenue Service (IRS) disclosing information about my payment of the Heavy Highway Vehicle Use Tax (HVUT) for the tax period beginning July 1, 2009, and ending June 30, 2010, to the federal Department of Transportation (DOT), U.S. Customs and Border Protection (CBP), and to state Departments of Motor Vehicles (DMV). The information disclosed to the DOT, CBP, and the state DMVs will be my Vehicle Identification Number (VIN) and verification that I have paid the HVUT. The IRS may disclose the information to the DOT, CBP, and to the DMVs of the 50 states and the District of Columbia who have other taxing, registration, or information collecting authority.

I understand that the information to be disclosed is generally confidential under the laws applicable to the IRS and that the agency receiving the HVUT information is not bound by these laws and may use the information for any purposes as permitted by other federal laws and/or state law. To be effective, this consent must be submitted to the IRS within 60 days of the date this return is signed.

If signed by a corporate officer or party other than the taxpayer, I certify that I have the authority to execute this consent to disclosure of tax information.

**Taxpayer's Signature**

I am signing this Consent to Disclosure of Tax Information by entering my self selected PIN below.

-----  
Taxpayer's PIN \_\_\_\_\_ Date: \_\_\_\_\_  
Employer Identification Number \_\_\_\_\_

## **10 Form 7004, Automatic Extension of Time to File Certain Business Income Tax, Information and Other Returns**

- Only one extension form will need to be e-filed on or before the due date of the appropriate return type.
- A separate Form 7004 will need to be e-filed for each return.
- Form 7004 may be filed electronically except for specifically identified returns (see 7004 Instructions).
- Although binary files, other than Form 8453, can be attached to Form 7004, the binary file documents will not be processed. Do not attach any document that needs IRS attention or approval.
  - Power of Attorney (POA) documents should be submitted separately.
  - Form 1138 for Net Operating Loss Carryback should be submitted separately to IRS. Do not attach Form 1138 to the Form 7004.

See Form 7004 Instructions for information regarding filing for an extension.

### **10.1 Types of Returns and Conditions for Which Form 7004 May Be Used to Request Extension of Time to File**

The revised Form 7004 (December 2008) must be used for any return with a tax year that ends on or after December 31, 2008. The automatic extension for certain business returns has changed from 6 months to 5 months:

Automatic 6 month extension	Automatic 5 month extension
1041-N, 1041-QFT 1042 1065-B 1066 1120, 1120-C, 1120-F, 1120-FSC, 1120-H, 1120-L, 1120-ND, 1120-PC, 1120-POL, 1120-REIT, 1120-RIC, 1120S, 1120-SF 3520-A 706-GST	1041 1065 8804

## 10.2 Data Entry for Form 7004

Enter the extension date based upon the tax period and the type of return for which an extension is being requested. The extension date is the 15<sup>th</sup> day of the 5<sup>th</sup> month or 6<sup>th</sup> month following the applicable due date. Note: the due dates vary depending not only on the type of return but also on different conditions, as listed in the charts. The due date charts are found on IRS.gov at: <http://www.irs.gov/efile/article/0,,id=171946,00.html>.

For calendar year and fiscal year filers, the tax period end date month must match the month that was approved by IRS as the tax period for this EIN.

If the change in accounting period is checked, you must have applied for approval to change your tax year prior to filing the application. Short tax year applications must check at least one of four reasons for short tax year. Refer to Publication 538, Accounting Periods and Methods, for details.

For a consolidated return (consolidated group), enter the name, address and EIN of each member of the group. If the member does not have an EIN, you may enter one of the following: "PENDING", "APPLIED FOR" or "NONE".

All monetary amounts are positive amounts. Tentative Tax, Total Payments and Refundable Credits, and Balance Due amounts are required. If Electronic Funds Withdrawal payment is attached, the payment amount must be for the entire balance due. Partial payments are not accepted.

## 10.3 Timely Filing of Form 7004

An extension will be rejected if it is not received by the IRS due date of the applicable return.

Note: For purposes of determining timeliness of the extension, the received date is the electronic postmark, if present, or the IRS received date in the GTX Key. To avoid rejecting extensions from filers or transmitters in a different time zone from the IRS system, the time zone differences are taken into consideration. Five days are allotted to fix and resubmit rejected extensions.

An accepted acknowledgement of the electronic Form 7004 serves as IRS approval of the extension.

## **11 Exempt Organization Section**

### **11.1 Form 8868, Application for Extension of Time to File an Exempt Organization Return**

MeF will accept electronic filings of Form 8868 (Part I – Automatic Extension) for the following returns: Form 990, 990-EZ, 990-PF, 990-T (corporation), 990-T (sec. 401(a) or 408(a) trust), 990-T (trust other than above), 1041-A, 4720, and 5227. No signature is required as part of this filing. However, a payment record may be attached to this form, as appropriate, and if so, a signature is required for the Electronic Funds Withdrawal (EFW) authorization. A Practitioner PIN (using Form 8879-EO) or Form 8453-EO may be used for this authorization. Form 8453-EO is the only attachment/binary file that will be accepted.

An extension will be rejected if it is not received by the IRS due date of the applicable return. For purposes of determining timeliness of the extension, the received date is the electronic postmark, if present, or the IRS received date in the GTX Key. To avoid rejecting extensions from filers or transmitters in a different time zone from the IRS' system, the time zone differences are taken into consideration.

An accepted acknowledgement of the electronic Form 8868 serves as IRS approval of the extension.

### **11.2 Reasonable Cause for Late Filing of Form 990, 990-EZ, 990-PF or 1120-POL**

On occasion, an organization may have a reasonable cause for late filing of an Exempt Organization return. In order to expedite the process and avoid assertion of Failure to File Delinquency penalties, a filer may attach a reasonable cause explanation using the “ReasonableCauseExplanation.xsd” schema. Acceptance of the return through MeF does NOT mean that the explanation was accepted and the penalty will not be assessed. If the explanation is not accepted, the taxpayer will be contacted as appropriate using existing IRS procedures.

## 12 Excise Tax Section

When Schedule 1 (Form 2290) is electronically filed, the IRS will provide stamped copies of the form to the transmitter or software provider. The electronic Schedule 1 (Form 2290) will contain a watermark and can be printed for use as proof of payment:

<b>SCHEDULE 1</b> <b>(Form 2290)</b> <small>(Rev. July 2007)</small> <small>Department of the Treasury</small> <small>Internal Revenue Service</small>		<b>Schedule of Heavy Highway Vehicles</b> For the period July 1, 2007, through June 30, 2008 This copy will be stamped and returned to you for use as proof of payment when registering vehicle(s) with a state.		OMB No. 1545-0143	
Type or Print	Name as shown on Form 2290 <b>String String</b>			Employer identification number <b>69 : 0000001</b>

<b>Part III</b> Summary of Reported Vehicles					
a Enter the number of taxable vehicles from Form 2290, page 2, column 3, <b>Totals</b> . . . . .					a 1
b Enter the total number of taxable vehicles on which the tax is suspended from Form 2290, page 2, column 3 (category W) . . . . .					b 2
For Privacy Act and Paperwork Reduction Act Notice, see page 8 of the instructions.					
Schedule 1 (Form 2290) (Rev. 7-2007)					

Form 2290 schemas include:

- An element for Consent to VIN Data Disclosure to indicate whether the taxpayer consents to disclosure of tax information
- EIN, Name and Date of the disclosure form when the taxpayer chooses to disclose
- A choice of PIN or binary attachment that will serve as the signature for the disclosure consent when the taxpayer chooses to disclose.

## **13 Individual Return/Extension Section**

In Processing Year 2010, MeF will be accepting calendar year Form 1040 and 4868. Fiscal year returns/extensions for 1040/4868 may not be filed through MeF.

### **13.1 Foreign Employer Compensation (FEC) Record**

The FECRecord.xsd file supports entries on Form 1040, Line 7 for Foreign Employer Compensation (FEC) received from non-U.S. employers who do not have EINs or issue Form W-2s. The FEC Record:

- must be attached when the “FEC” literal is included in the Wages Not Shown Schedule.
- is limited to a maximum of 10 per return.
- requires the U.S. address or foreign address where the wage-recipient resided when the services for the foreign employer were performed.

If the services for the foreign employer were performed in the U.S., enter “US” in CountryCd; otherwise, enter the appropriate foreign country code found in the efiletypes.xsd file.

### **13.2 New field “Purpose” in Form 1040/4868 Attachments**

A Purpose tag has been included in some Form 1040 attachments to explain when the statement, schedule, etc. should be attached to the return and the information that IRS is requesting.

### **13.3 Conditions Which May Affect Refund**

The following conditions may delay the refund and/or change the refund amount:

- The taxpayer owns back taxes, either individual or business (refund offset)
- The taxpayer owes delinquent child support (refund offset)
- The taxpayer has certain delinquent federal debit, such as student loans, etc (refund offset)
- The estimated tax payments reported on the return do not match the estimated tax payments recorded on the IRS Master File. This generally occurs when:
  - The spouse made separate estimated tax payments and filed a joint return, or vice versa
  - The return was filed before the last estimated tax payment was credited to the account
  - The taxpayer has a Schedule E claiming a deduction for a questionable tax shelter
  - The taxpayer is claiming a blatantly unallowable deduction
  - The taxpayer is considered to be a first-time filer. A first-time filer is defined as a taxpayer

who has not filed a tax return as a primary or secondary taxpayer during the previous ten years.

## **13.4 Form 4868**

An extension will be rejected if it is not received by the IRS due date of the applicable return.

For purposes of determining timeliness of the extension, the received date is the electronic postmark, if present, or the IRS received date in the GTX Key. To avoid rejecting extensions from filers or transmitters in a different time zone from the IRS system, the time zone differences are taken into consideration. Five days are allotted to fix and resubmit rejected extensions.

An accepted acknowledgement of the electronic Form 7004 serves as IRS approval of the extension.

## **13.5 Filer Name Format**

The Form 1040 and 4868 Return Header Filer name has e-filetype NameLine1Type, which can have no leading or consecutive embedded spaces. The following is guidance for populating the Filer name information:

1. The only characters allowed are alpha, ampersand (&), hyphen (-), less-than sign (<), and space. The left-most position must be an alpha character. The less-than sign replaces the intervening space to identify the primary taxpayer's last name. It cannot be preceded by or followed by a space.
2. All apostrophes (') and any other punctuation characters, except the hyphen (-), must be omitted from names and the alphabetic characters shifted to the left in their place. For example: O'Shea = OSHEA.
3. Numeric characters in name components must be replaced by alphabetic Roman Numerals. For example: Charles 3rd = CHARLES III.
4. When a suffix such as "JR" or "III" is part of the name, enter a less-than sign (<) between the suffix and the last name. Do not enter a space before or after any less-than sign; the less-than sign takes the place of a space. Titles such as "M.D." or "Ph. D.", which are not part of a given name, may be omitted.
5. NameLine1Type CANNOT CONTAIN MORE THAN 35 CHARACTERS. If the information exceeds 35 characters, truncate using the following priority:
  - a. Substitute the initial for the second given name.

- b. Omit the second initial of the secondary taxpayer, if necessary.
- c. Omit the second initial of the primary taxpayer, if necessary.
- d. Substitute initials for the secondary taxpayer's given name.
- e. Substitute initials for the primary taxpayer's given name.

6. Enter taxpayer names as follows:

- a. For one taxpayer: Enter first name, a space, middle name or middle initial, a less-than sign (<), last name. (The last name of the individual must be contained within this name line field.) If there is a suffix, enter a less-than sign (<) between the last name and the suffix.
- b. For two taxpayers with same last name: Joint returns must contain one ampersand (&) between taxpayers' first names. The taxpayer whose first name is associated with the Primary SSN used on the return must be entered first, and the last name of that taxpayer must be identified by a preceding less-than sign (<).
- c. For two taxpayers with different last names: If the spouse uses a different last name, enter the primary taxpayer's first and last names as above for one taxpayer's name, but after the last name, add another less-than sign (<) followed by an ampersand and the full name of the spouse. A maximum of two less-than signs are permitted. Any suffixes should follow the primary taxpayer's last name only.

Examples:\*

Enter as:

John C. (Brown), III	JOHN C<BROWN<III
John M. (Brown), M.D.	JOHN M<BROWN
Henry A. (Carter)	HENRY A<CARTER
Frank N. (De Porta)	FRANK N<DE PORTA
Timothy (Jackson), 2nd	TIMOTHY<JACKSON<II
Carl A. (Jones) & Angie Myer	CARL A<JONES<& ANGIE MYER
Charles (Jones) & Diane D. Jones, M.D.	CHARLES & DIANE D<JONES
Florence E. (Jones) MD	FLORENCE E<JONES
Alfred (Newman), Minor	ALFRED<NEWMAN<MINOR
James R. (O'Donnell)	JAMES R<ODONNELL
James (Oliver-Keogh), 3rd	JAMES<OLIVER-KEOGH<III
Lillie B. (Owen-Smith)	LILLIE B<OWEN-SMITH
J. B. (Smith) Jr. & Ann Trent	J B<SMITH<JR & ANN TRENT
John A. (Smith), III & Ann Smith, M.D.	JOHN A & ANN<SMITH<III
John A. and Jane B. (Smith)	JOHN A & JANE B<SMITH

\*Parentheses indicate the last name of the taxpayer with the Primary SSN.

- d. For other than Joint Return and deceased taxpayer: Enter the literal "DECD" after the surname of the deceased taxpayer. For example:

John A<Doe<DECD

John A<Doe<JR DECD.

- e. For a Joint Return with the same last name and Primary taxpayer is deceased: Enter the literal “DECD” after the first name and/or initial of the deceased taxpayer. For example:

John A DECD & Jane B<Doe

John A DECD & Jane B<Doe<JR

- f. For a Joint Return with the same last name and Secondary taxpayer is deceased: Enter the literal “DECD” after the first name and/or initial of the deceased taxpayer. For example:

John A & Jane B DECD<Doe

John A & Jane B DECD<Doe<SR

- g. For a Joint Return with different last names and either the Primary OR the Secondary taxpayer is deceased: Enter the Literal “DECD” after the surname of the deceased taxpayer. For example:

John A<Doe<DECD & Jane B Smith

John A<Doe<III DECD & Jane B Smith

John A<Doe<& Jane B Smith DECD

John A<Doe<JR & Jane B Smith DECD)

- h. For a Joint Return with the same last name and both taxpayers are deceased: Enter the literal “DECD” after the first name and/or initial of the deceased taxpayer. For example:

John A DECD & Jane B DECD<Doe

John A DECD & Jane B DECD<Doe<JR

- i. For a Joint Return with different last name and both taxpayers are deceased: Enter the literal “DECD” after the surname of the deceased taxpayer. For Example:

John A<Doe<DECD & Jane B Smith DECD

John A<Doe<SR DECD & J B Smith DECD

## 13.6 Form 1040 Address Format

- 1 The Street Address (SEQ 0080) of Form 1040 contains the house number and street, route number, post office box, or box number. Enter college, building, or post office branch as the address if no other mailing address is given.
- 2 Do not use the "#" symbol, "No.", or "Number" as a prefix to an apartment, house, P.O. Box, or route.
- 3 Always add "ST", "ND", "RD", "TH" to a numbered street or avenue. For example:

1 = 1ST; 2 = 2ND; 3 = 3RD, etc.

- 4 Enter one-half as 1/2 (no spaces).
- 5 Plurals for apartment, avenue, road, street, etc., are entered as APTS, AVES, RDS, STS, etc.
- 6 Replace a period with a space.
- 7 For military overseas addresses, enter the letters "APO" or "FPO" or "DPO" in the first three left-most positions of the City field.
- 8 Words may be abbreviated unless the word is a proper name. For example:

Examples:

Enter as:

3 Ave.	3RD AVE
Circle Drive	CIRCLE DR
Lane Building	LANE BLDG
Northeast Street	NORTHEAST ST
South Court Street	S COURT ST
Third Street	THIRD ST

## 13.7 Volume Management Strategy

Beginning February 17, 2010, Modernized e-File (MeF) will accept Form 1040 (federal and state returns), Form 4868 extensions and 21 of the most common 1040-related forms/schedules for a total of 23 forms. 1040 returns with an attachment not included in the 23 forms and schedules population must be filed through the Electronic Management System (EMS).

For processing year 2009 (tax year 2008), approximately 72 million 1040 returns that fall within the potential 23 form MeF population were filed through EMS. This represents more than an order of magnitude increase over the number of submissions processed for tax year 2008 by MeF (4 million submissions). The IRS is building out the computing infrastructure to accommodate the increased demand and conducting performance tests to validate the new, expanded system. However, the IRS feels it is prudent to manage the volume increases in year 2010 so that the IRS and transmitters have an opportunity to observe system behavior and response times under controlled loads prior to opening the system to full load in processing year 2011.

Therefore, for processing year 2010 (1040 MeF phase I) the IRS is limiting the number of 1040

returns filed through MeF. The IRS will control volumes by implementing and enforcing a Volume Management Plan (Exhibit 10)

The Volume Management Plan involves individual federal and state submissions only. Business returns filed through MeF (corporations, partnerships, excise tax returns and exempt organizations) are not included in the Volume Management Plan.

# Exhibits

## **Exhibit 1 - Business Name Control**

To aid in validating the Employer Identification Number (EIN), the “Name Control” must be provided. The Name Control consists of up to four alpha and/or numeric characters.

The Name Control should be determined from the information specified on the first name line. Generally, the Name Control is derived from the first four characters of the corporation. The ampersand (&) and hyphen (-) are the only special characters allowed in the Name Control. The Name Control can have less, but no more than four characters. Blanks may be present only at the end of the Name Control.

Note: Do not include "dba" as part of the Name Control. The initials stand for "doing business as".

### **Business Name Control Valid Characters:**

Numeric (0- 9)

Alpha (A-Z)

Hyphen (-),

Ampersand (&)

### **Special Business Name Control Rule:**

If an invalid character is used in the name line, drop the special character from the taxpayer's name. Example: Jon.com should be considered as “Joncom” so the Name Control should be “Jonc”. Another example is 4U.com. The Name Control should be “4UCO”.

### Examples

Name Control Underlined	Name Control	Rule
<u>Sumac</u> Field Plow Inc. <u>11th</u> Street Inc. <u>P &amp; P</u> Company <u>Y-Z</u> Drive Co <u>ZZZ</u> Club <u>Palm</u> Catalpa Ltd. <u>Fir</u> Homeowners Assn.	SUMA 11TH P&PC Y-ZD ZZZC PALM FIRH	a. Derive the Name Control from the first four significant characters of the corporation name.
The <u>Willow</u> Co. The <u>Hawthorn</u>	WILL THEH	When determining a corporation name control, omit “The” when it is followed by more than one word. Include the word “The” when it is followed by only one word.
<u>John</u> Hackberry PA <u>Sam</u> Sycamore SC <u>Carl</u> Eucalyptus M.D.P.A.	JOHN SAMS CARL	If an individual name contains any of the following abbreviations, treat as the business name of a corporation: PC – Professional Corporation SC – Small Corporation PA –Professional Association PS --Professional Service
The <u>Joseph</u> Holly Foundation	JOSE	Apply Corporate Name Control rules when the organization name contains “Fund”,
<u>Kathryn</u> Fir Memorial Fdn.	KATH	“Foundation”, or “Fdn”.
<u>City</u> of Fort Hickory Board <u>Walnut</u> County Employees Association <u>Rho</u> Alpha Chapter Alpha <u>Tau</u> Fraternity <u>House</u> Assn. of Beta XI Chapter of Omicron Delta Kappa	CITY WALN RHOA HOUS	Apply the corporate Name Control rules to chapter names of national fraternal

## Exhibit 2 - Individual Name Control

The Primary SSN, Primary Name Control, State Abbreviation and Zip Code should be key verified to avoid lengthy delays caused by mismatches with existing taxpayer information in IRS records.

The individual name controls for the Primary and Spouse in the Form 1040 Return Header, Form 1040 Dependent and Spouse Exemption, Schedule EIC Qualifying Child, Form 2441 Qualifying Person, and all Form 8863 students, must equal the first four significant characters of the primary taxpayer's last name. No leading or embedded spaces are allowed. The first left-most position must contain an alpha character. Only alpha, hyphen, and space are allowed. Omit punctuation marks, titles and suffixes

The hyphen (-) is the only special character allowed for the PersonNameControlType.

Individual Name	Name Control	General Rule
John <u>Brown</u>	BROW	a. The name control generally consists of the first four characters of the individual's last name.
Mary <u>Smith</u> & John Jones	SMIT	
Ralph <u>Teak</u>	TEAK	
Dorothy <u>Willow</u>	WILL	
Joe <u>McCedar</u>	MCCE	
Joe <u>McCarty</u>	MCCA	
Torn <u>MacDouglas</u>	MACD	
Joseph <u>MacTitus</u>	MACT	
John <u>Hardy</u> , Minor	HARD	
April May <u>Jordan</u>	JORD	
John <u>Lea-Smith</u>	LEA-	b. The hyphen (-) is the only special character allowed in the PersonNameControlType.  Note: When a taxpayer's last name contains an apostrophe ('), ignore/disregard the apostrophe when establishing the Name Control.
Thomas A. <u>El-Oak</u>	EL-O	
Rana <u>Al-Smadi</u>	AL-S	
John <u>O'Neil</u>	ONEI	
Ann <u>O'Spruce</u>	OSPR	
Mark <u>D'Magnolia</u>	DMAG	
John <u>O'Willow</u>	OWIL	
Danette B	B	c. The Name Control may be less than four characters (if applicable).  Note: The first character must be an alpha character. Blanks are not needed as filler.
James P. Ai	AI	
John A. Fir	FIR	
John Ao, Sr.	AO	
John En, Sr.	EN	

Individual Name	Name Control	General Rule
Daniel P. <u>Di Almond</u>	DIAL	d. Taxpayer names such as “Van”, “Von”, “Vander”, “Al”, “El”, “Abu” and “Di” are considered part of the individual name control.  Note: See the Asian Pacific Names for exceptions to this rule.
Mary J. <u>Van Elm</u>	VANE	
Susan L. <u>Von Birch</u>	VONB	
Aya <u>Abu Sham</u>	ABUS	
Donald <u>Vander Oak</u>	VAND	
Otto <u>Von Hickory</u>	VONH	
Nabil <u>Al Feyez</u>	ALFE	
Amr <u>El Bayoumi</u>	ELBA	
Janet C. Redbud <u>Laurel</u>	LAUR	e. When two last names are shown for an individual, derive the name control from the second last name of the individual.  Note: see exceptions to this rule for Hispanic names, Asian-Pacific names, Native American names and Islamic & Arab names.
Dee (Plum) <u>Birch</u>	BIRC	
Mary Johnson <u>Garcia</u>	GARC	
Joan <u>Hickory</u> -Hawthorn	HICK	f. When two last names are connected by a hyphen, derive the name control from the first last name.
Dale <u>Redwood</u> -Cedar	REDW	
John <u>Lea</u> -Wren	LEA-	
Dell <u>Ash</u> & Linda Birch	ASH	g. On a joint return, whether the taxpayers use the same or different last name, derive the name control from the Primary taxpayer’s last name.
Trey & Joan <u>Eucalyptus</u>	EUCA	
Linda <u>Birch</u> & Dell Ash	BIRC	
Mary <u>Smith</u> & Mike Best	SMITH	

Consider certain foreign suffixes as part of the last name (for example, Armah-Bey, Pax-Ayala and Allar-Sid). Particular attention must be given to those names that incorporate a mother’s maiden name as a suffix to the last name. This practice is common in Hispanic names. Consider the mother’s maiden name as part of the surname for Name Control purposes.

Individual Name	Name Control	General Rule
Abdullah <u>Allar-Sid</u>	ALLA	a. When “del”, “de” or “de la” appears with a Hispanic name, include it as part of the name control.
Jose Alvarado Nogales	ALVA	
Juan <u>de la Rosa</u> Y Obregon	DELA	
Pedro <u>Paz</u> -Ayala	PAZ-	
Donald <u>Vander Neut</u>	VAND	
Otto <u>Von Wodtke</u>	VONW	
John Smith <u>Gonzalez</u>	GONZ	
Maria Acevedo <u>Smith</u>	SMIT	
John Garcia <u>Garza</u> Hernandez	GARZ	
Elena <u>del Valle</u>	DELV	
Eduardo <u>de la Rosa</u>	DELA	

Individual Name	Name Control	General Rule
Pablo <u>De</u> <u>Martinez</u>	DEMA	
Miguel <u>de</u> <u>Torres</u>	DETO	
Juanita <u>de</u> <u>la Fuente</u>	DELA	
B.A. <u>De</u> <u>Rodriguez</u>	DERO	
M.D. <u>de</u> <u>Garcia</u>	DEGA	
Juan <u>Garza</u> <u>Morales</u>	GARZ	b. When two Hispanic names are shown for an individual, derive the name control from first last name.  Note: This rule may not accurately identify all Hispanic last names, but it does provide consistency in IRS Hispanic name controls.
Maria <u>Lopez</u> <u>y</u> <u>Moreno</u>	LOPE	
Sylvia <u>Juarez</u> <u>de</u> <u>Garcia</u>	JUAR	

Below are examples of Asian-Pacific last names and the derivative name control. Some Indo-Chinese names have only two characters.

Individual Name	Name Control	General Rule
Binh To La	LA	
Nam Quoc <u>Tran</u> & Thuy Thanh Vo	TRAN	
Dang Van <u>Le</u> Nhat Thi <u>Pham</u>	LE PHAM	a. When “Van” (male) or “Thi” (female) appears with an Asian-Pacific name, do not include it as part of the name control.
Kim Van <u>Nguyen</u> & Thi Tran	NGUY	
<u>Kwan</u> Kim Van & Yue Le	KWAN	b. When the last name appears first, derive the name control from that name.
Yen-Yin <u>Chiu</u> Jin-Zhang <u>Qui</u>	CHIU QUI	

Below are examples of name controls for Native Americans:

Individual Name	Name Control	General Rule
Earline <u>Old</u> <u>Person</u>	OLDP	a. Native American surnames may contain several words.
Spike <u>Big</u> <u>Horn</u>	BIGH	Note: Begin the name control with the surname (unless the taxpayer is already established with a different name control)
Spike <u>Bighorn</u>	BIGH	
Mary <u>Between</u> <u>Lodges</u>	BETW	
Gail <u>George</u> <u>Moonface</u>	GEOR	

Individual Name	Name Control	General Rule
Night & James Lou Mary <u>Her</u> <u>Many</u> Horses	HERM	

### Exhibit 3 – Exempt Organization Name Control

Exempt Organization Name Control (Underlined)	Name Control	Rule
Local 210 <u>I</u> nternational Post 3120, <u>V</u> eterans of Wars AFL-CIO <u>L</u> aborer's Union <u>B</u> POE Benevolent Order of Elks AMVETS <u>A</u> merican Veterans Southbend <u>A</u> merican Legion <u>B</u> oy <u>S</u> couts of America (BSA)	INTE VETE LABO BENE AMER AMER BOYS	The Name Control is the first four characters of the national title.
<u>P</u> arent <u>T</u> eacher's <u>A</u> ssociation of <u>V</u> ermont <u>P</u> TA of <u>G</u> eorgia	PTAV PATG	The Name Control is "PTA" plus the first letter of the state, whether or not the state name is present as part of the name of the organization.
Diocese of Kansas <u>S</u> T. <u>R</u> ose's Hospital <u>S</u> T. <u>S</u> ilver's Church Diocese of Lani Building Fund, <u>S</u> T. <u>B</u> ernard's Church	STRO STSI STBE	For churches and their subordinates, (i.e., nursing homes, hospitals) derive the Name Control from the legal name of the church.
Committee to elect <u>J</u> ohn Smith Citizens for <u>J</u> ohn Doe Friends of <u>J</u> anice Doe	JOHN JOHN JANI	Derive the Name Control of Political Organizations from the first four characters of the individual's name.

## Exhibit 4 - Identifiers

This section describes the identifiers used within the MeF system. Identifying numbers are defined at the transmission, return and form levels and uniquely identify these entities.

### 1. Transmission Level Identifying Numbers

- **GTX Key** - The format of the GTX Key, used in IFA only, is as follows:

**SYYYMMDDhhmmss.nnnn**

- S = "A", "B", "C", etc. = the IFA server site.
- YYYMMDD = received date (4 digit year, 2 digit month, 2 digit day)
- hhmmss.nnnn = received time (2 digit hour, 2 digit minutes, 2 digit seconds, 4 digit nano-second)
- **Transmission ID.** This number, which exists in the transmission header, uniquely identifies a transmission for the tax year. It is created by the transmitter. The IRS will return this number in the transmission acknowledgement to uniquely identify the transmission that is being acknowledged. It can be up to 30 digits in length, is alphanumeric, and can contain characters ":", ".", and "-". A timestamp may be used as an ID as long as it is unique within the filing season. Up to 4-decimal fractional digits may be used for the second in a timestamp to ensure its uniqueness.
- **MessageID.** This number, which exists in the transmission header, uniquely identifies a message. The MessageID element is mandatory. All request and response messages must have a globally unique MessageID provided by the message source and is 20 digits number with following format: (ETIN + ccyyddd + 8-character alphanumeric).
- **Request Message ID**  
To ensure the global uniqueness of a message ID, the following format is adopted for the request messages sent to the MeF system:  
**ETIN + ccyyddd + xxxxxxxx**  
For example:  
*Request message ID:* 00130201007312345678  
The first five digits (00130) contain the ETIN, the next four digits (2010) contain the year, the next three digits (073) contain the Julian date and the last eight digits (12345678) contain a sequence number to uniquely identify messages sent within a day with the given ETIN. The total number of characters of the request message ID is twenty.
- **Response Message ID**  
For response messages sent from the MeF system, the following format is adopted for the message ID:  
**Request Message ID + "R"**  
For example:  
*Response message ID:* 00130201007312345678R  
The total number of characters of the response message ID is twenty-one.

- **Error Message ID**

For error messages sent from the MeF system, the following format is adopted for the message ID:

**Request Message ID + "E"**

For example:

*Response message ID:* 00130201007312345678**E**

The total number of characters of the error message ID is twenty-one.

- **Error ID** – This number, which is located in the acknowledgement file, uniquely identifies each error in the acknowledgement file. It can be up to 6 digits in length.
- **Transmitter's ETIN**. This number, which exists in the transmission header, uniquely identifies the electronic transmitter. It's a 5-digit number assigned by the IRS.

## 2. Return Level Identifying Numbers

- **Submission ID** - This number, which exists in the submission header, is a globally unique 20 digit number with the following format: (EFIN + ccyydd + 7-digit alphanumeric sequence number). There is a business rule validation that the Year in the Submission ID must be the current processing year.
- **Software ID** – This number, which exists in the return header or as a top level element within each schema, identifies the software used to build the return, form, or schedule XML instance. It's an 8-digit ASCII character field assigned by the IRS. The first two positions identify the tax year.

The software id in the ReturnHeader is a required field. If the return was created using just one software package, the SoftwareID in the ReturnHeader should be the only SoftwareID transmitted. If the return is created using more than one software package, the SoftwareID in the other Return Documents must indicate which software package was used for each form.

- **Originator's EFIN** – This number, which exists in the <ReturnHeader> element definition and the submission manifest, is the originator's Electronic Filing Identification Number. It's a 6 digit numeric field, where the first 2 digits represent a pre-defined IRS district office code. This identifier is assigned by the IRS.
- **Business EIN** – This number, which exists in the <ReturnHeader> element definition, is the Employer Identification Number of the business for which the return is being filed. This is a 9 digit numeric field, where the first 2 digits represent a pre-defined IRS district office code. This identifier is assigned by the IRS.
- **Preparer's SSN or PTIN** – This number, which exists in the <ReturnHeader> element definition, is a choice between a person's Social Security Number or Preparer's Tax Identification Number. SSN is a 9 digit numeric field, and PTIN is 9 digits, beginning with the letter 'P' followed by 8 numeric digits. The SSN is assigned by the Social Security Administration and the PTIN is assigned by the IRS.

- **Preparer Firm's EIN** – This number, which exists in the <ReturnHeader> element definition, is the Employer Identification Number of the firm which prepared the return (if applicable). It is a 9 digit numeric field, where the first 2 digits represent a pre-defined IRS district office code. The EIN is assigned by the IRS.
- **STIN** – This number, which exists in the Form 1040 <ReturnHeader>, is the site identification number VITA and Tax Counseling for the Elderly Non-Paid Preparer IRS-Sponsored Programs. The composition of the “STIN” is “S” followed by 8 digits.

### 3. Form Level Identifying Numbers

- **Document ID** – This number uniquely identifies a single form/schedule XML instance within the return. The attribute `documentId` exists in every top level element in the form/schedule schemas. It can be up to 30 positions in length, and is alphanumeric, plus can contain characters “:”, “.”, and “-“. This pattern allows for a timestamp to be used within the field. This identifier is assigned by the ERO's software.
- **Reference Document ID** – This number refers to a unique form/schedule XML instance (identified by its `documentId` attribute) within the return attribute `referenceDocumentId`. It is found where attachments to the tax return, form, and/or lines are made. Thus, this attribute's structure is identical to the structure of the `documentId` attribute.

## **Exhibit 5 - Standard Postal Service State Abbreviations and ZIP Codes**

The Standard Postal Service State Abbreviations and Zip code list can be found on IRS.gov at:  
<http://www.irs.gov/efile/article/0,,id=171946,00.html>

## **Exhibit 6 - Foreign Country Codes**

The Foreign Country Code list can be found on IRS.gov at:  
<http://www.irs.gov/efile/article/0,,id=175595,00.html>

## **Exhibit 7 - Forms and Attachment Listing**

The Forms and Attachments listing for Forms 1120/1120-F/1120S/7004, 1065/1065-B and 1040 is located on IRS.gov at <http://www.irs.gov/efile/article/0,,id=171946,00.html>. Forms and attachment have a parent/child relationship within the submission. For example, the parent form (1040, 1120 Series, 1065 Series, 990 Series, 720, 2290, 8849, 4868, 7004 and 8868) can have other forms, schedules, statements, etc attached. MeF refers to these as “dependencies.”

Each Forms and Attachment list identifies all dependencies and shows which IRS forms and schedules to which they can be attached. It also lists other form families with which a dependency may be shared. If a dependency is attached to a specific line on a form or schedule, it provides the specific line number. The Forms and Attachments Listing can be searched to locate a dependency by name. Note that several dependencies are "shared" which means they can be attached to several forms or schedules. The listing is updated frequently to stay in synch with the XML schemas. If further information is needed, taxpayers are advised to review the applicable IRS forms and schedules, and form instructions to determine the intent of a dependency.

## **Exhibit 8 - Return Due Dates Tables**

The return due date and extended due date tables for each MeF form can be found on IRS.gov at  
<http://www.irs.gov/efile/article/0,,id=171946,00.html>

## Exhibit 9 – Recommended Names and Descriptions for PDFs

As explained in Section [2.2.4 Names and Descriptions for PDFs](#), IRS recommends using specific names and descriptions when attaching certain PDFs to the MeF submission. This provides consistency in what the IRS users are seeing and helps to expedite processing of these returns.

The table below has the information listed by Regulatory Requirement and can also be found on IRS.gov on the [MeF User Guides and Publication](#) page. Updates during the year will be included on the document posted on IRS.gov. Two additional tables will be provided on IRS.gov:

- Recommended Names and Descriptions for PDFs based on Forms for Business Returns
- Recommended Names and Descriptions for PDFs based on Forms for Individual Returns

The 1040 MeF program is allowing a limited number of forms for processing year 2010; therefore, not all forms listed under the Business Returns document apply to Individual Returns.

### Recommended Names and Descriptions for PDFs based on Regulatory Requirements

## **Exhibit 10 – Volume Management Plan for Individual submissions**

### **Modernized e-File**

### **Form 1040 – Phase I**

### **Volume Management Strategy**

### **Final**

Beginning February 17, 2010, Modernized e-File (MeF) will accept Form 1040 (federal and state returns), Form 4868 extensions and 21 of the most common 1040-related forms/schedules for a total of 23 forms. 1040 returns with an attachment not included in the 23 forms and schedules population must be filed through the Electronic Management System (EMS).

For processing year 2009 (tax year 2008), approximately 72 million 1040 returns that fall within the potential 23 form MeF population were filed through EMS. This represents more than an order of magnitude increase over the number of submissions processed for tax year 2008 by MeF (4 million submissions). The IRS is building out the computing infrastructure to accommodate the increased demand and conducting performance tests to validate the new, expanded system. However, the IRS feels it is prudent to manage the volume increases in year 2010 so that the IRS and transmitters have an opportunity to observe system behavior and response times under controlled loads prior to opening the system to full load in processing year 2011.

Therefore, for processing year 2010 (1040 MeF phase I) the IRS is limiting the number of 1040 returns filed through MeF. The IRS will control volumes by implementing and enforcing a Volume Management Plan.

### **Volume Management:**

The plan will control volumes three ways:

First, those transmitters who either indicated they would not participate in 1040 MeF this year, or did not respond to our requested deadline, will not be allowed to file 1040 federal and state returns or 4868 extensions through MeF until after April 15. They will be able to file business returns, and test 1040s in the ATS system.

Second, those states who either indicated they would not participate in 1040 MeF this year, or did not respond to our requested deadline, will not be allowed to retrieve 1040 state returns through MeF until after April 15. They will be allowed to retrieve state business returns, and test 1040s in the ATS system.

Third, those transmitters who indicated they will participate in 1040 MeF will have their daily 1040 (federal and state) and 4868 submission volumes limited to a percentage of their 2009 daily 1040 23 form submission totals. We will send to each transmitter their daily 2009 1040 submission volumes and the maximum daily 1040 submissions they can submit to MeF. The daily totals are based on 2009 volumes and discussions held with the transmitters.

The filing season (February 17 through April 15) will be divided into three volume segments. The first period covers 1040 MeF start-up through the end of February. The second period

covers the month of March. And the last covers April 1 through April 15.

1040 MeF start-up occurs on the downside of the first peak filing period. Therefore, the percentage applied to this period is lower than the other periods and is designed to provide the IRS and transmitters an opportunity to evaluate response and processing times during a mini-peak.

Historically, volumes have been fairly consistent during the month of March. The percentages for the second and third periods are designed to observe system performance over a longer period under sustained but less than maximum load. It also gives everyone an opportunity to observe performance during the 1120 peak filing period.

Prior to each new period a Go/No-Go decision will be made based on system performance.

#### **Volume Percentages by Period:**

**Feb. 17 – Feb. 28**

**50%**

**March 1 – March 31**

**75%**

**April 1 – April 15**

**75%**

Each transmitter must determine their own method of complying with the percentages. We expect methods will differ depending on business models and e-Filing architectures. Regardless of implementation method, the IRS requests each transmitter follow these rules:

1. Transmit a cross-section of the 23-form population that qualifies for MeF. The submissions transmitted should be representative of the entire 23-form population or the Volume Management Strategy will not accomplish its intended goal of assessing system behavior under increasing load. If transmitted 1040 returns do not represent a good cross-section of the 23-form population, analysis of system performance may be skewed.
2. Distribute the transmissions over the course of the day. Do not accumulate submissions then blast MeF all at once.
3. Adhere to the daily totals and percentages provided by the IRS.

The percentages and maximum daily totals will be enforced by IRS at the transmitter level. The IRS will monitor daily transmissions by transmitter. Transmitters who exceed their daily totals will be advised of non-compliance. Continued non-compliance may result in suspension from MeF 1040 until after April 15).

#### **IRS – Trading Partner Communications (Conference Calls)**

The 1040 MeF Phase I filing season will run more smoothly if all trading partners have access to key MeF personnel. Therefore, the IRS will conduct conference calls with its trading partners during the testing and filing periods. ATS (Assurance Testing) will begin on November 2, 2009. Production filing will begin on February 17, 2010. These calls will give trading partners and IRS/MeF personnel an opportunity to discuss each day's e-Filing experience. Trading partners can discuss issues encountered and ask questions. The call will give every trading partner an

opportunity to stay in touch with IRS. No calls will be conducted on weekends for ATS or production. The calls will be scheduled as follows:

November 2 – November 6 (1 <sup>ST</sup> week ATS)	One call each day.
November 9 – February 16 (ATS)	One call each week.
Feb. 17 – Feb. 28 (1 <sup>st</sup> percentage period)	One call each day.
March 1 – March 31 (2 <sup>nd</sup> Percentage period)	One call each week.
April 1 – April 15 (3 <sup>rd</sup> percentage period)	One call each day.

Issues and problems may arise between calls and calling periods that cannot wait until the next call. When trading partners feel an issue or problem requires immediate attention, they can call Xan Ostro at 202-283-7697 or contact us at the 1040 MeF mailbox.
